Survey shows most students satisfied with Health Center

By KRIS CARLSON

Out of 130 students surveyed, 113 said they were satisfied with the care and treatment they received at the University Health Center. Results of the student health center evaluation survey, which was distributed to some 300 students during the end of January and the beginning of February, were announced March 21 at a meeting of the Student Health Center Advisory Committee.

The survey, which was devised by the committee and the Student Government Association, is the first real evaluation of "students' feelings and opinions about the Health Center," according to Robert McFadden, advisory committee chairman.

"The overwhelming majority of students seem satisfied with the Health Center, although I was anticipating more negative responses because of all the 'horror stories' you hear," McFadden said. "The Health Center has a bad reputation of sorts; apparently most students feel this reputation is undeserved."

One of the complaints written by a student on a survey was: "I'm dissatisfied with the amount of people who complain all the time about the center."

Some of the other results of the survey showed:

- 113 students thought that the doctor or nurse who treated them was courteous and friendly.
- 104 students thought that the doctor or nurse explained the illness and treatment well.
- 113 students said they were likely to use the Health Center again if they were ill.

A space was provided at the bottom of the survey for students to write complaints. Some of the most common complaints were about the "personality" of the nurse or doctor involved, that he or she was too gruff or hasty. McFadden said, or that the doctor or nurse didn't explain fully to the student what was wrong with him.

McFadden pointed out that the Health Center is a clinic, not a "family doctor type of practice." McFadden pointed out that the Health Center is a clinic, not a "family doctor type of practice.

GAS PRICES

Dollar-a-gallon gas forecast by fall

By DEBIE YARD

Gas prices should hit $1.00 per gallon by the end of the summer, according to two economics professors here. Dr. Anthony Bopp and Dr. Barkley Rosser said the United States has actually been subsidizing OPEC Organization of Oil Exporting Countries to keep gas prices in this country down. Europeans have been paying more than $1.00 per gallon, since 1974, they said.

"We still have the same problem, the same anywhere near biting the bullet on gas prices," Rosser said. "We didn't feel the crunch in 1974."

Presently the United States is in a system of controlling oil prices. Any price can be asked for oil not sold to this country, but the present administration has been keeping the price of a barrel of oil to 69.50 here.

This controlling has been in keeping with the administration's policy of low inflation. If the administration went to decontrolling, oil prices could soar, according to Bopp and Rosser.

In the long run though, Bopp and Rosser say that decontrolling would be beneficial. It would force researchers to seek alternate technologies that would be economically feasible to supplement oil usage. Research into alternate technologies such as solar energy, coal liquefaction and the use of shale oil is expensive and it is for this reason that the past, and present administrations have not instituted decontrol.

The short term effect of decontrol would most likely be instant inflation, Bopp and Rosser said. "If the U.S. was to decontrol now, oil prices would go through the roof," Rosser said. Rosser said that decontrolling now would mean benefits in the long run.

One of the complaints written by a student on a survey was: "I'm dissatisfied with the amount of people who complain all the time about the center."

Students would still drive

By DEBIE YARD

For some time, James Madison University has had the reputation of being a "suitcase college," because of the large number of on-campus residents who pack up and leave on weekends. In light of the higher price being charged for gasoline, as well as the possibility of a gas shortage, JMU drivers may be forced to change their traveling habits and spend more time either on campus or in the Harrisonburg area.

In an informal poll by The Breeze, it was found that those students surveyed would rather work around a gas crisis than give up driving.

These opinions are concurrent with those of people in other parts of the nation, according to a recent Associated Press—NBC News Poll. The Harrisonburg Daily News—Record, March 24, Of the 1600 persons surveyed in the AP—NBC poll, more than one-fourth said that if gasoline prices hit $1.00 a gallon, they would continue to drive their cars "just as much as they do now.

When asked if $1 per gallon gas was a reasonable price, driving senior Robin Giorgi said, "No, not if I can help it.

One-year graduate student Bruce Shilling said he would definitely alter his driving habits.

"Jeff Campbell, junior, said, "Yes, I would, but not altogether. I won't be going home as much."

Senior Lahey Hardman said she would probably cut down on driving.

Students also were asked, "Will Sunday closings of gas stations affect you?" The majority of students surveyed said that it wouldn't because they would just buy gas another day.

"It would affect them but not in any way," Junior Richard Coon said it would affect him because he goes away for the weekends and Clyde Smith, senior, said, "Yes, but it depends on the time of the year."

When the weather's nice I like to cruise on Sundays," Lance Roberts said he would make sure he had a full tank of gas by Friday and would keep his weekend trips to a minimum.
Finance chairman says:

SGA president here highest paid in state

By DARRELL PILE

The Razzle, March 27, 1979

SGA president at the University of Virginia. the College of William and Mary and Radford College are not paid. Watkins said Virginia Commonwealth University, Virginia Military Institute and Norfolk State College did not reply to letters sent out by the finance committee.

The study was deemed necessary because Watkins was not "all that familiar with the work scholarships we were using," said Watkins, who requested an interview with The Razzle "I decided we needed to find out how other schools were financing SGA positions."

A work scholarship pays students 85 percent of minimum wage. says the SGA president can be compensated for 30 hours because his salary is classified in the SGA constitution as the "equivalent" of a work scholarship. The salaries of Pile and other SGA executive council members are paid through the SGA's operating account.

Watkins plans to propose changing the way SGA officers are paid at tonight's meeting. He said seeing a jump sum for officers' salaries would be more in keeping with the current trend towards "open government." He said: "It's more open. It's more flat rate to have a set salary written into the SGA constitution having a salary 'hidden behind a work scholarship.' According to Watkins "There's no reason to have it that way." "The students really don't realize how much a person is being paid that way," he added.

