Computer to monitor campus energy usage

Outdoor temperatures measured to regulate indoor heating and cooling

By CINDY ELMORE

A central monitor system that will regulate energy usage, according to the university, is currently being installed at James Madison University.

The new operation will measure outdoor temperatures to regulate heating and cooling accordingly in individual buildings, Energy Conservation Engineer James Auckland said.

The computer also will be able to alert maintenance employees when any heating or cooling equipment breaks down, he said, adding that presently maintenance workers never know about broken equipment until they are notified.

According to Auckland, campus heating and cooling equipment is automatic; it cannot respond as quickly or efficiently as the computer system can, Auckland said.

THE COMPUTER conceivably can be programmed to operate heating or cooling in a building from 7 a.m. to 8 p.m. three days a week, from 8 a.m. to 10 p.m. two days a week, and completely off on weekends.

For academic buildings, the hours that heat or air conditioning is operated will be determined by what temperatures will comply with federal specifications, he added.

“We have problems now with balancing out temperatures,” Auckland said. “In some places, we have rooms too hot and in others, rooms too cold.”

The computer has been installed in the Maintenance Center located behind the Anthony Seeger Campus School, and the connecting lines are currently being placed underground all over campus.

All campus buildings except Spotwood, Gifford, and Wayland Halls will be included in the system, but Auckland said he hopes all buildings will be connected to the computer later.

ESTIMATES FROM A consulting firm in 1973 predicted a 10 percent savings in total electricity and fuel oil bills under the computer energy monitoring system.

Installations of the system, at JMU cost about $250,000 and was paid out of Virginia capital outlay funds.

Johnson Controls is installing the computer system, and completion is scheduled for January 1980. Duke Fine Arts Center, Cleveland, and Miller Halls should be connected by mid-December, Auckland said.

According to Auckland, fire alarms, warning security systems, and lights all can be connected to the computer for automatic monitoring at a future date.

“It’s not a complete system by any means,” he added. “The computer is designed for future capabilities.” Anticipated savings under the present system must be shown to state officials, before expansion funds can be requested.

Campus tension mounts during Iranian crisis

YAF petitions while frat hangs banner

Members of the Young Americans for Freedom (YAF) here are circulating a petition in support of President Carter and the United States government for the release of the American hostages being held by Iranian students in Tehran.

According to YAF State Chairman Chuck Cunningham, the petition will be circulated in the JMU community until Wednesday and will be sent to President Carter, members of Congress and “other appropriate leaders.”

Cunningham said YAF planned to distribute petitions in front of Gibbons Dining Hall and in the Warrent University Union, “provided we can find the manpower.”

The YAF petition calls for continued government use of “every honorable diplomatic means and every economic lever at its disposal to speed the safe release of illegally held American citizens.”

THE PETITION also calls upon U.S. government leaders to “utter no unmistakably clear” to the government of Iran that American hostages are being held and its people are prepared to make “whatever political or military sacrifice necessary” to uphold the honor of the United States.

Cunningham indicated that YAF had considered sponsoring a demonstration or rally here but didn’t want to be held responsible for potential damage. The university requires that a 48-hour notice be made of any planned demonstration or rally.

Cunningham called the present situation a “very emotional issue and said YAF would have held a protest rally and not an anti-Iranian rally.”

The group did not want to conduct a rally with flag burnings or violence, he said.

No Iranian students are enrolled at JMU for the first time in several years, according to Dr. William Jackameit, director of institutional research.

IN OTHER political action around the campus, some 40 JMU students, the majority of whom were members of Kappa Sigma fraternity, held an anti-Iran rally on Greek Row Wednesday.

“Stuff your oil. Stuff your wheat. We can walk, but you can’t eat,” the students chanted in front of banners and flags displayed on their fraternity house.

According to Don Costa, treasurer of Kappa Sigma, members have been upset by the incidents in Iran.

The members hung a banner across the fraternity house and an American flag from the second floor, Kerchaw said. Brothers, rushbooks, dates and others gathered outside and sang patriotic songs such as “America the Beautiful,” “God Bless America,” and “The Star-Spangled Banner.” They also recited the Pledge of Allegiance to the flag and chanted anti-Iranian chants.

