10,000 students by '90 proposed

Four options considered

By JULIE SUMMERS

An enrollment of 10,330 by 1989-90 has been proposed by a James Madison University administrative committee. This is 1,825 more students than allowed under an enrollment projection approved by the State Council for Higher Education in Virginia (SCHEV) in December and 2,404 more students than presently enrolled.

JMU currently has an enrollment of 7,926 students and the State Council has approved an enrollment of 8,695 by the end of the 1980's. The university is seeking to increase the approved projection and a committee of the Planning and Development Commission has compiled four options for SCHEV to consider.

All four options list enrollments exceeding the current limit. The highest projection is 10,330 by 1989-90.

All state colleges and universities in Virginia project enrollments each biennium (two-year period). JMU has exceeded its approved projection each year, according to Dr. William Jackameit, director of institutional research here.

In the past, SCHEV has always cut the projected enrollment figures JMU has presented. However, projections for the next biennium (1980-82) were approved with no alterations.

"We have demonstrated that we are going to have the students," Jackameit said. "SCHEV is finally realizing we can get the students.

By exceeding SCHEV approved projections, JMU has run the risk of losing tuition money from the extra students. State budgets are based on the approved projection numbers and JMU has not been receiving state funds for the extra students. SCHEV now states that if enrollment is more than one percent of the approved projection, the institution may not keep the additional tuition money.

"SCHEV has been tending to let us get away with more because they see we are getting the students," Jackameit said.

By KRIS CARLSON

The proposed utility deposit organization that could save students about $250 in annual utility deposits has had trouble getting started because of large student debts here.

The organization, which has been in the planning and study stages for almost two years, will either be approved or sent back to committee in about a week, according to Lin Rose, associate director of residence halls and commuter student services.

With over $10,000 in student debts at the Continental Telephone Co. this year, and with other utilities averaging $500 to $1,000 a year in student debts, the organization has had trouble getting financial backing, Rose said.

Financial backing is needed the first year so that the organization will have a money reserve in case an insufficient number of people join. A low membership would make the pool of money generated by membership fees small. The financial backing would cover the cost in case a lot of members just decide not to pay their bills, according to Rose.

So far, the organization has not found a backer. Rose said. The Alumnae Association was approached for the money, but they said it would be impossible to raise the money that may be needed to cover the organization, he said.

Rose will meet in the next week or so with JMU President Ronald Carrier to see if the administration can come up with any backers. If none materialize the deposit organization proposal will be sent back to its Commuter Student Committee group. The Student Government Association probably will then be asked for funding, according to CSC Chairman Craig Williams.

If Carrier or the administration can provide the needed backing funds, the organization could become operational next semester.

Debts

By DEBBIE YARD

The honor code at the University of Virginia, unlike the one here at James Madison University, encompasses all facets of university life, including the writing of bad checks.

The bad check committee, an agency of the U.Va. honor code handbook, finds its origin in the student-organized telephone deposit cooperative at U.Va., which was established in 1965. The committee was formed to deal with cases of bad checks.

The committee's jurisdiction includes all cases of bad checks by U.Va. students, and its decisions are final. The committee is comprised of four members, all of whom are students.

The committee's role is to determine whether a student's check was a bad check and, if so, to assess the appropriate punishment. The committee's decisions are based on the circumstances surrounding the case and the student's past history.

The committee's decisions are final and cannot be appealed. The student is given an opportunity to explain their case before the committee makes its decision.

The committee's decisions are also publicized in the University's student newspaper. This has led to criticism from some students who feel that their privacy is being invaded.

The committee's decisions are also used by the university in determining whether a student is eligible for certain privileges. For example, a student who has a bad check on their record may not be able to live in university housing.

The committee's decisions are also used by the university in determining whether a student is eligible for certain scholarships. For example, a student who has a bad check on their record may not be eligible for a scholarship.

The committee's decisions are also used by the university in determining whether a student is eligible for certain jobs. For example, a student who has a bad check on their record may not be eligible for a job.

The committee's decisions are also used by the university in determining whether a student is eligible for certain awards. For example, a student who has a bad check on their record may not be eligible for an award.

The committee's decisions are also used by the university in determining whether a student is eligible for certain honors. For example, a student who has a bad check on their record may not be eligible for an honor.

The committee's decisions are also used by the university in determining whether a student is eligible for certain clubs. For example, a student who has a bad check on their record may not be eligible for a club.

The committee's decisions are also used by the university in determining whether a student is eligible for certain activities. For example, a student who has a bad check on their record may not be eligible for an activity.

The committee's decisions are also used by the university in determining whether a student is eligible for certain services. For example, a student who has a bad check on their record may not be eligible for a service.

The committee's decisions are also used by the university in determining whether a student is eligible for certain benefits. For example, a student who has a bad check on their record may not be eligible for a benefit.

The committee's decisions are also used by the university in determining whether a student is eligible for certain rights. For example, a student who has a bad check on their record may not be eligible for a right.

The committee's decisions are also used by the university in determining whether a student is eligible for certain privileges. For example, a student who has a bad check on their record may not be eligible for a privilege.

The committee's decisions are also used by the university in determining whether a student is eligible for certain opportunities. For example, a student who has a bad check on their record may not be eligible for an opportunity.

The committee's decisions are also used by the university in determining whether a student is eligible for certain advantages. For example, a student who has a bad check on their record may not be eligible for an advantage.

The committee's decisions are also used by the university in determining whether a student is eligible for certain opportunities. For example, a student who has a bad check on their record may not be eligible for an opportunity.

University growth will continue

President wants Sampson, more buildings

By DWAYNE YANCEY
Following are the edited transcripts of a January interview with Dr. Robert Madison University President Ronald Carr. This is the third in a four-part series.

Q: The Grafton-Stovall Theatre has opened up, the education building is under construction, the library will be started soon. What other major construction is planned?

A: We have a recreation building which will be started too. That will be behind the tennis courts across from Interstate 40. It will be a big addition. It will have indoor tracks, indoor tennis courts, indoor basketball courts and hopefully they can stay open most of the day.

The other thing is that we would like to have a coliseum, but we can’t afford it. If we can get the city and county to give us more money, we would like to have a coliseum that would hold 9,000 people. If not, we’re going to add 3,000 seats to Godwin.

Another major building we need is a fine arts building. That’s the number one priority after the Library, then the renovations of Burtiss, the renovation of Knezzell, and the renovation of this building (Wilson). We’re going to be in pretty good shape then. We’re also building one more dormitory. We may build some more apartments across the Interstate for married students and graduate students.

Q: Is there a timetable for these?

A: I hope the fine arts center can be built in four years. We won’t get it (the money from the General Assembly) this time, but perhaps we’ll get it next time.

Q: What about the coliseum?

A: If it’s going to be done, it’s going to be done in the next four years. Otherwise, we have to add to Godwin. Especially if we get Ralph Sampson. High School’s 73rd player and one of the nation’s most highly recruited players.

Q: Are we?

A: I’d like to. We’re not giving up. We want him. We think we could do a lot for him and he could certainly do a lot for us.

Q: Other than physical construction, what other kinds of changes are planned?

A: I showed you the Role and Scope Committee report, with the list of new programs--like the new degrees, the School of Accountancy, College of Health, and the School of Nursing. We would like to make terms of faculty development is to get foundation funds to bring in distinguished scholars from all over the world, and have more opportunity for students to be foreign exchange students, starting next fall, with the semester in London program.