Watkins will propose a salary scholarship of $600 for next year's president and $500 for each of the other executive council members. This year's executive council members, besides Pile, were paid the equivalent of 50 hours per week work scholarships.

These salaries would involve an increase, but not as much as an increase as under the present system, because of the federal government's plans to decrease minimum wage again in Jan. 1980, he said.

The proposal should be accepted wel by the senators. Watkins said: "I don't see any problem with it at all. Why wouldn't you support it?"

No comparisons were made between other students who are paid by work scholarships, such as workers with University Program Board and The Razzle and students in similar positions at other state institutions.

We were more interested in elected campus positions." Watkins said "It was very hard to compare UPR and The Razzle positions to other schools."

Watkins also plans to question the final draft of the SGA constitution at tonight's meeting. When the constitution was approved by the Senate it included a five hour increase in all executive council salaries, he said.

However, when the final draft was handed out recently, the five hour increases had been deleted.

Although his proposal would make all of the constitutional salaries red tape irrelevant. Watkins was not happy with the unannounced change. "That's kind of nasty. I don't know how they're getting away with that. They told us at the meeting it was the exact same constitution I don't understand it." he said.

Faculty Senate considers correspondence program

By TERRI CAVIN

The Faculty Senate voted Thursday to organize a committee to study the feasibility of starting a program of correspondence courses offered by James Madison University.

This motion was proposed by the Academic Policies Committee, which reported that there had been several requests to study the plan. It was also decided that the Faculty Senate Committee would look into the system of salary raises for faculty members.

"As state employees," one senator said, "we need to have more consideration from the state legislature."

The committee also will be looking into whether a quota system will be established for faculty obtaining tenure.

The Nominations and Elections Committee reported a list of faculty preferences for membership to committees and commissions. This list will be passed to IMU President Ronald Carrier to aid him in choosing the campus-wide committees.

Robert Atkins, Faculty Senate speaker. praised the Student Government Association and the student s of James Madison University. Atkins said that he was impressed with the SGA at the recent joint meeting of the IMU Student Senate and the SGA under the present system, because of the federal government's plans to increase minimum wage in Jan. 1980, he said.

The SGA is very reasonable and respectable organization," he said. In improving the intellectual environment on campus, the best spokespersons are the students. He said.

Watkins was not happy with the unannounced change. "That's kind of nasty. I don't know how they're getting away with that. They told us at the meeting it was the exact same constitution I don't understand it." he said.

Honor council conference:

'The have more student input into our system'

By MAUREEN RILEY

"Our honor system is best suited for our school," said a James Madison University honor council member after attending a two-day honor council conference with representatives from 19 other Virginia colleges and universities.

"We have a lot more student input into our system than most schools," said Kevin Rack, an honor council coordinator who attended the conference at William and Mary Feb 23 and 24.

"At Randolph Macon Women's College, for example, the honor council president serves as the investigator, prosecutor, jury and judge; she has all the control," Rack said. "That system wouldn't work for us because it's like a dictatorship."

The 19 schools represented at the conference included large schools like Virginia Polytechnic Institute and State University, middle-sized schools like JMU and small schools such as Hampton and Sydney.

"There is a phenomenal amount of difference in the honor systems of the schools just in Virginia," Rack said.

The most common factor about the honor systems is the penalties imposed on honor system violators, according to Rack. Virginia Tech, with seven penalties, has the largest number of sentences to impose on violators. The University of Virginia, Washington and Lee University, and Virginia Military Institute have simple sanction systems whereby a student is permanently dismissed from the university.

In between these two types of honor system penalties is JMU's honor system, which punishes violators by suspension for a minimum of one semester and a maximum of permanent suspension.

From comparing the schools' penalties, the council reached a consensus that permanent expulsion of the student wasn't beneficial to the student in an educative sense because it doesn't give him a chance to make a mistake and correct it," Rack said.

"We need one day to go over the constitution, code and to participate in communication exercises," Rack said.

A speech about the faculty and the honor system, cited some problems encountered in getting faculty cooperation with the honor system, Rack said. However, the problems cited didn't apply to the JMU faculty, he said.

Just in Virginia." Rack said.

Most of the other schools had more than one honor council representative at the conference, while JMU was represented by only one honor council representative. That wasn't a problem, Rack said. "The more people you have there, the better," he said.

"Our problem is that the faculty try to forgo the time and pressure involved in turning in a student for cheating. Unfortunately, the faculty will never work if the students are given lower grades instead of suspension," as punishment for violating the honor code, Rack said.

Information and ideas for a new honor system handbook here were other things Rack learned from the conference.

"The present constitution is too complicated for someone to pick up and read," he said. "It needs to provide a more personal approach to the honor system." Rack said.

The surveys were designed last fall by the student Health Center Advisory Committee, the SGA, and the office of the dean of students, and were partly the result of an SGA drive for creating a form of student evaluation and a complaint procedure of the Health Center.

"What we're trying to get out of the results is to extend visiting hours, since it was a unanimous response that noise from visitors did not disturb patients."

Workshop to help women pursue careers in science

By PATTI TULLY

A two day program to help women pursue careers in science-related fields will be held here March 31 and April 1.

The program set up in the form of informal workshops is aimed toward increasing the number of women in science positions, especially in non-traditional areas such as systems analysis, geophysical sciences, and marine biology, said Margaret Gordon, a biology professor and former teacher at Madison County High School.

"Studies made by the NCF have shown that women in science-related fields tend to underachieve," Gordon said.

"They choose less important roles like choosing to be a lab helper rather than a director," she said.

