**MC Accepts Applicants As '65 Entering Class**

A statistical analysis of the entering class of 1965 illustrates the alarming increase in Virginia colleges and Madison College regimes. Of this number, a total of 1,000 were accepted and enrolled as the entering class of 1965. In the above are included transfer students from other colleges and Madison College entries.

One hundred and ninety-three students in the Freshman Class are from out-of-state: California, Connecticut, Delaware, Florida, Georgia, Indiana, Kentucky, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, North Carolina, Ohio, Oklahoma, Pennsylvania, South Carolina, Tennessee, West Virginia, Washington, D.C., England, France, and Peru. Those from cities and counties in Virginia are 272 and 468 respectively.

Three hundred and twenty-eight secondary schools are represented in the Class of '65. Of these, there are 47 Virginia city high schools, 121 and 12 private secondary schools are represented.

Students who ranked in the upper quartile of their high school graduating classes number 490. An additional 395 were in the second quartile. Those in the upper ten per cent of their class number 150. 40 incoming-freshmen were in the lower half of their secondary schools graduating classes.

MC has decided to study music. In the field of medicine, 55 students have enrolled in pre-medicine and 58 plan to become medical technologists.

**President Fulfills College Obligations As Leading Administrative Official**

Dr. G. Tyler Miller, President of Madison College has the responsibility as chief administrator of the school. He is elected by the state governing board and must operate the college in accordance with the board.

It is the main obligation of Dr. Miller to coordinate all of the activities of the institution with the assistance of the Dean of the College and other administrative officials and make sure that these activities abide by the laws of the Commonwealth of Virginia and the governing board. He must also organize the faculty into a working body, and with assistance of the Dean of the College and the Faculty Council he selects the members for standing faculty committees.

Other duties of the President are to provide over the faculty, appoint administrative officers and other staff members, prepare the bi-annual college budget with the Business Manager, and he also develops an effective public relations program.

**Diagram Shows Present Facilities, Plans For Proposed Development**

- Plans for the proposed development of Madison College, Harrisonburg, Virginia, include a new addition to the academic building, a new dormitory, and a new music and student affairs building.

- The new addition to the academic building will include classrooms, libraries, and administrative offices.

- The new dormitory will accommodate 100 additional students.

- The new music and student affairs building will include a concert hall, recital hall, and student lounge.

- The plans also include the construction of a new athletic complex, a new science building, and a new gymnasium.

- The proposed development will also include the expansion of the existing library and the construction of a new cafeteria.

Glad You’re Here

So you thought you would be on your own, huh? Well, New Student, by this point you have probably encountered President Miller, an assent of deans, both a curriculum advisor and chair, a dormitory hostess, student counselor and “Y” big sister. Their functions are akin neither to barbed wire nor to a truitch. You are on your own but the transition from family-oriented secondary school to a college-oriented university is necessarily a gradual one. Academic freedom is not an automatic bonus accompanying tuition payment.

New Student, you have come out of the ranks of non-star hockey player in high school, well, congratulations—but don’t expect past popularity to cut any ice at college; At Madison it is not so much who or what you were, as how you are. For perhaps the first time in your life, you will be forced to your feet to establish your image as an individual—your personal mannerisms, habits, personality, standards, rather than obtaining automatic acceptance based on family name, an older sister’s academic record, father’s employment, or other means of establishment in society not directly pertaining to you as an individual.

It is up to you, New Student, to decide whether the next nine months will be earned by new friends; grades comparable to your capabilities, productive, enjoyable activities, or just a plain miserable, homestick, rebellions mess. Everyone connected with Madison wants you to be happy here and since your expenses have been paid, why not get your money’s worth.

You are here, New Student, and we hope you are here to stay.

J. Emmett Keen, assistant professor of sociology, BA from the University of Michigan; MA from the University of Michigan; and PhD from the University of Chicago.

DEAN KENBERY

Directly responsible for the instruction program at Madison is Dr. J. Emmett Kenbery, Acting Dean of the College. Dr. Kenbery works in association with the Registrar, the Dean of Men, the Dean of Women, the Deans of the Colleges, the Directors of the various departments, the Heads of the various departments, the Dean of Students, the Dean of Faculty, and the faculty members of the faculty. He also serves as acting executive officer of the college in the absence of the President or at such times as the President may dictate.

Dr. Kenbery assists in all administrative matters and in the supervision of the instruction of curricula, of courses, of degree requirements, of faculty selection and supervision, of academic policies, of accreditation and evaluation, of any other general college problems in which he may be asked by the president to assist.

Among his many duties, Dr. Kenbery serves as the Director of Summer Session; as chairman and executive officer of the Student Government, of the Student Council, of the Committee on Curriculum and Instruction, and of the Administrative and Honor Committee; as a member of the Administrative Committee; as a member of the campus faculty; and as member of the Board of Trustees. He is the Director of the Foundation Library, the Foundation Library Foundation and is the campus representative for the Woodrow Wilson Foundation.

Dr. Kenbery received an A.B. from Bridgewater College, and his Master and Doctorate Degrees from Columbia University. He previously served as the director of the library at the University of Pennsylvania, and as head of the Mathematics Department.