We felt what’s going on over there was kind of ridiculous,” said Tom Barila, vice-president of the fraternity.

JMU post office may soon need to expand

In a typical day, 6,000 letters, 5,600 newspapers are processed

By LOUIS EACHO

"We've been able to grow into the current enrollment," Fear said. "but the crowded box space and long lines to buy stamps and pick up packages have proven to be inconvenient for students, according to post office manager, Mortimer Fear.

"Generally speaking, two students share a box, but sometimes three or four are in one box, for example, when seniors decide to remain in school after their designated graduation date," Fear said.

"It's really a wonder that some students get any mail at all..."

"It'd be my desire to expand our post office to the point where each student has his own box," while also providing for a larger work area for employees, he said. But no expansion plans have been discussed, he said.

Students seem to be getting more mail, mostly through advertisements, Fear said. "It's really a wonder that some students get any mail at all, since I usually pick up around 150 pieces of mail on the floor daily that's been shoved out of their boxes," he added.

"The addition of a 900 box post office in Chandler Hall in 1974 for Lake Complex students alleviated crowded conditions, but "most students would rather get their mail in the WUU since they're up here anyway and can't receive packages or buy stamps at Chandler," according to post office employee, Christina Meyers. Long lines at the window in the lobby to buy stamps, pick up or weigh packages is a problem "we can't solve, although we try to make the students' wait as short as possible," Fear said. It's not unusual to have waited on more than 200 people during a busy hour. Usually close to five thousand people each week, makes purchases totalling well over $5,000, he said.

"In a typical day the post office receives 6,600 letters, 5,600 newspapers; 5,400 packages; or other large pieces of mail and students and faculty members together receive about 280 packages a day," Fear said. This doesn't include an average of 6,000 pieces of campus mail received each day either, he said.

The eight full-time employees and 14 students who are all on financial aid work-study programs, receive most of the mail by 8:30 each morning, Fear said. Depending on how many workers are available, all of the students' mail is sorted and placed in their boxes by 10 to 11 a.m., he said.

Faculty and staff mail is sorted and sent out to the different departments twice a day, while another smaller shipment of mail is received around 5 p.m. and is placed in students' boxes usually by 10 to 10:30 p.m., Fear said.

"Even though it is a university post office, the post office still must adhere to the regulations set by the United States Postal Service," Fear said. For example, "we can't keep mail remaining here unopened for more than 10 days and, like any other post office, we can't give out addresses or box numbers due to the Virginia Privacy Act of 1976," he said.

Letters using the JMU zip code (23807), instead of the Harrisonburg zip code (23801) will also arrive at school quicker since they aren't sorted in the city post office, Fear said. Typing bulk amounts of campus mail together in bundles by box number sequence, and remembering to include a student's box number on all campus mail also greatly speeds up our sorting process, he said.

Correction

Several typographical and editing errors appeared in the article concerning the opening of executive committee meetings of the Student Government Association in The Breeze, Nov. 16.

The proposal to open the executive council meeting was made by Senator Mark Kline, not Jim Watkins as stated. Kline's statement should have read, "We're not challenging the honor of the council..." the word "not" was inadvertently omitted.

Dr. William Nelson is head of the Political Science department, not of the Political Science and Geography department as the Geography department is now separate from Political Science here. Nelson also did not speak with the Curriculum Instruction committee as the article stated, but spoke with the SGA senators at their meeting of the special studies course for the seniors.

The Breeze regrets any confusion these errors may have caused.

Feminism
The choice to do or be anything you want, panel says

By CINDY ELMORE

Defining feminism as the choice to do or be anything a man or woman wants was the general consensus of a panel discussion Thursday.

"Clearing a Path: Life Beyond the Stereotypes," was the topic for the panel discussion that was the final event of the "Women Shaping Tomorrow" week, sponsored at James Madison University by the Faculty Women's Caucus.

The panel consisted of Dr. Sidney Blund of the history department, Carol Nesslein, assistant director of the Career Planning and Placement office; Dr. Lynne Constantine of the English department and panel moderator; Dr. Lathan Camblin of the special education department; Dr. Steven Fairchild of the elementary education department; and Barbara Fox, library technical services librarian, also sat on the panel.