"We've set up these workshops hoping to support students in more important roles so they can be all that they're destined to be," she said.

Students who apply for the program may attend all the workshops or just a few that they're interested in, she said.

Among important activities planned for the first day of the program (March 31) is an address by Eleanor Bacon of the Federal Trade Commission, several small group interactions with women scientists, a planetarium show, in addition to a banquet and after-dinner speech by Dr. Dorothy Skinner, a senior research scientist at the Oak Ridge National Laboratory, and professor of biomedical sciences at the University of Tennessee.

In her address to an expected 300 women from James Madison University and six other local schools, Bacon will speak on "Science in Your Future: Facts and Figures." Small group interactions will allow students to speak on one-on-one basis with women scientists working in astronomy, marine biology, geology, and marine biology.

In her banquet speech, Skinner who spoke at a similar program on a UCLA will speak on "How can you be number nine? What can we expect in 1979?"

Offerings for the second day of the program (March 31) include a buddy system signup, a display of science career resources, a slide presentation on women working in science careers, three talks on pursuing a science career, small group "Interactions," a buffet lunch, a panel discussion on planning curriculum for the future.

The buddy system will allow students in science related fields to choose a woman mentor in her field to act as an advisor or helper to her.

Students also will be able to obtain a wide variety of free information on their fields, and available opportunities at the display of science career resources to be located in the lobby of Miller Hall all morning.

The slide presentation, titled "Women at Work," to be held at 9 a.m. Saturday, will feature women scientists talking about their work, the problems they encounter. In addition to giving advice to students, the women scientists include a biologist, chemist, medical doctor, psychologist, and lawyer specialist all from the valley area.

Students also can take advantage of three talks. One called "Assertiveness Training for Scientists," another on "Getting that Science Position," and a third, a panel discussion on "Family and Career-The Delicate Balance."

During small group interactions planned that day students will be able to talk with scientists in the areas of industrial chemistry, geology, systems analysis, economics, and marine biology.

The program will be held from 2-3 p.m., on "Science Curriculum Planning: The Years Ahead." Members of the panel are all from JMU and include Dr. Elizabeth Finlayson, in charge of student orientation and academic advising, Dr. John Davis, coordinator of pre-medical studies and Dr. William Ingham and Dr. Rose Mary Rammer, both representing the honors program.

Students interested in participating in the program, applications are posted on bulletin boards on campus, and are also available in Burress 209. Applications will be accepted through March 31.

Agent discusses need for health insurance

By TERESA CAYNEW

Health insurance is the most important coverage to have, said an insurance agent at a seminar here Wednesday.

Bill Toohey, an agent for Rockingham Mutual and a graduate of James Madison University, said that most people think that they have enough coverage. When they find out differently, it's too late to do anything about it, he said.

According to Toohey, "if health insurance is ever nationalized, we're in trouble." It costs more for the government to do something than it does for private business.

In discussing auto insurance, Toohey said that a Virginia driver has two alternatives.

Drivers can either buy insurance for their autos or they can pay an uninsured motorist fee. The uninsured motorist fee, which is not available without insurance, is about half that of the Toohey says, and all a driver is doing is paying for the right to drive.

Even though a driver pays the uninsured motorist fee, he is still liable for damages in the event of an accident, said Toohey.

The trend in auto insurance according to Toohey. Rates are influenced by inflation, rising auto costs, and liability suits against insurance companies, he said. It doesn't matter how bad a driver is, Toohey said, he can get auto insurance if he is willing to pay for it.

Toohey said that his agency gets a lot of student applications. "What most students don't realize, he said, is that their auto insurance has to be purchased wherever the car is titled." In other words, the insurance has to be bought in the student's hometown.

"Life insurance, Toohey said, consists of two kinds—temporary and permanent. "Temporary life insurance, he said, costs about one-fourth as much as permanent, but it runs out. A person can't get any of the money back, as he can with permanent life insurance."

Also, Toohey said, it is possible to borrow on a life insurance policy. "The premiums for life insurance are based on the person's age and sex. Women usually live longer than men so they pay lower premiums. Statistics have shown that the older a person is, the less likely he is to be able to pay."

**Gas**

**Gas prices vary among local stations**

By JULIE SUMMERS and HANF FITZPATRICK

The least expensive place to purchase regular self-service gas in Harrisonburg are Etna Service Station, Imperial Oil Company and Stop-In Food Market, according to a March 24 survey of the city’s service stations. Etna, Imperial and Stop-In all offer regular gasoline at 69.9 cents per gallon.

All three of the stations are within easy access for James Madison University students. Etna is located on E. Market (Highway 33 W.), Imperial on S. Main and Stop-In on S. Main next to JMU.

Prices varied throughout the city for full-service regular, full- and self-service unleaded and full- and self-service premium gas. Most station managers were hesitant to discuss their prices, saying only that gas prices will eventually reach $1.00 per gallon.

---

**Cake course offered**

A noncredit continuing education course in cake and pastry decorating will be offered by James Madison University beginning March 29.

The ten-week course will be held Wednesday nights from 7-9 p.m. in Gibbons Hall on the JMU campus. Classes will cover the techniques of bordering, icing, piping, and special effects in cake decorating, according to instructor Jim Williams, a graduate of the Wilton School of Cake Decorating.

The cost of the class is $37 and includes equipment and other materials. For additional information call 433-6163.

Punk rock comes to JMU

Punk rock came to a party at Spotswood Hall Friday night with the debut of "Debris.

The six member band played punk rock selections from The Sex Pistols, "Ramones," "Songy and Cher," "Rolling Stones," and Brian Ferry's version of "It's My Party.