I’m going to Austria and Germany in February. While I’m there I will see the president at Vienna and the president of Göttingen and hopefully we can develop some exchange programs with students and faculty members there.

Also, we want to develop within our curriculum a more individualized type of learning experiences so that we can have more opportunities for students to pursue their type of studies in their last year and working independently with faculty members.

And ultimately our goal is to bePhi Beta Kappa.

There were certain things in that regard most people don’t realize. I saw that we didn’t have Mortar Board and Omicron Delta Kappa, or Phi Kappa Phi, so I gave assignments. Dr. Fay Reubush had to get Mortar Board organized. Mike Webb had to get ODK, and Bill Callahan had to get Phi Kappa Phi. And they did.

And I’m not interested in leaving here, although all those people say, “Well, Carrier’s been here five years, six years seven years and now he wants to leave.” I don’t want to leave. I really like it here. I like the people. I like the area. I like the school.

And while we don’t have all the things that they’d have at the University of Texas, you or you can just go down the list of schools, Oklahoma, Missouri, Illinois, Penn State, VCU, George Mason, University of Virginia, VPI. I would like to see those things here.

It’s going to be harder because we haven’t inherited anything. But I don’t want to leave here. I’d like to see us realize it here. I really think we can.

I would like to see this institution have the best reputation of any institution in the East. Now we have a good reputation among students. We’re what I’d call a first rate state college, but what I want to be is first rate in all of them, everything, in our faculty, our research opportunities with faculty, all kinds of students, our athletic programs.

Hell, it’s a risk, so I don’t really have any desire to leave here. I could spend many more years here and be very happy. The family likes it here. It’s close to Washington. If you want to go to New York, you’re close there by air, by car. If you want to go to the mountains, it’s close.

It’s a great place to live and this vehicle is coming along, we still got a lot of work to do. Getting all these programs accredited by a reasonable accrediting agency. We want to get the School of Fine Arts and Communications with a really nationwide reputation. That’s what I want. I want people to think about journalism and communication.

They’re going to think about James Madison University. We’re moving slowly now, but to put that thing together now we’re going to have to really get some interest here. So that’s what I want to see done. And you can measure the specific in terms of the quality of your faculty, the quality of your students.

We’re not leaving anything to chance. We’re over our applications now. This time last year, but we’ve got a study going on to make sure we’ll content ourselves. And we will hire consultants. The consultant decision analysis is very unusual. Most schools that have our situation don’t think about the problem.

We’re not going to leave anything to chance. We want to be well-run and managed and want to be first rate. We’re not asking what first rate is. I want your degree to mean something. I want our students to get into med school, and law school, and graduate programs. I want them to be Rhodes scholars, or Fulbrights. Those are the types of accumulations that we have. We’re not giving up because I’ve been here eight years. I’m not getting tired.

Q: No ambitions to be governor then?

A: No ambitions to be governor.

Q: Often rumors float around that you’d like to be governor.

A: I could probably administer the state, but that’s a different type of read. I’ve got to have an organization, you’ve got to have money, and unless you can get there, there’s no need to dwell on that. You might as well do the job where you are.

Q: What would you say your most significant accomplishment has been since you’ve been here?

A: Keeping my family together (laughs). There’s always a lot of pressure on you where you’re in public life.

The most significant accomplishment is that we have developed an institution that the students are proud of, and take pride in. And seem to want to go here.

Q: What about your most significant accomplishment?

A: They wouldn’t let me run The Breeze (laughs). Oh defeat, defeat, defeat. Where have we been defeated?

I won’t say it’s a defeat because you’ve defeated you’ve lost, and we never lose, we keep coming back, but I was disappointed that we didn’t get the ranking. We’ve flown back and we’re going to get it now.

So you can say “well, we were defeated,” but I would never admit that we were defeated.

The most disappointments, setbacks, events we’ve had, we’ve had really difficult times in higher education, but all kinds were in the 60’s when you could get all kinds of money from the federal government, all kinds of grants, and state legislators gave it out without question.

Now, hell, every time you turn around somebody is doing a study as to how money is being spent.

The most frustrating experience has been the constant threats of the 70’s. You’ve had rapid inflation, which you’ve never had before. It meant that you’ve really had to be very careful in using money, it meant that you want to pass some of it on to students, and fees have gone a little higher than I would have liked.

And the second thing is that we’ve had delays in capital projects that we should have done. That’s the primary concern.

Then, time is always the frustrating. We’re over our applications now, this time last year, but we’ve got a study going on to make sure we’ll be attractive to students in the 80’s. And we have to hire consultants and the consultant decision analysis is very unusual. Most schools that have our situation don’t think about the problem.

We’re not leaving anything to chance. We’re over our applications now, this time last year, but we’ve got a study going on to make sure we’ll be attractive to students in the 80’s. And we have to hire consultants. The consultant decision analysis is very unusual. Most schools that have our situation don’t think about the problem.

We’re not leaving anything to chance. We want to be well-run and managed and want to be first rate. We’re not asking what first rate is. I want your degree to mean something. I want our students to
Dr. William Hanlon:  
'Making net progress is all you can hope for'

By BRUCE OSBORNE

In the school of business at James Madison University, the proverbial buck ends its journey at the office of Dr. William Hanlon, whose responsibilities as dean of the school of business include overseeing and coordinating the six departments and various programs within the school. Hanlon ended up in higher education because he decided when he was in school that he liked "this age perspective," he said. Hanlon also is responsible for promoting JMU and its students in the business community, he said, and he helps to carry out this task by serving as vice president of the local chamber of commerce.

Through this position, "I come in contact with people who get to know me, and therefore the school," according to Hanlon. Hanlon points out the "dramatic" increase in the number of faculty in his school—more than 80 teachers have been added in the last four years—as his major accomplishment.

"No school is any better than its faculty," said the first lecture series. McConkey described his job as one of planning and budgeting for both the Fine Arts and Communication department. said he likes best about his job. As dean of the school "I am able to deal with programs on an operational basis," he said.

Being more insulated from the daily routine and seeing fewer students and faculty, is what he likes least, he said. The biggest problems have been starting files from scratch and establishing procedures for routine operation, McConkey said.

When the school was started, committees for professional standards, long-range planning, school curriculum, grants and external funding, public relations, and facilities all had to be appointed, he said. McConkey then had to explain the committee's missions to their respective members and provide them with guidelines to follow, he said.

McConkey gave the committees no specific goals, he said, and wanted to let them develop their own modes of operation. At the end of the year he will review the committees, he said, and more specific goals will be set up.

The new job also required McConkey to familiarize himself with the special needs of each department, he said. He already knew most of the needs of the communication arts department but he has had to learn about many of those needs in both art and music, he said.

The most amusing problem McConkey has faced since becoming dean of the new school is a lack of office furniture, he said. With the exception of chairs, he has none of his own furniture and has had to borrow, said McConkey.

The problem is normal, however, because it's part of the state purchase procedure, he said. Furniture should be arriving soon.

Dr. Donald McConkey:  
Newest dean looking for 'solid development'

By PATRI FULITY

"I am looking forward to the next few years and solid development of programs in the arts and communication that will give James Madison University increased visibility," said the first dean of the school of fine arts and communication. Dr. Donald McConkey, who became dean of the new school on July 1, said he hopes to develop an administrative unit with identity and a spirit of unity for programs in both the arts and communication.