DEAN GABER

Dean Gaber, assisted by A. L. V. 5. Garber, furnishes guidance services and supervises and directs student activities. He also is in charge of the orientation program, in the counseling of students with personal problems, and in the social, moral and spiritual development of Madison College students.

Dean Gaber is the official host to the college guests. He helps to plan and direct many college functions and campus organizations, and he is the chaplain for formal dances given by the college. He also supervises the various campus organizations at parties and social functions off campus and makes recommendations for the students and room assignments are made by Dean Gaber.

DEAN SHAFER

Dean Gaber holds an advisory position with the Student Government Council and with the Honor Council. She is also responsible for sponsoring the Student Government Committee, the Standards Committee, and the Alumnae Committee, the social life on campus. She also advises the Student Counselors who assist in the instruction and guidance of new students.

After an education in the public schools of Virginia, Dean Gaber earned a B.S. degree from Virginia State University. She completed her study of science at the University of Virginia, and Harvard University, and she studied guidance and personnel at Purdue University and at the University of Chicago.

Dean Gaber says to all students: “Make my office your own. For, I am anxious to know you personally.”

"Mama Ding" Keeps Track Of Alumnae

In these early days of the college, the train stations were major stops in Harrisonburg. Mrs. Dingleine remembers one of her first dates with her future husband being an errand to pick up a student at a train station. Mrs. Dingleine taught at Madison for one year during which time she was courted by and became engaged to one of the Madison professors, Raymond C. Dingleine, Sr. They were married in February, 1948.

Until 1940, the Dingledines lived across the street from the college campus. Mrs. Dingleine and her husband took the train to Harrisonburg each day to work at the college. During this time, Mrs. Dingleine became a member of the sorority and also became its sponsor. The next year she accepted the position of Alumnae Secretary, a responsibility that she still carries out today.

Previous Decade Finds Harrisonburg Scene Of Expansion, Development

Editor's Note: The following is one in a series on Virginia cities published in the Richmond newspaper.

By J. R. LINENWEVER

HARRISONBURG, August 20 (AP)—Harrisonburg, historically the "Fish of the Valley," has undergone a decade of growth unparalleled in the 10-year period ending last June.

The city's population, now estimated at 14,000, has shown a 30 per cent increase in the past 10 years. More than 700 housing units have been built. Apartment building in the period has broken all records.

The city has spent two million dollars in schools, and the school board is preparing for a 2.5-million-dollar senior high school.

In 10 years, the public works department has carried out a two-million-dollar streets program. In addition, 47,000,000 was spent in two urban renewal areas for a four-lane highway, cross streets and a second municipal parking lot which covers a block.

During the period, city council changed the 60-year-old municipal electric system, valued at four million dollars, to the Independent Electric Commission.

SAME TAX RATE

Although the city has taken great strides, city council has maintained a $2.50 tax rate on real estate, based on 40 per cent of actual value.

The bonded indebtedness of 45,400,000 is less than it was 10 years ago. The indebtedness has increased, however, with the issuance of two million dollars to sewer bonds.

This unparalleled growth has been attributed to a forward-looking approach by Harrisonburg's city government.

Mayor Frank C. Switzer, a retiring company executive who devotes full time to his office, says the bureaucratic approach has paid off handsomely in the past 10 years.

"ORDERLY PLAN"

"Our progress, which has reached the present recognition over the state, is attributed to a citizenly, orderly involvement in the growth and orderly development of our city," Switzer said.

"We have most informed members of city council, planning commission and other agencies who looked to the future. We have not usually large active citizen participation in all our planning and its execution."

Indicative of the city's long-range planning is a 20-year main streets plan, drafted after a three-year study by the state highway department. Council and the planning commission are studying the plan.

The first project in the plan, the four-laning of High St., which parallels Main St. in the business west side of town, has been approved by city council.

FOUR INDUSTRIES

Located on the giant Space Conservation Co., plant here is credited to the advance planning. Switzer thinks planning was a factor in the location of three other industries.

These are Walker Manufacturing Co., just south of the city, Imperial Container Co., and Young Metals Co. Each company has expanded its original plant, and together they employ more than 700 persons.

James, makers of plastic bottles, occupies a former textile building when the city made available in 1959 to any company seeking a location. The city's investment has been repaid.

Two urban renewal projects totaling 50 acres are being closed out by the developers who have been sold. The estimated project cost of $2 million, dollars was reduced to $3.7 million dollars as property is the

Booklet Explains Study Habits

One of the biggest problems faced by new college students, and one that has caused the most difficulty in the past, is that of making a good start with effective study methods. In order to help you make this start, we are having a booklet on how to study. How to Study, by Stanos, stocked in the Campus book store. All new students are required to obtain and study this booklet. It should be well worth your while and the dividends should be visible when mid-semesters marks come out. As a stimulus to help you go over the booklets right away, as a check of what is learned, a test will be given on it early in the semester. Further information will be given out at orientation meeting.

