This Article is brought to you for free and open access by the Center for International Stabilization and Recovery at JMU Scholarly Commons. It has been accepted for inclusion in Journal of Conventional Weapons Destruction by an authorized editor of JMU Scholarly Commons. For more information, please contact dc_admin@jmu.edu.
The Mines Advisory Group (MAG), U.K. Registered Charity No.1020441, started in 1992. MAG's programs integrate mine/UXO survey, demarcation and clearance with awareness-raising activities to reduce landmine risks to affected populations. MAG's integrated approach prides itself on working with conflict-affected communities to identify and address their most pressing needs.

Through close liaison with the communities, MAG can focus its work on the priority areas that the communities have identified. By training and employing people from mine-affected countries, MAG is transferring technical and management skills to local citizens who can sustain this work.

Mine Action Teams concentrate on tackling urgent tasks, such as providing safe access to water, paths and land for housing, farming and the development of social services. Where applicable, these teams will also survey and mark wider areas of dangerous ground for clearance.

The community liaison staff undertakes information gathering and community awareness work: a medic and driver support them. MAG is creating, through its mine action teams, greater flexibility, more multi-skilling and more responsiveness to the broad impact of landmines. MAG will also propose other clearance aids, such as dogs and machines, vegetation and brush cutters and mini-flail machines, in order to better serve the people and their communities.