McConkey described his job as one of planning and administration of academic programs, including the planning of budgets, curriculum, and class schedules. His jurisdiction covers the areas of studio art, art history, applied music, music theory, speech communication, broadcasting, journalism, and theater, he said.

In addition, he is responsible for WMRA, the Television Film Center, technical operation of stages on campus, and planning and budgeting for both the Fine Arts Festival and Artist and Lecture series. McConkey said.

The Breeze and Chrysalis are also within the school of fine arts and communication. "Being a part of the institution's operation, and planning at a little higher level is what McConkey, former head of the communication arts department, said he likes best about his job. As dean of the school "I am able to deal with programs on a philosophical rather than an operational basis," he said.

Being more insulated from the daily routine and seeing fewer students and faculty, is what he likes least, he said. The biggest problems have been starting files from scratch and establishing procedures for routine operation, McConkey said.

When the school was started, committees for professional standards, long-range planning, school curriculum, grants and external funding, public relations, and facilities all had to be appointed, he said. McConkey then had to explain the committee's missions to their respective members and provide them with guidelines to follow, he said.

McConkey gave the committees no specific goals, he said, and wanted to let them develop their own modes of operation. At the end of the year he will review the committees, he said, and more specific goals will be set up.

The new job also required McConkey to familiarize himself with the special needs of each department, he said. He already knew most of the needs of the communication arts department but he has had to learn about many of those needs in both art and music, he said.

The most amusing problem McConkey has faced since becoming dean of the new school is a lack of office furniture, he said. With the exception of chairs, he has none of his own furniture and has had to borrow, said McConkey.

The problem is normal, however, because it's part of the state purchase procedure, he said. Furniture should be arriving soon.
Illegally parked cars towed from WVPT

By KEVIN KEFGAN

Cars illegally parked in the WVPT parking lot or in the grassy lot behind the public television station will be towed away at the owners expense, a station official said.

Most of the illegal parking occurs on weekends, when students are at parties in the Greek housing section, according to an official who preferred to remain anonymous.

"We've had as many as 12 cars towed in one night," the official said.

"We originally tried putting notices on cars warning people that their cars would be towed if they remained parked in our lot," she said. "But the notices didn't do any good."

Systems analysis

topic of new course

The Management Development Center of James Madison University's School of Business will offer a three-week non-credit course in systems analysis beginning Feb. 13.

The course, which emphasizes the systems approach to problem-solving techniques, is designed for the practicing manager, potential manager, executive, owner and data processing person. The course topics include:

- Orientation to systems analysis
- The systems approach
- The feasibility study

The course will meet Tuesday and Thursday evenings from 7-9 p.m. in room three of Jackos Jackson Hall on the JMU campus.

For an application and further information contact Dr. Jackson Ramsey at 433-6664 or Dr. Ben Bauman at 433-6420.
‘It would be a morgue without the students’  
President’s secretary does everything from sewing to writing letters

By JULIE CRANK

People say she runs the university when President Ronald Carrier is away. “I don’t run it. I’m just officially in charge of it.”

For 16 years, Alice Liggett has been secretary to the president at James Madison University. Her job entails everything from sewing on buttons to answering the phone, babysitting to writing letters, scheduling appointments to serving as secretary of the university council.

In 1963, Liggett started working for Dr. G. Tyler Miller, then president of Madison College, and continued when Carrier took over the office. “I was a little worried that he (Carrier) might not keep me on. It’s the president’s right to choose his secretary,” said Liggett.

A lot of secretarial jobs can “get boring, but I do enough different things to keep it exciting.” Liggett takes all of Carrier’s phone calls so she can “keep track of messages and returned calls,” she said. “Some days the phone rings all day, other days not at all.”

Correspondence takes a lot of her time, said Liggett. She estimates that 50 to 60 letters are sent from the president’s office each day.

“I like to write,” said Liggett and in many instances she will compose Carrier’s letters.

Scheduling Carrier’s appointments is another part of Liggett’s job and perhaps the most difficult.

Carrier is often late, said Liggett. “It is hard to get him on schedule and appointments are constantly being changed.” she said. In some cases a mix-up will occur and Carrier will be in one place when he should be in another.

Liggett serves as secretary to the university council as part of her job and has also served as secretary to the Board of Visitors for 11 years.

An eight hour day is rare for the president’s secretary, said Liggett who often works Saturdays or Sundays. “I don’t mind if it means getting the work done. One of the most important things I learned was that you don’t set your own working hours.” Liggett said. Instead she works around Carrier’s schedule—a hectic one.

“We are especially busy during a legislative session,” said Liggett, because Carrier works hard to get funds for the school.” If anyone can get him now,” she said.

Carrier is “considerate and remembers the little things,” said Liggett. “He is interested in improving working conditions here, and if he is walking down a sidewalk and notices that it needs repair, he will remember to do something about it.”

“I try to help him follow through” on those sorts of matters, said Liggett. She especially likes helping Carrier deal with students problems. “It would be like a morgue without the students,” she said.

Likewise, Liggett is considerate. She informs Carrier’s wife of his schedule, babysits for his daughter, and tries hard to remember the names and phone numbers of Carrier’s personal friends.

Despite her busy schedule, Liggett found time to be a student herself. For 14 years she took one class a semester, and received her degree in English in 1976. She enjoyed the classes she took, but some of her professors got a little nervous when they found out who she was.

Liggett is thinking about taking some graduate courses in the future, though a master’s degree “isn’t really important.”

The changes that have occurred at Madison in the past 16 years “have been good,” said Liggett. “There is not any apparent unrest and values seem to be in better. Her four sisters attended Madison, said Liggett, and her aunt was secretary to the first president here.

The Liggett family has a history of association with the university, and “it’s home to me now,” she said.

A LOT OF SECRETARIAL JOBS can “get boring, but I do enough different things to keep it exciting,” says Alice Liggett, Secretary to President Ronald Carrier.

HAS THE COST OF HIGHER EDUCATION BEEN HIGHER THAN YOU ANTICIPATED?

Maybe you just haven’t checked out all the options. Army ROTC offers you a chance to apply for financial assistance while you evaluate the program. No obligation, unless you accept a scholarship or enroll in the Advanced course. In the meantime, you have plenty of time to decide if the ROTC program is for you. It’s not for everyone, but it offers challenge and adventure for those who want to lead. Stop by and talk about it at Godwin 335, or give us a call at 433-6261.

LEARN WHAT IT TAKES TO LEAD
Announcements

Placement annual
The Career Planning and Placement Office has a limited number of remaining placement annuals. Pick up copies today on second floor, Alumni Hall.

Fund raiser
WMRA will begin its fund raiser at the FM Towns Festival on Feb. 14. The event will feature nine days of special music from the Western Front. Call 5125 for more information.

Workshop
A workshop on interviewing techniques will be held on Feb. 13 at 1:30 p.m. in the Warren University Union Mezzanine room B. The workshop is being sponsored by the Career Planning and Placement Office.

Tutoring
The Data Processing Management Association is now offering a tutoring service open to all students taking any programming language or computer course. Applications for information and assistance may be obtained by contacting Maureen Lane at 236 or Kim at 6126.