91 YEARS OF PROGRESS
Dear New Student:

The Women's Athletic Association (WAA) of Madison College, Madison, Wisconsin, would like to extend a hardy welcome to both you and your family. We hope that you will become familiar with the Association of which you are a member. Our purpose is to afford recreational opportunities for all women students and to develop a high degree of sportsmanship and interest in participating in healthful activities. With the Council's assistance and the able direction of the faculty advisors, the WAA strives to encourage and stimulate the students' participation and interest, good sportsmanship, and to cultivate a spirit of cooperation and fellowship.

We realize that time does not permit your participation in each activity but we hope that you will select the activities in which you would like to participate.

The WAA is one of your major organizations on campus and it is one with which you are closely associated. The success or failure of the WAA depends upon your support. We are looking forward to a fruitful and enjoyable year of association with each of you as members of the WAA of Madison College.

Sincerely,

Betsy Deutz
President
Women's Athletic Association

Bluestone

Dear New Students:

The BLUESTONE staff would like to welcome you to Madison. In order for you to become better acquainted with the college and its traditions, we invite you to visit the college library to glance through copies of the BLUESTONE, the college yearbook. Perhaps, you may even enjoy seeing how your new professor looked when he first came to Madison College.

In the 1966 BLUESTONE, we are attempting to capture not only the activities of the campus, but also the attitudes of the students. We are hoping to achieve this by changing the theme, reorganizing the layout, and by creating new designs.

We would like to extend an invitation to all interested Freshmen, as well as other students, to become working members of the BLUESTONE staff. No previous experience as a member of another publication staff is necessary.

If you cannot become a working member, perhaps, you can help by allowing us to use any pictures you may take throughout the year or by giving us any criticism which you may have of previous editions or present policies of the staff.

For the yearbook to be a success it must be a total effort by the student body as well as for the student body. Will your class take an active interest?

Sincerely,

Nancy Myers
Editor-in-Chief

BLUESTONE

Editor's Note:

During the year there will be several assemblies to which our professors will wear academic dress. The following is an article on the various parts of academic dress.

The history of Academic Dress dates far back into the early days of the oldest universities. A statute of 1321 required that all Doctors, Licentiates, and Bachelors of the University of Columbia (Italy) wear gowns.

Although the origin of academic dress is still a very obscure matter, most authorities believe that its sources are found chiefly in ecclesiastical rather than in civil dress.

Originally the hood was a Tippet, or shoulder covering, worn by Friars in the Middle Ages. It also served as a head covering. When caps came into fashion in the fifteenth century, hoods became ornamented and were draped over the shoulder and down the back. The cap was conferred first as a symbol of the Master's degree and varied greatly. Some were stiff, some soft, some square or round, with a tuft in the center. The hood today is an elaboration of the tuft. The "mortar board" style is from Oxford, but round and soft caps are also worn today at some universities.

The practice of wearing academic dress in this country dates from 1758 when King George II chartered King's College (now Columbia College) and transplanted to the Colonies many of the regulations of Oxford and Cambridge.

In time more sombre colors replaced the glaring red of the English universities. During most of the seventeenth century, American colleges and universities had no standard style of academic dress. Many faculty were grown from European universities where they received their degrees or gowns of local origin. Only a few wore hoods which often were assumed to be articles of ecclesiastical rather than academic dress.

It wasn't until 1831 that a commission of leading American educators adopted a code standardizing academic dress. The code is still in effect today although it was modified slightly in 1935 and 1960. The shape and size of the American hood marks the college degree of the wearer and under the system established by the code, it is possible at an academic convocation to distinguish at a glance the bachelor's, master's, and doctor's gowns.

The colors within the hood, lining it, are the colors of the university to which the degree was conferred. The hood around the hood denotes the academic field in which the degree was conferred. The Master's gown has sleeves split at the elbow. The Doctor's gown has a velvet panel around the neck and down the front of the gown and has full sleeves trimmed with velvet bands.

"Everything For The Student"

South Main at Bruce Street
Long Averages, Records Grades

(Continued from Page 4)

...the responsibility of Mrs. Pauline C. Long, Madison’s Registrar.

In the role of registrar, Mrs. Long plans registration procedures and keeps written records of the courses each student will take during a term.

It is she who receives the grades which the students have earned from these courses, records the grades on permanent records, and sends a copy of the grades to the student and his parents.

It is the registrar who computes the accumulative grades of the student and arrives at an over-all average grade for the student. From this accumulative average, she determines the academic standing of each student.

Students who do not meet the requirement of a "C" average are placed on academic probation. At the end of each year a list is compiled of students who are ineligible to return to the college unless they raise their scholastic average by attending summer school. A list is also compiled of those students who qualify for the Dean's List.

Mrs. Long transferred from Ferrum College to Madison, where she earned her B.S. degree in business administration. She has done graduate work toward a Master's degree.

Film Society Lists Schedule

The following foreign films have been scheduled for the first semester:

October 6 “Jules and Jim” (French).
November 4 “Two Daughters” (Indian).
December 1 “Play Boy of the Western World” (English).
January 6 “Ashes and Diamonds” (Polish).

Season tickets for $2.00 for all four films will be sold in the Post Office Lobby (Harrison Hall) on Wednesday, September 15. The films will be shown in Wilson Hall at 7:45 p.m. on the dates indicated.