"The crowd was definitely into it," said guitarist K.C. "Debris" other members are lead vocalist Jim White, guitarists Jack Graf, pianist Tom Robinson, drummer Drew Gardner, and bassist Mike High.

"The band played two sets and three encores. Most guests attending were dressed punk safety pins and ripped T-shirts."

"There were a number of people who said they thought it was the best party they'd ever been to. Many thought it was just incredible," said K.C.

"We played punk rock selections from "The Sex Pistols" and "Ramones." Band members from left to right are K.C. on guitar, Jim White on vocals, Drew Gardner on drums, Jack Graf on guitar, Mike High on bass, and our house piano Tom Robinson.

Photos by Lawrence Emerson
Godspell

Godspell will be performed March 26-March 31 in the Alumni Seeger Auditorium at 8 p.m. with a Saturday Matinee at 1:30 p.m. Tickets on sale March 19-29 at 9 a.m. - 3 p.m. Costs will be $5 per person and must buy your own beer.

Applications

Any student interested in being considered for a position on the University Judicial Council may obtain an application in Room 106, Alumnae Hall. Completed applications must be returned by 5 p.m. April 2.

Assessment Center

There will be a workshop on interviewing techniques for students working on papers, to improve their writing skills. 1-SAT or TOEFL and preparing to take the GRE. Individual help for students and $1 so for the event. Talk "walk-in" hours daily from 3:30-5 p.m. and 6-8 p.m. on Wednesday and Saturday. Sponsored by the American Association of University Professors.

Applications for the Spring of 1979 are now being accepted by the Alpha Sigma Tau. The National Honor Society for Women. Interested students may pick up applications for the position of Student Representative from the Dean of Academic Affairs beginning March 19. Deadline for return of application is April 2.

Job hunting

There will be a workshop on job hunting March 27, 11 a.m. in WUU Mezzanine Room A.

Free Tupperware Party

A Tupperware party will be held March 29, 7-9 p.m. in the Chandler first floor studio lounge. Orders will be taken that time. The event is sponsored by Phi Beta Lambda.

Senior portraits

Appointments for senior portraits can be made this week in the Alumnae office, WUU Room G-9. Signups are being held March 26-30, MWF 1-3 p.m. and Monday, 2-5 p.m. and TT, 6-8 p.m.

Birth control

For information about birth control, contact Rockingham Health Clinic at 431-1771.

Disaster Plan

The Counseling and Student Development Center has a "walk-in" program for students who need help with personal, academic or vocational concerns without making a prior appointment.

Sponsored by Phi Beta Lambda, the event is Monday, 1 and 3 p.m. It will leave from D-Hall at 1 and 3 p.m. and the Valley Mall, the bus support and use of the bus is $1.50 per lesson. Hours: 11 a.m. - 2 p.m. and TT, 6-8 p.m. on March 26-30. MWF WUU Room G-9. Signups are being held March 26-30, MWF 2-5 p.m. and TT, 6-8 p.m.

Chugging contest

Registration for the contest will be held in the Greek Office March 26-29, 9 a.m. - 3 p.m. Costs will be $5 per person and you must buy your own beer.

Applications

Any student interested in being considered for a position on the University Judicial Council may obtain an application in Room 106, Alumnae Hall. Completed applications must be returned by 5 p.m. April 2.

Wampler

The Folk Ensemble of Furman College will perform on March 28, 9 p.m. in Wampler Theatre. The program is based upon the folklore and music of the Southern Highlands. Sponsored by the American Studies Program at JMU... Admission is free.

Lecture

Dr. Lee Condon, Associate Professor of History, will lecture on "Lukacs, Camus, and the Russian Revolution." March 29, 4 p.m. in WUU Room B.

Recital

David Brandon Phillips, Assistant Professor of Piano at Radford College will give a piano recital in Wilson Auditorium March 29, at 8 p.m. The concert is sponsored by the Alpha Sigma Tau. Admission is $3 for the public and $2 for members of the Alpha Sigma Tau. Telephone 6659 for more information, contact Casey Shoult at 6691 or 6692.

Elections

SGA and Honor Council elections will be held April 3 from 4 a.m. - 7 p.m. in the WUU first floor lobby.

Interviewing

There will be a workshop on interviewing techniques March 29, 11 a.m. in WUU Mezzanine Room A.

Resume writing

There will be a workshop on resume writing March 29, 2 p.m. in WUU Mezzanine Room A.

PKP Dance

A dance will be held in coordination with the Annual Chugging Contest. Admission is 75 cents. Sponsored by Pi Kappa Phi Fraternity.

Dukettles

There will be a meeting of all people interested in trying out for the 1979-80 Dukettles on March 29, 4 p.m. in Godwin. Come dressed for practice. For more information, contact Casey Shoult at 6691 or 6692.

Spring is here!

Spring is here! Time to get your sports or imported car in shape for the fun months ahead. Have your owner's manuals. Make your car look its best! We have a large number of hard-to-get parts in stock for VW, Fiat, Datsun, Brit Leyland, Toyota, Saab, Volvo, Honda, and others. Call & see if we have what you need! Always a discount to students. Waterman & Chicago 433-2534.
Folk Ensemble presents international dances

'A benefit concert for the dance program'

By LESLIE BREFFKINS

After weeks of strenuous practice and careful planning, the JMU Folk Ensemble is now prepared to present their concert of international dances. The concert will be held on March 29-31 at 8 p.m. in Godwin Hall's Sinclair Gymnasium. It is a benefit concert for the dance program fund which provides money for dance scholarships and world travel.