Curio
"Curio," the feature magazine produced by JMU students for area distribution, is seeking interesting ideas for articles about local people, places and things for this spring's issue. Submit ideas to Articles Editor, Box 621. or call 434-8766 for more information.

Oecct lecture
Ron Carlson, president of the Christian Ministries Information-L, will be speaking on worship and outreach on Feb. 13 at EMU Chapel on Feb. 14 in Wilson Hall. The time is 7-10 p.m.

Plays in Wampler
Six very short absurdist plays and a dance will be presented in Wampler Experimental Theatre Feb. 23-24. Plays written by JMU senior Mary Ruberry. Admission is $1.50. Proceeds go to the Little Sisters of the Poor.

Writing lab
The Writing lab offers individualized help for students working on papers, preparing to take GRE, DAT, or TOEFL, and for students working to improve their writing skills. For additional information, call Mrs. Hawkins at 460. Lab hours are 1-5 p.m., Monday-Friday in Sheldon room 112.

Interviews
Sign-up sheets are posted in the Career Planning and Placement Office. Job fair. Alumni Hall for interviews with Busch Gardens and Camp Northern Woods. The Placement Office also has information on additional summer employment.

Football managers
The JMU Football team is looking for managers for the spring of 1979 and fall of 1979 season. Please contact Coach Cedar Winer if you are interested in an interview — 451-177.

Pep club
An organizational meeting will be held Feb. 13 at 7:30 p.m. in the Purple and Gold Room in Godwin Hall. $3 for all those persons interested in becoming members of a Pep club at JMU. The club is being organized to induce spirit at JMU's athletic events. If you are interested and unable to attend or want more information, contact Cassie Showalter at 600 or Donna Sizemore at 627.

Shopping bus
The shopping bus sponsored by the SGA will be operating every Saturday throughout the month of February. The bus leaves D- Hall at noon and 3:00 p.m. and provides transportation to and from the Valley Mall and downtown. If enough students take advantage of this service, it will be continued throughout the rest of the semester.

Auditions
Auditions-for "Sentence," a play by Don de Vries, will be Tuesday, February 13 at 7 p.m. in Godwin room 336.

Auction
The JMU Women's Club will present "Your Heart's Desire" auction of many types of merchandise or services, Feb. 14, from 6-9 p.m. in the Shorenbo Box of Chandler Hall. Bids may be placed on gift certificates, plants, books and records, home cooked and gourmet dinners, furniture, and a variety of other items. There is no admission charge. Refreshments will be sold. For more information, call Ann Bards at 434-6766.

Fund raiser
WMRA will begin its fund raiser at the FM Towns Festival on Feb. 14. The event will feature nine days of special music from the Valley Mall.

Workshop
Students and faculty are invited to attend a workshop sponsored by the Counseling and Student Development Center. Dr. Dorothy V. Harris, Professor of Physical Education, Penn State University, and Mr. Eugene Wettschoner, Professor Emeritus, Penn State University, will share their experiences in working with the psychological aspects of sports on Feb. 16, at 8 a.m. in room 110 in the Crafton-Stovall Theater.

Football managers
The JMU Football team is looking for managers for the spring of 1979 and fall of 1979 season. Please contact Coach Cedar Winer if you are interested in an interview — 451-177.

Pep club
An organizational meeting will be held Feb. 13 at 7:30 p.m. in the Purple and Gold Room in Godwin Hall. $3 for all those persons interested in becoming members of a Pep club at JMU. The club is being organized to induce spirit at JMU's athletic events. If you are interested and unable to attend or want more information, contact Cassie Showalter at 600 or Donna Sizemore at 627.

Shopping bus
The shopping bus sponsored by the SGA will be operating every Saturday throughout the month of February. The bus leaves D- Hall at noon and 3:00 p.m. and provides transportation to and from the Valley Mall and downtown. If enough students take advantage of this service, it will be continued throughout the rest of the semester.

Auditions
Auditions— for "Sentence," a play by Don de Vries, will be Tuesday, February 13 at 7 p.m. in Godwin room 336.

Auction
The JMU Women's Club will present "Your Heart's Desire" auction of many types of merchandise or services, Feb. 14, from 6-9 p.m. in the Shorenbo Box of Chandler Hall. Bids may be placed on gift certificates, plants, books and records, home cooked and gourmet dinners, furniture, and a variety of other items. There is no admission charge. Refreshments will be sold. For more information, call Ann Bards at 434-6766.

Financial aid
Applying for financial aid and campus employment—1979 Summer Session and 79-80 academic year. Applications can be picked up at Warner House. The deadline is Apr. 1.

Freedom Fighter
The JMU Chapter of Young Americans for Freedom will present a program, a Hungarian Freedom Fighter, on Feb. 15 at 7 p.m. in the Warren University Union Mezzanine room A. He will present "Your Heart's Desire." The topic will be "The role of mathematics in aerospace research."

Interviews
Sign-up sheets are posted in the Career Planning and Placement Offices, 2nd floor, Alumni Hall for interviews with Busch Gardens and Camp Northern Woods. The Placement Office also has information on additional summer employment.

Show films
Anyone interested in having a film short shown before the Sunday night movies in Harrison should contact Bob Nare, JMU Film Club. Box 436.

Auto Auction
Tri-Sigma sorority will present "Bits and Pieces" at the Auto Auction on Feb. 15. The event is sponsored by the SGA. Busch Gardens and Camp Preludes Wood. The Placement Office also has information on additional summer employment.

Math in space
Dr. John N. Shoosmith of NASA, Langley Research Center, Analysis and Computation Division, will hold a colloquium on Feb. 14 at 4:30 in the Barron room. The topic will be "The role of mathematics in aerospace research."

Interviews
Sign-up sheets are posted in the Career Planning and Placement Offices, 2nd floor, Alumni Hall for interviews with Busch Gardens and Camp Preludes Wood. The Placement Office also has information on additional summer employment.
This JMU student seems unaware of the impending danger of snow burial.

★ Announcements

(Continued from Page 7)

Sensitivity

The JMU Psychology Club will have a presentation by Dr. John McIntire with sensitivity exercises at 7 p.m., Feb. 13, in Alumnae Hall lounge.

Navy interview

A recruiter from the Naval Surface Weapons Center will be here on Feb. 13 at the interview center on Mason Street. For further information contact the Placement Office.

Physics speech

Dr. David Montgomery of the Physics Department at the College of William and Mary will speak on "Plasma Oscillations" Feb. 15, 1:30 p.m. in Miller 110.

Interviews

Recruiters from Procter & Gamble and from Camp Brethren Woods will be here on Feb. 13 at the interview center on Mason Street. For further information contact the Placement Office.

School interviews

Recruiters from London and Bedford County Schools will be here on Feb. 13 at the interview center on Mason Street. For further information contact the Placement Office.

Gov. employment

The Career Planning and Placement Office has applications to take the PACE Exam for employment in the Federal Government. The deadline for filing applications is Feb. 22.

Black History

Dr. Edward Toppin from Virginia State College will speak on "Black History" on Feb. 15 at 9 a.m. in the Grafton-Stovall Theater. The event is in conjunction with JMU's Black Student Body's celebration of National Black History Month.

Resume workshop

A workshop on resume writing will be held on Feb. 15 at 9:30 a.m. in the Warren University Union Mezzanine room A. The workshop is being sponsored by the Career Planning and Placement Office.