"To treat a woman as if she is meat on the hook is to degrade her," Constantine said. "It is important to say not being discriminate toward another sex, race, or religious group, or it may become a part of your life." he said.

Like women, men also face a stereotype because in becoming supporters of the feminist movement, they are labeled "fags" or "efeminates," just as women feminists are seen as masculine.

"A man's movement," like the feminist movement for women, has not been formed yet, Bland said. But the feminist movement has opened up fields for men as well as for women and has eliminated some stereotypes for both, he said, adding that the key is treating others like humans rather than stressing the differences between each sex.

FOX, who represents an age group where a woman

But the way the women's movement has developed and been publicized by the media makes people believe feminists are dramatic protesters who carry signs, she added.

Camblin broke out of the stereotype and became a feminist by realizing he did not like the way women were treated in society.

"You have to think about how to react to things," he said.

"For the first 40 years of my life, my career choice was dictated to me," she said. "I went to college thinking I would work two or three years, then get married and stay home. I did do this until my husband was no longer able to work. I found a whole new world. I had to face the fact that life was no longer laid out for me. Now I realize that so many choices were available to me back then."

"Changes in women's roles have contributed to the divorce rate, she added, because many men feel threatened by the feminist movement, and because women long have been considered more extensions of their husbands."

JMU's involvement in the feminist movement is "extremely conservative," Nesslein said. But feminism does not have to require overt behavior modifications. When the feminist movement developed at JMU, Nesslein said, "demonstrators" didn't let anyone open the door for me, plus I shook hands with everyone. But I wasn't uncomfortable. Now I've put it upon myself to say, this is what makes me feel comfortable." she said.

FAIRCHILD agreed that one can contribute to the feminist movement in a small way. He cited his teaching as an example. He was raised to accept people for what they were, and always thought that anyone could be anything he or she wanted to become, regardless of sex, Fairchild said. But for many persons, changes in roles have meant confusion about how to react in different situations. Fox said.

"Now, there are no rules. It's so hard to let go of those rules that made life as comfortable."

Taste the pride of Canada.
Molson.

You'll get a taste of nearly 200 years of brewing heritage every time you open a cool, crisp bottle of MOLSON GOLDEN.

North America's oldest brewery got its start back in 1786. John Molson, our founder, wouldn't recognize our modern breweries, but he'd be proud of the good, smooth taste of GOLDEN.

A taste that says Canada in every refreshing sip.
Library addition bids reopened after delay

By CINDY ELMORE

Bids for Phase One construction of the Madison Memorial Library addition were reopened last week after state officials did not accept the first bids, resulting in a two-month construction delay.

Construction divided into stages

Nielsen Construction Company of Harrisonburg entered the only bid Nov. 14. The first bids had been awarded in mid-September to Nielsen at $3,347,880, but since not been appropriated, but a $2.6 million allocation will be covered with the money available.

STATE AND university officials have not reviewed the second bids. Haban could not reveal the amount of Nielsen's bid or how the construction was broken down.

Original plans for Phase One of the library addition were to include the shell of the entire addition, renovation in the present building necessary to attach the addition, and an entire usable first floor.

But with the construction broken down into elements, all work originally proposed for Phase One may not be completed with available funds, which would push some parts into Phase Two construction. Phase Two was to complete the addition's basement and second floor.

Funding for Phase Two has not been appropriated, but a $2.6 million allocation will be covered with the money available. The Virginia General Assembly session begins in January.

"WE WERE TOLD TO go ahead and plan the whole project even though the architects know only Phase One would be authorized within the funds," Haban said. If lack of funds indicates that a large amount of Phase One construction must be pushed into Phase Two, the possibility exists that not all that was anticipated for the addition will be completed, Haban said, particularly the second floor. But so far, no deletions have been made in the plans.

According to Haban, as plans were formulated, the architects attempted to estimate what funds would be required for the project, but in this case, their estimates were too low.

University President Ronald Carrier has said Phase One construction can begin "very soon," and he is optimistic that Phase Two appropriations will be granted by the General Assembly, Haban said.

Classics 337 to discuss social policies and changes in 1980s

By DONNA SIZEMORE

If you are wondering what the future could hold for society, James Madison University is offering a new course that may spark your interest.

"Human Values: The Classical Tradition," will be offered next semester under the instruction of Dr. Robert Lisle, professor of classics at JMU.