The concert will feature dances taught to the ensemble by such specialists as James Morrison from England, Gretel Dunsing from Germany, and Avraham Goren from Israel. Dances from Hungary and Japan, as well as the United States, will also be performed. The concert is divided into suites, each suite including dances from each separate country.

The costumes have been researched by the members and directors of the ensemble. Some of the costumes are made up of a number of pieces, which Ed Howard, the Folk Ensemble's instructor, feels will cause problems when the dancers change their costumes and are often leading them to try out new ideas and designs.

'Students are kind of excited about what they see,' explained Howard, adding 'it kind of moves them to try out new ideas and designs.'

'The dancers have been rehearsing and planning since their last fall. They usually practice a total of three hours a week plus special 'outside' practices.'

'Most people (the dancers) are pretty committed,' said Howard. 'It takes a lot of changing takes practice,' explained Howard. 'Not only do the students make their own costumes, but they also choreograph and reconstruct different dances.'

'The growth of the ensemble when they come to the performances, which usually takes a total of three hours a week plus special 'outside' practices.'

'The costumes have been researched by the members and directors of the ensemble. Some of the costumes are made up of a number of pieces, which Ed Howard, the Folk Ensemble's instructor, feels will cause problems when the dancers change their costumes and are often leading them to try out new ideas and designs.'

'The growth of the ensemble when they come to the performances, which usually takes a total of three hours a week plus special 'outside' practices.'

'The growth of the ensemble when they come to the performances, which usually takes a total of three hours a week plus special 'outside' practices.'

For his music recital:

Jer Long sheds classical music, tuxedo

By MAUREEN BILLY

Some elements will be traditional: piano, a stage and a singer, but overall one thing Madison University student Jer Long's performance won't resemble a conventional music recital.

Long's voice instructor, told him he would give his recital in April. Most music majors don't give their recitals until their senior year. However, Long, a junior, is an exception because he is not a music major. "Mr. Choi thought I was ready for my recital now," Long said.

In preparation for the recital, "I've had to act as producer, costume and star all at the same time," Long said.

Involved in producing the recital was choosing the songs to sing. Long said, "Most of the time you don't get to do what you want to do. I am doing just what Mr. Choi thought my voice sounded best in." Long said, "so I can't really say the songs in the recital are my favorite.

Although his unusual recital features Broadway show tunes, Long likes all types of music. "I'd hate to see any kind of music go. They all have different styles and each should be appreciated for what it is," he said.

Jer Long... I can't sing unless I have a character

I feel like I could be more prepared. I wish I had more time to make it perfect," Long said about his recital.

With the performance a few days away, he is busy with his other activities. Jer Long... I can't sing unless I have a character.

OUTLAWS

"The Florida Guitar Army" earned their stripes here last Saturday night as the Outlaws made their debut appearance at James Madison University's Godwin Hall. The band, known for their emphasis on the lead guitar, ran through an hour and a half of their thirteen-song set, consisting of songs from each of their five albums, as well as a few unreleased tunes.

As with most Southern rock bands, the Outlaws and their opening act Molly Hatchet garnered loud applause from an expectedly rowdy audience.

For those who did not attend the Outlaws' show here, it was much better than their live album "Bring 'Em Back Alive" would indicate.

The guitars were crispier than on that record and, as a rule, the vocals followed suit. The lone exception to clear vocals were those of bass player Harvey Dalton Arnold. In his case, it was difficult to understand any words over the screaming guitars. Despite this, however, Arnold was clearly the choice of the fourteen-year-old groupies in the front row.

However there were plenty of other people beside the adolescent groupies who enjoyed the show.

It was perhaps one of the best choreographed rock concerts in JMU history.

Review by Cutch Armstrong
Gr Army earns their stripes

Till they clear of any wires. There were rings for the band to stand upon, and players played off moves well, which was only high much to the band, with a black featuring the "Playin' To Win" logo of Hughie and Billy James on a pudgy Freddie rhythm guitarist, see and cool Monty featuring the "Playin' To Win" logo.

Players, the Outlaws Not overproduced their LP "Playin' To Win" is, but with a meshed musical style not the Outlaws of years gone by. Gone were the cowboy hats (although there were enough in the audience to suffice) as well as their choice to display their patented Outlaws tattoos. But of nearly everyone there, the new Outlaws conveyed a feeling of slickness and a concentration on guitar oriented rock and roll (as opposed to acoustically twangy riffs).

As long as they don't go overboard with the textured songs, they will continue to prosper on the concert tour circuit.

Another band which has a very good chance for prosperity was the Outlaws' opening act Molly Hatchet, which works out of Jacksonville Florida is from the Lynyrd Skynyrd mold (like the Outlaws). Stressing the power of guitar, Molly Hatchet had problems getting their lead vocalist Danny Joe Brown to be heard. This was a severe problem since the band's biggest selling point to date is Brown's similarity in sound to Lynyrd Skynyrd's Ronnie Van Zant. If someone can harness the power which Molly Hatchet displays, they will be headlining by the time their next album is released.

Richmond dominates JMU

Spiders' tennis wins, 8-1

BY DENNIS SMITH

Richmond University outclassed James Madison University's men's tennis team 8-1 Sunday afternoon in Richmond. The spiders defeated the Dukes 64-6, 6-3. The Dukes' top-seeds of Ron Ayers and Steve Parsoni lost 6-3, 6-2 to the spiders' second-seeded team of Gary Stern and Richard Barracco. Richmond's Rich Burns and Drew Robinson easily handled JMU's second-seed team of John Witt and Chris Laybourne 6-4, 6-3.