Woman’s softball

An organizational meeting for all those women interested in playing club softball will be held on Feb. 14, 7 p.m. in Godwin 344. If you are interested but cannot attend the meeting, contact Barbara Brown, 8-3052.

LUIGI'S PIZZERIA

NOTICE
Applications are now being accepted for the positions of editor, managing editor and business manager of The Breeze for 1979-80.

Persons applying for business manager must be familiar with The Breeze's business organization and have taken at least six hours of business courses or their equivalent.

Candidates for editor and managing editor must have worked for The Breeze in an editorial capacity for at least one semester and have taken at least six hours of journalism courses or their equivalent.

All candidates will be interviewed by a selection committee chosen by The Breeze Publication Board.

Written applications and requests for information may be directed to Dwayne Yancey, editor.
Deadline for applications is March 1.

Peeping tom visits Shorts Hall
By KENNETH YARD
"While I was in the shower, I heard something and when I turned, there was a man standing there... I screamed and ran," she said.
The woman was one of at least three women in Shorts Hall bothered Saturday by a man wandering around the dorm peeping into showers. Campus police apprehended a man later that day outside of Shorts, residents said.
Campus police could not comment on the situation, saying only Chief Jay Crider could release the information.
Crider could not be reached for comment at press time.
Several residents of Shorts said that the man apprehended had been charged with trespassing, but Sgt. Herbert Lam denied that charge.
A Rockingham County Sheriff's department spokesman said several people from James Madison University had been brought in during their weekend, but could not release any information concerning the incident at Shorts.
Residents said a man was first seen in the fifth floor bathroom at about 9:30 a.m. Shorts Hall is co-ed by floor. Second and fourth floors are male and third and fifth are female. There is one suite of male residents on the first floor.
A second incident occurred on the third floor when the man attempted to grab a woman who was showering. She ran from the bathroom and called her boyfriend, he called campus police, residents said.
Before campus police arrived, the man was seen hiding a fifth floor bathroom stall. He surprised a resident there by peering out from underneath the stall door, a resident said.
She ran into a hallmate's room and asked the people there to check to see if the man was in the hall, residents said. As they stood in the hall, the man left the bathroom and walked down the stairs, a resident said.
Campus police arrived and searched the building but were unable to find the man, she said.
The man was again seen on the second floor about 2 p.m. according to the residents. Campus police apparently apprehended him shortly thereafter in a nearby parking lot.
The Shorts residents who had seen the man said they identified him later that day at the JMU campus police office.

NASA expert to speak
Dr. John N. Shoosmith of the analysis and computation division of the National Aeronautics and Space Administration's Langley Research Center will speak at a mathematics colloquium at James Madison University on Feb. 14 at 4:30 p.m.
Shoosmith will discuss the topic "The Role of Mathematics in Aerospace Research."
The colloquium will be held in room 111 of Burruss Hall on the JMU campus and is open to the public at no charge.

 Seconds Out. And Then There Were Three 

By JIM DAWSON

Maybe the reason this review has taken so long to write is because it involves two more death-knells for what was once one of the most intriguingly impressive of the British art bands.

With "Seconds Out" and "And Then There Were Three" Genesis has chosen a commercial predictability over artistic innovation. Although both albums are compromised, listenable, most of the music on each is so aggressively static as to be objectively bad.

"Seconds Out" is Genesis' second live album, a two record set of songs played with a total lack of imagination or innovation. The arrangements on new material are very song-like, and are virtually identical to their studio counterparts. The only difference being that Genesis somehow manages to make each piece sound less dull on stage off the record is any indication. A year ago it seemed impossible that "Seconds Out" could be made into a boring song. With this album, Genesis has achieved the impossible.

There is also a question as to who would really want to hear Phil Collins doing vocals on songs that became Genesis classics back when Peter Gabriel was the group's lead singer. Collins has none of Gabriel's range, spontaneity, or color. Although there are some similarities between the two singers' voices, the resemblance is more akin to lackluster imitation than similar interpretation and approach.

The same holds true with much of Collins' work on the Genesis albums produced after Gabriel's departure, of which "And Then There Were Three" is the latest. Although Collins' vocal commerciality was noticeable in parts of "A Trick Of The Tail" and "Wind and Wuthering," however, there was a more than compensating amount of artistry on both of those albums. Unfortunately, on "And Then There Were Three," we would be hard-pressed to find a scrap of the band's past glory and talent. The tracks are horrendously stupid, the melodies have already been used in some cases, and what has been used has been used and reused in the rest, and the overall style is one of creative laziness.

Guitarist Steve Hackett's departure from the group inspired the title for this album, and it appears that he too has been missed by leaving Genesis behind. "Abandoning a sinking ship" is a phrase which comes conveniently to mind.

Take No Prisoners - Lou Reed

By JON DAVIS

If you liked Lou Reed's "Metal Machine Music," you will love his latest live album, "Take No Prisoners.

"Metal Machine Music" was produced to fill a record contract with RCA. This was after "Rock n Roll Animal," Reed's hard rock classic that everyone loved. But "Rock n Roll Animal" was, as Reed said on the liner notes to "metal," a misrepresentation. The misrepresentation did succeed "to the point of making possible the appearance of the progenator." Disheartened that rock would never become an intelligent art form, Reed stuck a microphone up to a speaker and recorded a double album of feedback. At the end of the album, Reed left passages to take the needle to the center of the record, so the album repeats the last 10 minutes of itself, ad infinitum.

It is in the same spirit that Reed produces "Take No Prisoners." Reed opens the album by quoting a line of Yeats' "The Amen Corner:" from his novel "Go Tell It on the Mountain." The set was a marvel not only of practicality but also of aesthetic thought. The set was a marvel not only of practicality but also of aesthetic thought.

The Amen Corner: fast paced, unified and rousing

By DR. FRANK ADAMS

James Madison University's Black Student Alliance performed a staged reading of James Baldwin's "The Amen Corner" last weekend in the Wampler Experimental Theatre. The tension between the secular and the sacred, the earthly and the spiritual, which benefits us all and which Baldwin has repeatedly and fruitfully studied, is at the center of the play. The play's skirts of this conflict were energetically represented by a strong cast of admirable direction. The play itself is flawed, perhaps because Baldwin is just naturally a novelist as he relates events and forces of his novel. "Tell It on the Mountain." A novel can satisfactorily make a point and then explain it, analyze it, deepen it. A play must make a point and then move on. "The Amen Corner" makes points and then belabor them: the result is a stop-go stop-go effect that hinders the audience's attention.

A second flaw is that the climactic line, "Praise the Lord." spoken by Sister Margaret in the scene of his novel "Tell It on the Mountain." The Amen Corner." makes points and then belabor them: the result is a stop-go stop-go effect that hinders the audience's attention.

To a one they were alert, vigorous, sensitive. Serita Hamilton carried a sense of realism in a variety of moods with conviction and power. Anita Turner accurately conveyed the gentleness, but firmness of a humanly religious nature.

College book is masterpiece

"The Harvard-Lampoon Big Book Of College Life" A Realistic Look at Life on the College Campus

By DONNA SEEMORE

From college applications and freshman jitters, to the social gaiety of college life and the last graduating parade, "The Harvard-Lampoon Big Book Of College Life" proves to be a masterpiece of truth. Somewhere between sarcasm and outrageous humor, the authors have achieved a literary piece of rare and unsurpassed excellence. From touching light-heartedly on outrageous humor, the authors have achieved a literary piece of rare and unsurpassed excellence.