"It's a course unlike any others presently being offered," Lisle said.

"The course will involve a discussion of those human values that ought to determine the political, social, and economic policies currently being made which will affect society in the next decade." Lisle added.

According to Lisle, the course developed as an outgrowth of a course he taught on the future.

HE STRESSED the fact that the course will not be concerned with a body of factual data. The purpose of the course is "to present the student with a body of ideas he can work with in thinking about the problems and future of American society."

There are two basic underlying questions in any discussion of human values, he said, "the image of man and what is the best way for man to live given certain assumptions."

The major emphasis of the course will be placed on a discussion of the present and future. Lisle concluded.

The course is titled "Classics 337" and will be taught on Tuesdays and Thursdays from 15-06-16-20.

You need great taste to wear this label.

We didn't just put a great name on our can, we put a great beer in it. Because for over a hundred years, the city of Milwaukee has meant the best-tasting, best-brewed beer in America.

And Old Milwaukee lives up to that tradition. So pick up some crisp, cold Old Milwaukee, the beer that's every bit as great as its name.
Dining hall surveys result in menu and cycle changes

By LANCE ROBERTS
The James Madison University Food Services Department is changing its current 20-day menu cycle in response to student surveys taken earlier this semester.

The Food Services Advisory Committee (FSAC) has tabulated approximately 20 percent of the 1,340 surveys returned by boarding students and turned them over to Hank Moody, the contract dining manager.

"We hope to complete the rest of the surveys by the end of the semester," said Mark Davidson, chairman of the FSAC.

Moody said the cycle will be converted to 28 days in order to have more popular items on the menu more often.

"The whole problem is we deal in such a large volume of food. Because we work six to ten weeks in advance, it could be two months before some things appear on the menu," Moody said.

ACCORDING to Moody, the 20-day-cycle was in response to student requests for more variety. The current cycle has increased variety 35 percent over last spring, Moody added.

"This year they (students) don't like variety. They want to eat more of the same thing more often," Moody said.

"The problem with variety is the more you have, the less of a chance you have to serve the same food."

"They want to eat more of the same thing more often"

Moody hopes to maintain variety and provide as many popular items on the menu as possible. He cited hamburgers and cheeseburgers as one example.

"We will offer hamburgers and cheeseburgers six times during the 28-day-cycle. Each time we will offer a less popular item, such as ham and cheese, but it will be a different item each time," Moody added.

"Ham quiche, which was almost dropped from the menu, will be offered only once during the 28-day-cycle."

One item that has been dropped from next semester's menu is the beef and green bean casserole. Moody said that beef and green bean casserole is not what students want.

"More than half of the 20 percent of students that were surveyed wanted BLT's more often. We will put BLT's on the menu three times during the 28-day-cycle," Moody said.

Moody regrets that some of the suggestions have not been tabulated so that portion of the student input will not be reflected in the beginning of next semester's menu. If the rest of the surveys are given to Moody by the beginning of spring semester 1980, some changes could be made through March and April.

NAME THAT ROOM!

Starting in January, there will be a new entertainment spot in Chandler Hall. The room will be based on the theme of a French Sidewalk Cafe. But the room needs a name with a logo.

If you are interested, send an entry to Box L-35, James Madison University Program Board by December 14.

There is a $25.00 prize for the winner, who will be announced in January.
Honor Council convention praised by representatives

By DONNA BIZEMORE

Students from universities and colleges across the state gathered at James Madison University this past weekend to participate in JMU’s first Honor Council convention.

The weekend of activities came to a culmination on Saturday afternoon as State Senator Nathan Miller closed the convention with a speech.

Representatives from about 10 institutions discussed problems with honor councils and ways of stimulating and making them better, according to Susan Hobbs, vice-president of JMU’s council.

Hobbs called the two-day convention a “sharing experience.”

Students who attended the convention were very impressed with the organization and activities.

“It was very informative and a good learning experience,” said Chris Cole, a representative from George Mason University. She added that the students from different schools exchanged a lot of good ideas.

“It was so stimulating,” said Val Schmalzried, a representative from Lynchburg College. “All the students are so involved in their schools.”