The Spiders were never threatened in the singles match, with only one Duk pulled into a third set. Third-seed Mark Sned lost twenty-two breakers but is lousy at coach until three weeks before the 1976-77 season. Playing a conference school, a fantastic and hungry team, Richmond's Steve Snead took first in the 440 and was part of the 800 relay team that swept its event. Coach Kirk Randolph took the lead on the final turn and won away going.

The 800 relay team saw Bradscord win the opening leg in 2:0.3, Tracy McDonald was second in 2:0.9, and Mary Kay Semmens placed third in 2:0.7.

By DENNIS SMITH

Richmond University's men's tennis team 8-1 Sunday against JMU. The Dukes lost 6-4, 6-3.

Richmond's Rich Burns and Drew Robinson (above) handled JMU's second-seed team of John Witt and Chris Laybourne 6-4, 6-3.

“I expected the team to do better,” said JMU's coach. “Last time we played real well, and we just played really badly.”

The Dukes' top-seeds of Steve Gill and Mark Sned chalked up the team's only win against the spiders, unchallenged.

The Gill-Sned team downed Richmond's second-seeded team of Pete Beveridge and Steve Parsoni. The spiders' second-seeded team of Gary Stern and Richard Barracco won a close second set to hand the Dukes' Ed Barnhart and Gary Farnathy a 6-1, 7-6 loss.

Richmond's Rich Burns and Drew Robinson easily handled JMU's second-seed team of John Witt and Chris Laybourne 6-4, 6-3.

It's now Good-Bye to Dana Kirk

BY PAUL McPHERLAN

There aren't too many people that will miss Dana Kirk. Until last week, Kirk was the head basketball coach at Virginia Commonwealth University. One week ago, he accepted the head coaching job at Memphis State, except for those at VCU, there weren't too many basketball people trying to talk him out of going south. You see, Kirk is arrogant—a tremendous coach, yet arrogant. Many coaches and reporters simply don't like the man.

But there are few, however, who can question Kirk's coaching abilities, although some try. He is a fabulous on-the-court technician but is lousy at off-the-court tact. He did build a three-year record of 72-35, including two 20-win seasons and he didn't become VCU's head coach until three weeks before the 1976-77 season.

Kirk found himself in an uncomfortable position three years ago. Playing a makeshift team, Kirk guided the Rams to an unexpected 13-13 season. Then last season, starting three freshmen, VCU finished 24-5 (the first 20-win season in the school's history) and upset Georgetown University to win the Southern Division of the ECAC. VCU came within a two-point loss in St. Bonaventure to receiving a bid to the NCAA.

They did, however, play in the National Invitational Tournament that year only to lose in the first round to Detroit.

“Still, because of his arrogance, many schools avoid VCU when basketball season comes around. Virginia Tech is one school, and Tech officially reported, "As long as that man Kirk is coach, we won't play them." Unfortunately for Tech, though, Memphis State is a member of the Metro Conference as is Tech and all conference schools must play one another.

William and Mary coach Bruce Parkhill is another official that wants nothing to do with Kirk Parkhill around Kirk of keeping his starting team on the floor in the late 60's to defend a questionable game.

Yet another coach announced his displeasure with Kirk Randolph-Macon's Hal Nichols. Normally withdrew his team from the University of Richmond's Spider Classic when he learned VCU was named a round out the field. Normally said VCU was on the up score against the lower Division Yellow Jackets.

Even after his team's last-second shot to beat James Madison University Kirk displayed size of the chip on his shoulder.

“We were held back a little bit by some bad calls, and in the first half we didn't execute very well. You all didn't see our full club at its best, in other words.”

He was asked whether the JMU-VCU series had turned into a good rivalry, "It was that time, two of the three games of the series were won by one point on last-second shots by VCU.

“I think it's good for college basketball, but I wouldn't go as far as to say that it's a great rivalry, no. It's good to see full houses and three or four hundred or a thousand people waiting outside. It's a good situation." And then, with television lights blinding down on him and a dozen or so reporters hovering around yes, even in the panhandle. Kirk stepped over the cliff of confidence into the Gorge of Wickedness when he said about the game's precedent for the fans, good for state basketball—a little bit too close. I like to hit them 'game-winning shots' with eight seconds to go, not one.

It was the second year in a row Kirk was lucky enough to escape Godwin Hall—the second hardest place in the state to play by his own admission with a win.

When Kirk accepted the Memphis job, he said he would have been a former team by the time they didn't have a much for the following season.

"Our team is win we would be the first team if he decided to leave," VCU floor captain Edmund Shered held out in the Richmond Times-Dispatch.

Instead, the paper said, they had to hear about it via the media.

"That's what the players are upset about. Shered "They feel we can still to find out about it that way."

If for no other reason, basketball people, it's Good-Bye, Dana Kirk.

In other Virginia basketball developments, VCU has accepted a membership in the Sun Belt Conference. The Conference includes the University of Alabama-Birmingham, Georgia State, Jacksonville University, University of North Carolina-Charlotte University of New Orleans, University of South Alabama and the University of South Florida.

There's a possibility that Old Dominion will follow VCU to the Sun Belt Conference. According to the Richmond Times-Dispatch, Dana Kirk will not take his VCU team to Memphis with him, as is the practice when two school transfers schools.

Handball courts considered

The new recreational facility will not contain handball courts, but Godwin Hall may be expanded to include additional handball courts. President Ronald Carrier told the University Council Thursday.

Townes picked All-frosh

James Madison University's Linton Townes has been named an Honorable Mention selection to Basketball Weekly's 1978-79 All-Freshman Basketball team. Townes, a 6-foot-6 native of Covington, Va., averaged 11.6 points and 4.2 rebounds per game for the Dukes this season. He shot 56.3 percent from the floor and 74.3 percent from the free throw line. JMU finished the 1978-79 season with an 18-8 record.