The author takes the reader carefully through the channels that surround college life. The reader will be engaged in the student's everyday life as they go about their daily routine. The author's tone is relaxed and humorous, making the reader feel as though they are part of the college community.

The book is divided into several sections, each covering a different aspect of college life. The sections include "The Dorm Room," "The Classroom," "The Lunchroom," "The Library," "The Campus," and "The Social Scene." Each section is filled with witty anecdotes and clever observations.

The book is written in a conversational style, making it easy to read and enjoyable. The authors' writing style is both engaging and insightful, providing the reader with a unique perspective on college life.

Overall, "The Harvard-Lampoon Big Book Of College Life" is a must-read for anyone interested in the college experience. Whether you're a current college student, a recent graduate, or simply someone who has a strong appreciation for humor, this book is sure to provide you with a fun and enlightening read.
College book
(Continued from Page 11)

trials regarding college life.
The author treats the freshman year with utmost care. While
the view he presents may be exaggerated in nature, he does a fine
job of preparing the newcomer for college informances, frequently
broken rules, and typical letters from home. According to
the author, mom always writes, and she always reminds you to do the
significant little things that college students soon discover to be
obsolete. Dad is always so formal, remembering how it was when
he was in college, and praying that his son is not following in his
footsteps.
The reader is guided gently through the perils of studying.
Hints on reading, writing and staying sane, as well as suggestions
for learning to cope with the “nutty professor” are offered. The
author explores all the classic lines that are audible on campus
such as, “I’ve got a twenty-page paper due tomorrow,” and “I’m
on page one.”
The entire social gamut of college life falls victim to the
author’s imagination. From the humble dwelling filled with
posters to the intimate events occurring there, no stone is left
untouched. The Big Game Syndrome is explored extensively. The
author suggests that the dark finds many students wondering and
wishing. College confessions are explored and campus comedy is
introduced in a most convincing manner.
In the final pages of his book, the author speaks about the “Lost,
Paradise” by depicting life after college as one big joke. He
effortlessly provides the courage to journey into the
world of work and income taxes. The author offers some
interesting reasons for not trying to get a job and tosses them at
the reader for a mind-boggling manner. Vacation possibilities
are explored extensively. The reader is introduced to the
shattering of illusions with examples such as the classic
accounting major who gets a job making change at a toll booth.
The book is a masterpiece of good humor, and though
exaggerated on occasion, contains truth. The book is a must for
freshman, seniors, and everyone in between. The book should be
read by every college-bound high school senior and those students
who are already enrolled. Every professor should read it, and
every college library should own a copy.
The title of the book could be altered to read: “Handbook for
the Serious College Student.” It is the perfect medicine for the
Saturday Lonely Hearts Blues or Exam Jitters. The contents will
make you laugh endlessly and maybe keep you sane for one more
semester. After all, as the saying goes, “We all deserve a break
today.” “The Harvard Lampoon Big Book of College Life” offers
such a break. Do not pass up the opportunity to broaden your
basic awareness on college life. Read the book when you are in
need of a comic lift.

Book review:

Advocating the use of bicycle energy

By GAIL BOWERS

Solar power, wind power, water power—all three are alternative sources of energy that are slowly being recognized as practical for small-scale technologies. But there is another possibility for producing power that is right under our very noses and that was used quite successfully less than seventy years ago. Furthermore, equipment, tools, and technology are readily available for use right now.

The idea is "Pedal Power," the title of a new book that advocates the use of bicycle energy. The treadle sewing machine used this concept of human and mechanical energy in our grandmother's day. Today, the Rodale Resources Center is perfecting a bicycle-like 'Energy Cycle' which uses bicycle energy to power grain mills, churns, potter's wheels, and so on. Everything, say the authors, that has wheels or cogs could probably be powered by such a machine.

It can even generate electricity—twenty minutes of pedaling gives thirty minutes of electric power.

Why bike power? First of all, bike power is ergonomic—bicycles when coupled with human muscle are 95 percent energy-efficient. One reason for this is that the thigh muscles used in bicycling are among the most powerful in the body. Second, bicycle-powered machines can often be run at a slower rate of speed than electrified machines. This gives greater control over the work being done. There is an entire chapter devoted to an explanation of this by Mark Blossom, a craftsman who makes small wooden toys on a treadle-powered band saw. Finally, bicycle or treadle-powered machines use small scale, non-polluting technology. This makes them particularly appropriate for the less-developed areas of the world where resources and capital are at a minimum.

Bicycle technology can be used to pump water, transport goods and passengers in three-wheeled cabs, wash clothes, and perform a number of related tasks.

One of the most appealing features of "Pedal Power" is its plans for do-it-yourselfers, who want to construct their own bicycle-powered machines for producing energy. Two plans—one for a stationary cycle constructed of scrounged bicycle parts, and one for a power take-off device that attaches to the rear wheel of an existing bicycle—are included. Each machine has its own advantages. The rear-wheel device can be unhooked from the bicycle at will and the bicycle used normally. The stationary cycle brings the grain mill, churn, or other device being powered up front so that the user faces it, and it leaves the user's hands free as well. The plans are clearly illustrated with photographs and diagrams, and include a complete list of necessary parts.

If you're a veteran, the rules and regulations that affect your benefits can sometimes be baffling. Where to turn for help?

Try Red Cross. The Red Cross...

Last year, American Red Cross helped tens of thousands of former servicemen and their families get their educational, vocational, and medical benefits.
Baptist's win over William and Mary 'big for us,' said Jaynes. "We have a big rivalry with William & Mary, seven-game win streak."

"It was a big win for us," said James Madison head coach Betty Jaynes. "We have a big rivalry with William & Mary, and I'm really proud we won."

The Duchesses took the lead with 2:31 left in the first half on center Mandy Childress' two free throws and never trailed again.

The Indians came into Saturday's game sporting a seven-game win streak. "It was a big win for us," said James Madison University downed William & Mary in basketball. This time, the Duchesses scored a 68-54 win over the Indians Saturday.

In the second half, JMU used a combination of defense to force 25 W&M turnovers. "We just used whatever defense we thought would work," said Jaynes. "We thought their guards were getting tired, so we started pressing them."

The Duchesses opened in an 1-2-2 full-court zone press, which the Indians handled easily at first, but later it forced them to create costly turnovers. JMU remained six points ahead until two Indian turnovers were converted into baskets by the Dukes. Forward Kathy Hanrahan and center Cathy Hanrahan led James Madison with 12 points each.

The Lady Indians led in rebounds, 22 to 16, and in field goal percentage 33 to 27.6. In the second half, JMU used 15-21 (71 percent) compared to W&M's 6-13 (46 percent) shooting marks tomorrow.

James Madison defeated William and Mary 70-57. Tuesday night.

JMU's sticky 1-2-2 zone trap caused by taking advantage of the Indians' turnovers.

Winning four of its last five games, William & Mary took a 25-20 at the half. The Duchesses then switched into a full-court man-to-man defense, and never looked back.

"We never trailed again," said Jaynes. "We didn't even score our 1st lead six minutes into the game. Roger Hughett, whose 12 game points left him just two shy of reaching the 1,000 career-point plateau, led the way with eight during that stretch.