“We’ve been to other conventions, but we haven’t found as many schools that have similar honor codes as we have here,” said the Old Dominion University Honor Council chairman.

Kevin Rack, JMU Honor Council president, was the primary spark behind the convention’s organization, which he dubbed an overall success.

A host of activities were planned for the weekend, which opened with an address by Dr. Thomas Stanton, vice-president of academic affairs here. Stanton spoke on “Honor in the Academic Community.”

On Friday night, following dinner, round tables were held in Chandler Hall covering topics such as honor codes and judicial issues.

SATURDAY’S ACTIVITIES

began with breakfast. A series of programs were held throughout the morning on “Due Process and Student Rights,” headed by Dr. William Nelson of the political science department.

“Communication Topics on Leadership,” headed by Dr. Rex Fuller of the communication arts department and “Training, Honor Council Members,” headed by Kevin Rack, JMU Honor Council president.

A panel discussion was held prior to lunch on “Single Sanction.”

Moore presents paper on energy

Dr. H. Kent Moore, associate professor of physics and education at James Madison University, presented a paper recently at the national convention of the School Science and Mathematics Association in Kansas City, Mo.

Moore’s paper was titled “Energy Related Knowledge and Attitudes of College Age Students.”

Dr. Charles Rex Fuller of the communication arts department and Dr. H. Kent Moore, professor of education at JMU, also delivered a paper at the convention.

YOU’LL GET A LOT MORE OUT OF YOUR COLLEGE EDUCATION WHEN YOU GET INTO ARMY ROTC

The Art of Military Leadership-2 Credit Hours

Leadership Lab 0 Credit Hours

MISC220 001 1050-1140 TT G103 A
002 1340-1430 TT G103 A

MISC 901 1500-1700 Th G343

MISC 220 examines the dynamic leadership interaction model in depth. Students have the opportunity to get a closer look at themselves through self-testing. Small group leadership problems are examined, group life cycles are studied and the realities of the leadership are discussed. The problems and countermechanisms which result from organizational and bureaucratic systems are examined. MISC 220 is a leadership practicum. Basic Military Skills, such as rappelling, orienteering, and pistol and rifle marksmanship are taught, while applied leadership skills are examined and practiced. If you have questions, call 433-8684 or stop by Godwin Hall, Room 105.

Breeze survey

The community had answered the survey questions which appeared on the back page of The Breeze, Nov. 16. Your opinions are important, and we'd like to share them with the rest of the campus. Results of the survey will be published in a December issue of The Breeze—if we get enough responses, that is! So help us out!

COHOPE

COHOPE (The Community of Hope) is searching for the speechless. The private non-profit home and school for severely physically handicapped young adults has received a grant from the State Developmental Disabilities Unit to evaluate communication devices for non-vocal Virginians. The devices, including hand held machines that reproduce the human voice, will be displayed by their manufacturers at a conference next May 4. A consumers guide to communication devices will be sent to all non-vocal Virginians who request it. If you know of anyone who could benefit from communication devices, please write Community of Hope, Keezletown, VA 22832 or call (703)269-2131.

Writing Lab

The Writing lab offers individualized help to students preparing papers studying for essay exams, writing resumes, or preparing to take the GRE, LSAT, or GMAT. For an appointment, call Mrs. Hoskins at 6401, Monday through Friday 1:00-5:00 p.m. or stop by Sheldon 112.

Summer session

A tentative listing of classes for the 1980 Summer Session will be available in the Summer School Office, Wilson 107, on Friday, November 16.

Mental health

An open-form and panel discussion on the status of Mental Health Services of Virginia will be held on Wednesday, December 5th at 8:00 p.m. in the Emmanuel Episcopal Church on South Main Street. The meeting is open to all interested students and members of the community. Dr. Leo Krivin, Commissioner of the Department of Mental Health-Mental Retardation, Dr. Coen Plasberg, Director of Western State Hospital, and Dr. John Eagle, a local psychiatrist will serve as panel members for the open forum.

**JMU organizations aiding Big Brothers-Big Sisters**

**By Terri Maloney**

It costs $10,000 to $15,000 a year to keep a criminal in jail; it costs $250 to $300 to fund a child in the Big Brothers-Big Sisters program, said Debra Dvorscak. Dvorscak is the executive director of the Big Brothers-Big Sisters program of Harrisonburg-Rockingham County.