JONPSY...Let's get our act
together once again...so get
wild and wooly. Lusty.
Pile's attack not unusual

Student Government Association President Darrell Pile spent a considerable amount of time at last week's SGA meeting blasting The Breeze.

He charged, among other things, that coverage was "inappropriate" and "distorted" and suggested that the SGA increase funds for Scooter's Nooze, the commuter newsletter, so students could have a "facts newsletter." Pile's outburst was not an isolated event. It was merely the climax of a year of deteriorating relations between The Breeze and the SGA.

Nor is this tense relationship between the student government and the campus newspaper confined to this year. Two years ago, the SGA, seeking to intimidate The Breeze, attempted to audit the paper and appointed one senator to the paper's executive committee because he was allegedly "out to screw The Breeze."

While the specific points may change from year to year, certain elements have remained constant. The Breeze and the SGA have opposed each other with increasing fervor, suppressing unfavorable reports. The press is interested in facts, regardless of how it reflects on those in power. Just as Pile has complained about student journalists not always being related to importance, enter into such reporting.

This conflict is exacerbated by the fact that at a university, one has a "play" government, but not a "play" newspaper. While students are active in student government as a sideline to their academic work, administrators working with the newspaper do so as an integral part of their academic program.

Unlike the SGA, The Breeze is not regarded as a "student activity," but rather as part of James Madison University's journalism program, one whose students have gone on to work for such papers as the Washington Star, Richmond Times-Dispatch, and Washington Post and countless others.

While the SGA leaders and The Breeze editors regard their roles on two different, and sometimes conflicting, levels. There is also a subtle conflict between the types of persons attracted to each group. SGA leaders are generally business or political science majors. They are people with an interest in terminal power and corporate structures. They are people who join fraternities and sororities and wear knit shirts and polyester slacks.

The Breeze is almost exclusively composed of communication arts majors who have been schooled in the media, literature and the arts. They think creatively instead of administratively. If they show an interest in politics, it's probably in terms of questioning "the system." Greeks are an anathema and they are rarely depicted as heroes in cartoons or T-shirts.

These basic philosophical differences underly any conflict between The Breeze and the SGA, and only serve to aggravate another problem: Student leaders, particularly Pile, have little respect for others. This is particularly true of students working with the newspaper.

The SGA often thinks, and Pile expressed this belief to The Breeze, that students working with the newspaper do so as an integral part of their academic program.

This is not unusual. It was merely the climax of a year of deteriorating relations between The Breeze and the SGA.

Before March 31, I viewed nearly every Dwayne Vance editorial with contempt and disdain. His "Seventeen Point Education Plan," along with frequent suggestions for turning James Madison University into a "Knowledge College," seemed ridiculous at best. But all this was before the revelation.

On the first day of spring, with temperatures reaching 70 degrees and the sun abnormally only by my mirror shades, I was horrified to see literally hundreds of students running, frisking, and frolicking on the quad.

This was when the administrative system occurred. This is a college I thought an institution of higher learning, not a playground.

As Vance pointed out, movies, Duke's Grill, and social organizations could probably not be considered educational. Therefore the educational belt must be tightened to the point of suffocation.

First, the concept of a roommate must be eliminated. Sharing a college dorm room with another person will only serve to distract from the educational process.

The new educational rooms, which will be designed exclusively for studying, will be single occupancy, 10 feet by 11 feet by 6 feet in size, and modestly decorated for a bed, desk and peeling plaster. Students will remain in school for 16 consecutive terms, with each year broken into three trimesters, and with each student required to carry a minimum of 33 hours a semester.

Courses like metaphysics, the science of thermonuclear energy, and English 101 will be mandatory the first year, with courses increasing in difficulty as the years progress. "Distorted" coverage will be cut out completely.

At this point, most readers must be shocked, at my seemingly total unconcern for any social activity.

Ah, but I am merely saving the best for last. Each Saturday evening at approximately 10 pm, students will be released from their dormitories and shuffled into the Dining Hall for a "Happy Hour." At which time, every person of age will be issued one beer and four pretzels.

Panic rock and roll music will be played while students relax and forget about their studies, and chitchat with friends. Not only for an hour. Then it's back to the books.

Granted, my suggestions do leave room for improvement. But with the help of Mr. Vance, I feel certain that education will be restored to IMU.

---

Pile protests the full page coverage devoted to a play written by arts majors who have been schooled in the media, literature and the arts. He also falsely equates a story's news value with the amount of space it receives. Visuals, such as photos, as well as story length, are also elements not always related to importance, enter into such considerations.

In light of these differences and misconceptions that Pile's charges, the SGA has been unable to understand why The Breeze is not a "play" newspaper, but not a "play" government. Governments seek to preserve the political status quo. The SGA is not interested in facts, regardless of how they reflect on those in power. Only the SGA, not The Breeze, has a "play" government, but not a "play" newspaper.
Pile ‘only talks of responsibility’

To the editor:

After reading and hearing accounts of Darrell Pile’s inept and irresponsible attack on The Breeze during Tuesday’s Student Government Association meeting, I have several comments to make.

Mr. Pile’s grandstanding antics give further credence to the adage coined long ago by those forced to deal with SGA: “You can make an SGA president out of a nice boy, but you can’t make a responsible man out of an SGA president.”

It was true for John Lambsby. It was true of Michael Anestos. Now Darrell Pile seems to have slipped into the mold.

Mr. Pile’s actions show that he is hot-headed and does not think before he leaps and that he probably should never have been elected SGA president.