With 1:50 remaining in the half, JMU led 42-28. The Dukes held a 44-25 interception advantage. They coasted from there.

Men gymnasts first; women take second

The men's gymnastics team finished in first place in Friday's tri-meet held in Godwin Hall.

The Dukes' 147.8 points were more than enough to defeat Virginia Tech (131.45) and the University of Virginia (108.5).

Ron Ferris took three firsts, a second and two thirds for JMU in the meet. He captured the high bar with a 7.75; the parallel bars (6.21) and also won the all-around (40.9).

Ferris was second in the pommel horse, third in the rings and took another third in the vaulting event.

Dave Carter took two firsts for the Dukes. He won the floor exercises with a score of 7.9 and Carter also won the pommel horse with a 6.7.

JMU's Cliff Miller won the rings with a 7.1, and George Isbee captured the vault with a 7.86. Isbee also took a third in the high bar.

The Dukes finished their regular season with a 5-8 record. JMU will host the state tournament Feb. 25.

The women's gymnastics team fell just three-tenths of a point short of first place South Carolina Friday in a four-team meet held in Godwin Hall.

The Gamecocks totaled 109.5 points compared to the second-place Duchesses' (110.5)

(Continued on Page 16)

Jeff Cross and his inverted career

By DAN MCNIEL

As a general rule, most college basketball players serve the first year on the bench in a general observance and continue their apprenticeship before reaching the peak of their careers in the last two years.

Of course, there have been many freshmen who have made contributions immediately; JMU's Jeff Cross is one example. But there have not been many cases like that of Jeff Cross.

The future seemed rosy, or at least bright for Cross.

"I thought I was in," he remembers. "I thought I'd be playing all the time. I knew Sherman was coming back, but I thought I had proved myself. I figured I had a future."

Sherman Dillard returned and the Cross' role and his assist total dropped to 60.

"I lost my confidence when I didn't start," he said.

Coach Lou Campanelli said Cross "did an excellent job for us on his freshman year. We moved Roger (Hughett) over to the point. Cross played in all 26 games in 1977-78 in a reserve role and his assist total dropped to 60."

"I lost my confidence when I didn't start," he said.

Jeff Cross fights a crowd of VMI Keydets earlier this season. Cross has seen his playing time dwindle since his freshman year.

Jeff Cross started at point guard fresh out of St. Joseph High School and was named JMU's Most Valuable Defensive Player in 1976-77.

He set the school assists record for one game (16) and one season (163).

The future seemed rosy, or at least bright for Cross.

"I thought I was in," he remembers. "I thought I'd be playing all the time. I knew Sherman was coming back, but I thought I had proved myself. I figured I had a future."

Sherman Dillard returned and the Cross' role and his assist total dropped to 60.

"I lost my confidence when I didn't start," he said.

**W&M on football schedule**

Athletic Director Dean Ehlers announced Thursday that the Dukes will play William & Mary during the 1979 football season. The Dukes play the Williamsburg school on October 6. It will be the second football game between the two schools. William & Mary defeated JMU 32-7 in Williamsburg during the 1978 season.

**Wrestlers ‘shut out’ when weather, illness prevail**

By RICHARD AMACHER

The wrestling team was shut out this week, sort of.

The Dukes’ match with VMI Wednesday night was postponed because of snow. The match was rescheduled for this Friday.

Two dual meets scheduled for this past weekend were cancelled because of a staff infection that has crippled many on JMU’s squad.

Dennis Herndon heads the lists of casualties. Herndon has been confined to the infirmary for the past two weeks and will not participate in either of the Dukes two meets this week.

Rick Shoemaker has also spent time in the infirmary and is listed as questionable for action this week.

**Duchesses**

(Continued from Page 14)

to man-defense, that wore W&M down even more.

“We thought they were getting us in our zone press,” said Duchesses assistant coach Pam Weigardt. “And when they called a time out we thought they were making plans to break it. so we just decided to change into the man-to-man press.”

Cessna hit a 12-foot jumper to make the score 48-36 with 9:39 remaining, and it was the last time the Indians were within range.

Childress hit a layup for a 14-point JMU lead, after yet another W&M mistake. But Norenberg, the game’s top scorer with 20 points, hit a 15-footer from the right baseline to keep W&M within 15.

Hanrahon hit two free throws and a layup to give the Duchesses their biggest margin of the game at 54-38, with 8:39 remaining. JMU coasted from that point.

Childress hit the Duchesses’ scorers with 18 points and tied for the top rebounder of the game with two other JMU players at six.

Cessna added 15 points for the Duchesses and Hanrahon hit for 12.

**The Breeze top ten poll**

**EDITOR’S NOTE: Due to technical difficulties, the Breeze top ten intramural football poll was deleted from the last issue. However, we have it for you now, so here it is:**

1. Mississippi Wild Bunch
2. TKE
3. Outlaws
4. Old Boys
5. Lair’s Club
6. Undeeds
7. Ashby
8. Undesirables
9. Pi Kappa Phi
10. Blue Ridge Buckets
Smoking said to cause cancer

The new 1978 Surgeon General’s report on smoking and health has concluded that research has provided overwhelming evidence that cigarette smoking causes lung cancer in both men and women and is a major factor in emphysema, bronchitis, heart disease and other ills.

The report came from U.S. Surgeon General Julius B. Richmond on the fifteenth anniversary of the first report issued by then U.S. Surgeon General Luther B. Terry.

Dr. Richardson Grinnan, member of the Virginia Lung Association’s Board of Directors and pulmonary specialist at St. Luke’s Hospital in Richmond called the data on the dangers of smoking “overwhelming.”

Grinnan’s research into the problem concluded that cigarette smoking is related to heart disease, chronic lung cancer, cancer of the esophagus, of the mouth and tongue and the birth of low-weight babies.

“Smoking,” Grinnan says, “is the number one preventable health problem in the country. It is also one of the most costly health problems in the terms of dollars and cents in health care disability benefits.”

A member and former chairman of the Virginia Interagency Task Force on Smoking and Health, Grinnan went on to say, “In terms of size, the tragedy to the state of Virginia in health problems caused by smoking is overwhelming. People die everyday in this state from complications related to smoking.”

JMU illustrator exhibits work

Wes Caton, an illustrator in the publications office at James Madison University, has an exhibit of graphics and photographs at the Silvertree Gallery through Feb. 16. The gallery is located at 10 North Main Street in Harrisonburg and is open from 10 a.m. - 5 p.m. Tuesday through Saturday.

The approval of the next biennium projection seems to be in response to JMU exceeding past projections. According to Jackameit, this approval now puts JMU on a more even basis. "If you're under your projection you got more money than you needed, and if you're over as JMU has been you didn't get enough," he said.

Enrollment figures are compiled two ways. The first, which are the numbers cited here, is termed the headcount. This is the total number of persons taking courses on campus whether they be full- or part-time students.

The second number, used more often for accuracy, is the full-time equivalent or FTE. Computed by dividing the number of credits hours produced per year by 30 for undergraduate numbers and 24 for graduate, these figures more accurately depict the number of students enrolled full-time.

For example, George Mason University had a fall headcount this year of 9,148 but its FTE was 6,013 because of its large number of part-time and special students. Any enrollment increases JMU would be seeking in the next decade will hinge on capital planning construction plans. Enrollment increases would imply increases in academic facilities, campus housing, and library space, Jackameit said.