The objectives of the Big Brothers-Big Sisters program is to develop a child's self confidence and to provide a mature model for the child to follow. This is less expensive and more rewarding than allowing a child to grow up with little self-confidence and, as in many as 60 percent of the cases, become a criminal in jail, said Dvorscak.

Most of the children in the program, begun in this area in 1978, are from one-parent homes. In a few cases the child has both parents, but may have problems with alcoholism, long work hours or may not give the child enough attention.

There are 10 children in the program who have a parent in jail. The majority of the children are boys. About one-third of them are black, the rest are white. Most of the children are from low-income families.

Children are referred to Big Brothers-Big Sisters by various sources such as local social agencies, juvenile courts or by the children or parents themselves.

The child is then matched with a volunteer of the same sex. Presently, 70 of the 108 children in the program are matched.

There are a few qualifications that a volunteer must meet, said Dvorscak. The person must be 18 or older. He must have a genuine concern for the child and must be willing to spend at least three hours a week with his or her little brother or sister. Residents of the area are asked to commit themselves for at least a year. College students are asked to commit themselves for the length of the school year.

There are no special educational or training requirements. The volunteers go through a preliminary screening process to determine if they are qualified and to choose a little brother or sister to match them with. This period usually lasts for about three weeks.

"We turn away very few," said Dvorscak. Once a month the volunteers are contacted to make sure there are no problems.

Every six months the agency which referred the child is contacted. In about 75 percent of the cases some improvement is reported. Improvements include better schoolwork, less contacts with courts, and better relations between the child and his family.

Most of the 38 children waiting for a Big brother or sister are boys. This is because there are more boys without fathers.

Funds for this program are limited. The budget was cut back by $5,000 this year to $25,000.

The program gets its funds from the United Way, federal funding, and its own fundraising activities. This money is used to pay the salaries of the three paid workers in the program, for workshops, general office expenses, and for some of the group activities.

Students from JMU contribute to the program in other ways than being a big brother or sister. The SGA gives the program discount passes to movies and sporting events. They are allowed to use the facilities at Godwin free of charge.

Social services and other clubs also help out. Chris K, who sponsored a Halloween party, Phi Delta Chi took the unmatched children trick-or-treating.

Several fraternities and sororities pay dues to fund the program. Pi Delta Chi Circle X is sponsored a trip for the unmatched children to go to a movie and a sporting event. Others from the fraternity and sorority world help out too.

Improvements include better schoolwork, less contacts with courts, and better relations between the child and his family.

There are few qualifications for being a volunteer. They must be at least 18 years old and must have a genuine concern but no special training.

Short Takes

Old fossil
WASHINGTON (AP) - Scientists have found what are believed to be the oldest fossil footprints made by a direct ancestor of man, 11 million-year-old tracks along a lake shore in northern Kenya.

The seven footprints probably were made by Homo-erectus, whose evolutionary path leads straight to modern man, the National Science Foundation announced yesterday.

Scientists say the footprints appear to have been left by someone between 5 and 5.5 feet tall, weighing about 120 pounds. The individual apparently walked from a very wet, muddy area onto drier mud because some of the prints are larger than others.

The discovery was made in, U.S. news agency Tass reported, on the northeast shore of Lake Turkana, about 350 miles north of Nairobi. Three prints were uncovered in August 1978 while a trench was being dug and the rest last July.

Support
WASHINGTON (AP) - American Petroleum Institute is emphasizing its support for President Carter's decision to halt U.S. imports of Iranian oil.

The president has announced that he is acting to eliminate any suggestion that economic pressure can be taken that Iran has in the Iran situation, said Charles J. DiBona, API president. We want to assure the public that we want to show that President Carter is doing everything possible to implement it effectively.

Chinese star
PEKING (AP) - At 14 months, Yuang Ching is one of China's leading stars—not too surprising since she is China's first giant panda conceived through artificial insemination.

Besides being a central fixture at the Peking Zoo, Yuang Ching is a frequent celebrity on television and has her own house, adjacent to the cages housing the other giant pandas in the zoo.