He obviously has never taken the time to understand the workings of a newspaper or the consequences of trying to rewrite history. He has never learned what he ever spoke to The Breeze editor, before dropping “Darrell’s Pile” on the SGA senators and executive council.

Darrell was never misquoted in The Breeze. He has taken comments from a malady common to public officials.

Darrell can’t say what he means and he obviously doesn’t know the difference between what he says and what he means. Otherwise, he would have had the foresight to get up in front of a large group of people and say a statement by himself which The Breeze printed “was what I said—but it wasn’t what I meant”.

The former editor of The Breeze, Michael Hoffman, and other newspaper reporters and editors are quite spectacular human beings in addition to having many diverse talents. I am sure Mr. Anestos would agree.

However, I have yet to meet a newspaper reporter who has any perception of their work as a unique profession or as public service. Mr. Pile should remember who helped put him in the position he has enjoyed his job this way.

The Breeze office, following its editors and reporters.

And if that doesn’t work, I suggest he take two Communication Arts classes. The first is Introduction to Journalism (Comm. 285) and the second is Argumentation and Debate (Comm 225).

At least after taking these classes, he will know what a newspaper is for and why he can’t cut The Breeze off just because he doesn’t like its editorials. Also, if he still wishes to attack The Breeze, he will be able to do so without looking like an ignorant fool.

My final suggestion is that Mr. Pile keep his mouth shut and get back to the business of running the SGA in a responsible manner so that those of us in the business of reporting the news may get back to ours.

Being responsible is the most common trait that reporters take for granted.

Mr. Pile apparently only talks in out of Barbara research.

Editor’s note: Barch is a former member of The Breeze and a staff writer with the Daily News Record.

Pile ‘fooling his mind’

To the editor:

The infamous Darrell Pile has struck again.

Does the little revered Student Government Association president think he should ever market on the good press? Or better yet, should The Breeze hold newspaper articles so Darrell can have rebuttal time and not come out looking like a “do-nothing”? I’m sorry but the time has arrived for Pile to realize that the double doors to his office are for aesthetics, not for him to get his head through.

“An editor must coordinate all of the SGA functions and I am chief spokesperson for the student body,” Pile states.

The Breeze, Feb. 9. As such, you would think that Pile would show a little decorum in his public outlashes. Or, at least know what he’s talking about.

Pile cites an article about him in an example of inaccurate coverage. The Breeze “quoted him as saying if he had it all to do over again, he wouldn’t have run for president two years in a row.”

The Breeze, March 23.

It seems, would be to give Mr. Pile every political’s dream—his own personal press release, complete with sap. If you do expand Scooter’s Nooze, Darrell, what are students on campus going to read for campus news? The Washington Post?

I also find Mr. Pile’s change of heart amazing. When he ran for SGA president, he spent an inordinate amount of time and money to mislead us.

He has enjoyed his job this way.

Mr. Pile should not expect reporters to take for granted. The Breeze welcomes letters and editorials regarding issues relevant to James Madison University students, faculty and staff. All letters and editorials are subject to editing and must include the author’s name, address and telephone number, and must be typed. Unsigned letters and editorials should be addressed to the Editor in care of The Breeze, Wine-Price Building.
It takes more than a windy day...

Flying a kite can be quite tricky if your two-year-old daughter refuses to release the string
Or if your nine by six foot creation requires a hurricane to lift it off the ground
Or if your 75 foot Chinese dragon kite prefers trees to the open atmosphere

At least that's what the ten contestants in Friday's kite flying contest discovered as they tested their aerial skills with handmade and store-bought kites.

The contest on the quad was held in conjunction with last week's Fine Arts Festival. Prizes of $20 and $10 were given to the highest flying handmade and ready-made kites, and to the most beautiful and most original.

But getting to those prizes wasn't easy. First, the contest, originally scheduled for Monday, had to be postponed because of lack of wind. Then, the contestants had to conduct practice flights without destroying their kites for the final judging.

Some contestants, like sophomore Ed Hume, had to restructure their entries for the contest. Hume's first "flying burger" fell flat to high winds and he had to build another, complete with lettuce, tomato, mustard and ketchup.

Hume said he had built the traditional diamond kites as a child, but decided to try something different for the contest.

"I was hungry at the time," he said. "When I was thinking of designs, I was trying to think of anything that wouldn't get off the ground. I finally decided on a D-hall burger because they never get off the ground."

Even after adding a few styrofoam French fries to the burger's tail, the kite continued to dive from its temporary place in the sky. But Hume's imagination won him the $20 first prize for the most original kite.

A nine by six foot "abstract dragon" suffered a couple of disasters. The kites'创作者, William Ginn and Kay Highcomb, kept their airbrushed entry under constant repair, with Ginn finally accepting the prize with the creation rolled up under his arm.

Some dowels, tape, a plastic bag, a little bit of thread, and what was left of some cut-off jeans and one half of a t-shirt won Doug Evans, Steve Forest and George Landes the $20 prize for the highest flying handmade kite.

Determining the winner for the highest flying ready-made kite became difficult as two-year-old Toni Fitzgerald finally let her mother Merni, a 1976 graduate, control a white plastic bird kite well above tree tops. Students from the Pygmalion School in Stanton, however, provided stiff competition with a 40 foot striped dragon kite that soared several hundred feet in the air.

The judges—faculty members Dr. David Holdridge, Dr. Rebecca Hawkins, and Pam Johnson—finally awarded a tie to the two contestants.

At least one kite in the contest seemed more interested in topping trees than topping high flying records: a 75 foot dragon kite engineered by Andy Black and Candy Aucott spent most of its time traveling from one tree to another. Black took a light-hearted approach to the situation:

"For a nominal fee, I'll put anyone's kite in a tree."