"We can't just increase enrollment without providing housing, library, parking facilities," he said. "Presently, only one housing facility for 136 students is in the plans."

Utility

(Continued from Page 2)

The organization would then be contracted to the utilities guaranteeing deposits to those utilities, according to Rose, with the figures that are guaranteed being close to what students are paying for deposits now.

If a student did not pay his bill, the utility would probably have 60 days in which to try and collect the money, before requiring payment of the guaranteed deposit from the organization, Rose said. The deposit organization would then attempt to recollect the money it had paid the utility from the student, he said.

Collection of the money from the student would be pursued through the local courthouse, since failure to pay would be breach of contract, according to Williams. "We would really lay down the law to first year offenders, and set an example at the beginning of the organization and therefore set a tone for following years," he said.

"We don't want it to be a black mark on the honor system," Rose said.

**W.E.F.:** I've looked for you, but where have you gone? From Transylvania? I always thought you were a hometown boy. Anyway, I bought you a special valentines day for you, a special friendship.

**TO THE KID:** May your parents always resemble Robert Kennedy and may I always be your depositor, Happy Valentines Day! Much love and short stuff.

**S.R.P.:** I've been looking for you, but where have you gone? From Transylvania? I always thought you were a hometown boy. Anyway, I bought you a special valentines day for you, a special friendship.

**TO MY SON:** Hope you get the Valentine's Day card. Happy Valentine's Day, I love you. Yours, Forever, Mom.
**Phones are inadequate**

By Mark Jordan Legan

There's that great old saying: "Long distance is the next best thing to being there." Anyone who has ever used the phones on this campus to call long distance knows the saying should be: "Long distance is the next best thing to talking to someone buried alive in a cave!"

The connections are so bad that calling Northern Virginia is like calling the slums of Guam. Maybe it's just my phone. Maybe it's just my operator. Maybe it's just the Continental Telephone Company.

First of all, you have to get past the operator to call the folks in person. Once you get through, it's not much better. The volume of the ringing sounds like the dinner bell at a pygmy's house. Even when the person answers the phone, you're never quite sure if someone is on the other line. Because of this problem, many collect phone calls open up with heart-warming conversation like this...

"HELLO? MOM, IS THAT YOU?"

"DON, ARE YOU THERE?"

"HELLO? HELLO? HELLO?"

"HELLO? HELLO? HELLO?"

(Continued on Page 23)

**Off campus parties a special breed**

By Kevin Crowley

Off-campus. The sacred, holy ground of parties, he was told.

Off-campus parties are a special breed, he said. The Young Freshman listened and believed the reports that filtered back to campus. He envisioned a Camelot, where students of all types gathered to enjoy the good life in a completely R.A.-less atmosphere. A place where beer flowed endlessly, where men were the sought-after gender, where children sang and birds played... (or something to that effect).

He imagined pure gold streets and splendor of the finest quality. Castle-shaped apartment buildings and women in long flowing silk gowns. His dream was picking up pace as thoughts like beautiful sweats, flew through his head, and the men, like carbon copies, dressed in jeans, plaid flannel shirts and... something was missing. A Beard! Of course, a beard, all the men had beards.

He awoke with a jerk, a cold sweat on his hands and face, but he remembered vividly his dream and instantly he went for his mirror in a vain search for facial hair. "Woe is me!" he cried aloud. "If only I had a beard I could go with my friends to the party at Squire Hill, as I have longed to for these many months."

He began to weep. Suddenly, a bright light, one thousand times brighter than his desk lamp, appeared in the corner of the room. Poof!

Just as suddenly, the light vanished and in its place stood a man who then The Young Freshman had ever seen before. The stranger was short and overweight; not immense, simply out of shape. He wore a crumpled suit, spotted with coffee stains. His eyeglasses lay on the desk in front of him, inanimate objects among the papers and files scattered everywhere.

"Hey, what is this," The Young Freshman said, the stranger replied. "Your fairy God-counselor!"

"What? My fairy God-counselor?" he cried. "Look buddy, this ain't "Alice in Wonderland," and I was just kidding with those "woe is me's" and "loned to's"!

You must have got the wrong address, I didn't order any fairy God-counselor," The Young Freshman said, a nervous edge in his voice.

"Oh my. "Dr Synonym chuckled. "You mean you're not The Young Freshman?"

"You see I had orders," the Doctor muttered while searching his desk for the green order form. "Ah yes, here it is. I am to avoid you in your efforts and I quote, "make the scene" at Squire Hill Apartments."

"Look Doc," The Young Freshman said. "That's just dandy and I appreciate the thought, but ya see I need a beard.

"Like this," Synonym asked, proudly tugging at his own scraggly growth.

"Well I was thinking of something a bit fuller," The Young Freshman said.

"Sure kid," Dr Synonym agreed. "You go get ready and I'll set everything up."

The Young Freshman dashed off and returned 33 seconds later fully showered and dressed, in Levi's and a plaid flannel shirt. He waited anxiously before his fairy God-counselor, who was heavily on his cheeks, never stopping to question the absurdity of the request.

"Okay, the he cried aloud. "If only I had a beard I could..."

He imagined pure gold streets and stereos of the finest quality, objects among the papers and files scattered everywhere. "Now I'll just say the magic words, wave my pipe and presto, beard-city," the Doctor said.

So this Young Freshman looks like everyone else."

Although lights and smoke burst out around The Young Freshman's face, Synonym realized he had found out, but because The Young Freshman was new at fairy God-counselers and magic pipes, he never suspected anything would go wrong.

Dr Synonym raced after the boy for 3 blocks, but The Young Freshman was totally unresponsive as he boarded the bus for Squire Hill Apartments.

The Young Freshman quickly obliged, spreading the glue heavily on his cheeks, never stopping to question the absurdity of the request.

"Now I'll just say the magic words, wave my pipe and presto, beard-city," the Doctor said.

So this Young Freshman looks like everyone else."

Although lights and smoke burst out around The Young Freshman's face, Synonym realized he had found out, but because The Young Freshman was new at fairy God-counselers and magic pipes, he never suspected anything would go wrong. Dr Synonym raced after the boy for 3 blocks, but The Young Freshman was totally unresponsive as he boarded the bus for Squire Hill, two dirty socks still clinging to his feet.
Merck instrumental in causing changes

To the editor:

As a devoted reader of The Breeze, I was surprised to learn that the Merck intrumental in causing changes. This is not the first time I have heard this from Merck. I believe they have been instrumental in causing changes in the past.

To the president for business affairs:

Merck is no longer a company that can be trusted. They have a history of causing changes, and I believe they are not doing this for the betterment of society. We need to be more cautious in the future.

US control collapsing

We are now witnessing in Iran the American-supported Iranian opposition movement growing in strength. The collapse of US control is evident in the country. I believe it is time for the United States to reassess its policy towards Iran.

To the editor:

Please consider the collapse of US control before making any decisions. It is not in the interest of the United States to support the Iranian opposition movement. We should work towards a peaceful resolution of the current crisis.

Counseling Center useful

The Counseling Center provides a variety of programs and services. I encourage all students to utilize these services to help in resolving conflicts and concerns without making harmful judgments.

To the editor:

I have been attending the counseling center for the past semester, and I have found it to be very helpful. It has provided me with the tools to resolve conflicts and concerns.