Though she went on a two-day hunger strike seven months ago when separated from her mother, her appetite today is healthy and she weighs 90 pounds. Other zoos have been unable to get giant pandas to mate and are hoping to duplicate the technique that led to Yuang Ching's birth.

Marriage boom
MIAMI (AP)—Ever since the takeover of the U.S. embassy in Iran, there's been a sudden rush to marriage license bureaus in Florida by Iranian students wanting to marry American women.

And officials say at least one county in Alabama has experienced the same increase since the recent crackdown on illegal Iranian aliens announced by President Carter.

Officials did not directly say the increase was due to talk of deportation by federal officials.

But Joe McFadden, officer in charge of the Tampa Immigration and Naturalization Service office, says authorities are suspicious of the motives of the Iranians because many don't seem to know much about their fiancés. Immigration rules beat Cupid in making marriages, he said:

"We've probably had a dozen Iranians that have come in here in the past week or so and apply for marriage licenses," said Donna Ambrose, supervisor of the Dade County marriage license office. "It's been kind of strange—a majority don't act like they know each other very well.

A spot check with probate officials in Alabama indicates at least one county—Madison—has experienced more Iranian students applying for marriage licenses since federal authorities announced plans to check the visas of all Iranian students in this country.

"We've had about an average of one a day for the last week," said Chief Probate Clerk Mrs. Jimmie Brumam. She said five licenses were issued to Iranians this week and she expects more.

Americans married to foreign citizens may apply for permanent residency for their or her spouse, but it's up to federal officials to decide whether the marriage was arranged to help someone stay in the United States.

Two immigration inspectors visited the Dade County marriage license office Friday and copied down the names and addresses of the Iranians who have filed marriage applications since Carter's announcement Saturday.

McFadden said INS officials will look at recent marriages—"especially if they are bonafide—"a marriage where two people fall in love as opposed to doing a favor for someone or for money."

McFadden said INS officials will look at recent marriages—"especially if they are bonafide—"a marriage where two people fall in love as opposed to doing a favor for someone or for money."

Discovery
MOSCOW (AP)—Soviet scientists have discovered a non-corrodible iron on the surface of the moon and have produced the same kind of iron in experiments on the Soviet news agency Tass reported Saturday.

Tass said the discovery, made with moon surface samples returned by the Luna 16 moon probe in 1970, was registered this week at the Soviet Committee for Inventions and Discoveries.

Valery Barabash, director of the Soviet Institute of Geochemistry and Analytical Chemistry, said the non-oxidizing iron from the moon is produced by highly charged particles in the solar wind that sweeps the moon's surface. The particles remove oxygen from the iron, leaving pure metal, he told Tass, adding the element is reproduced on Earth in facilities that duplicate lunar conditions.

Refusal
CHICAGO (AP)—Some airlines refused to handle package mail between Chicago and Washington after the explosion of a small bomb on a flight between the two cities, Post Office officials say.

Post Office employee Nance Bremen said one of the airlines, which she refused to identify, returned mail Saturday. She said United Airlines, American Airlines, and Trans World Airlines refused to pick up packages.

The bomb exploded Thursday in an American Airlines jet during flight. No one was injured.

Thanksgiving fast
CAIRO, Egypt (AP)—President Anwar Sadat's wife, Jihan, was quoted in a newspaper Saturday as saying she will fast for three months as a thanksgiving gesture after Israel returns all of the Sinai to Egypt in 1982.

In a wide-ranging interview with the Al Ahram newspaper, Mrs. Sadat was quoted as saying she expected Arab anger at Egypt for signing a treaty with, "until to reach its peak when the two countries exchange diplomatic relations in February 1980.

But she predicted the tensions will eventually subside after that, because while Arab relations are deeper, stronger and bigger than any differences.

LUIGI'S
The playwright behind 'Pendragon'

By WES WILLOUGHBY

As the author of 'The Pendragon Institute' and cast member for 14 plays since he entered James Madison University, Phoebe Sutton has been highly lauded for his talents as both actor and writer. Such extreme popularity, of course, can endanger anybody's sense of security.

"One thing I've discovered is that I'm pretty successful here. Objectively, I know that, but the more successful I become, the less secure I feel. The assurance makes me appear more ambitious than he is," Sutton says thoughtfully, choosing his words with care.

"But I don't think you should do something if you're not going to do it. If you're not going to do it, you can always write it—even if no one is going to publish you.

"You can't act if you don't get cast in something. Well, you can try, but it's too odd—Shakespeare in your room late at night—but it's not the same.

Sutton's level of self-assurance makes him appear to be less ambitious than he really is. He grins at that thought.

"Well, I don't like to fool myself. I'll try, but there are lots of people out there who are just as good as me or better. New York City has more unemployed actors than there are people in Harrisonburg.

While studying at JMU, Sutton has been very busy, although he is not quick to admit it. He completed roles in more than a dozen plays within three years, as well as directing one, writing two plays and two screenplays.

"It takes up a lot of time. Acting alone could take over your life. You tend to concern yourself a lot more with people's opinions than you ought to, I think.

"When you're acting, everything you do depends on what the audience thinks of you—other people's impressions of you—to the point where it's no good. It's just the basic thing about being—you have to be doing and playing for other people.

"And it's a great high, mostly, one of the best in the world. But when the show's going badly, of course, it gets pretty hideous." He smiles expansively at this.

"But all that could be a little dangerous. You could get carried away. It's always carrying over into your real life, if there is such a thing.

"That's never been any problem for me, because most of the characters I've played I've found in me. At least, that's the only way I think an actor could play a role—find something in himself that's like that.

A short comparison between Sutton's Hal in the recent main stage production of "Henry IV" and his Taulard, a dragon from "Pendragon," leads to a visualization consistent with Sutton's nonchalance, an easily recognizable style that has become his trademark.

"Well, I'm not saying they're all alike, at least they're not," Sutton explains. "But I did Hal in a way that someone else wouldn't. Physically, I can't play him as being strong and powerful. I'm not as big and imposing as any of the other people on stage, so I had to bring out some of his consuming aspects to compensate.

Sutton goes on to discuss his internal approach to acting.

"Even when you're playing the villain, you have to believe it. You can't try to be an actor, you have to be doing and playing for other people."

"If you can do that sort of thing right, then you're good," Sutton proclaims. "But kind of avoided that in 'Pendragon' by just breaking it up into different scenes.

"With prose, you can get into the character's mind a lot more; you can say what he's thinking and feeling, which you can't do in a play. Plays are more about what happens.

"The main difference between prose and playwriting is that you don't finish a play. You must leave variables, because you don't know how it's going to be played. The lines are going to be totally changed from what you intended by the way someone says them.

"That's the soul of the whole thing. If you want what you've written to be said the same way every time, then it's not a play. Plays have to be able to change.

As a play, 'The Pendragon Institute' went through just such changes. Sutton had to visualize the action while writing it—action that changed as it was translated from ink on paper to three-dimensional realism on stage.

By no means was the production of Sutton's own work the culmination of all that Sutton has done or will do literally, or dramatically, at JMU. Sutton is a maverick, but waits until he can determine his course before he chooses to roam. He will probably do more work on campus stages before he graduates, but only opportunistically will determine what nature those accomplishments will take in the future.
THE BREEZE, Tuesday, November 20, 1979, Page 11

Frustrating jazz

By MARK SUTTON
James Madison University was treated to some excellent big band jazz as bands from JMU and Virginia Tech performed Friday night at Wilson Hall.

The concert, however, was plagued by a horrendous sound mix throughout both sets. Horns would leap out at the listener like angry gods on the warpath, while any electric instrument was barely audible. While there was a keyboardist, and he appeared to be working at his instrument, there was rarely a piano note to be heard, except during solos. The upright bass, when used, came through stronger than the electric one.

The JMU band opened their set with "Rundown," which dimmed that—run down the entire instrumental lineup and gave most of the musicians a chance to solo. They did, with numbing regularity.

"Meet Freddie Fender," which followed, drew many giggles from the audience for its title, but its musical content drew applause. On this selection, the JMU group displayed an apparent roughness in transition between solo and ensemble playing.

This was an example of theism of professionalism displayed by both bands. There was a tendency to drag between songs as the band members switched instruments and groped for the correct bars.

The third selection, "Busta," featured competent solos by Tim Striegel on trombone and Howie Smith on flute. But here the band lagged in getting the song underway, a problem that plagued the show throughout its length.

THE JMU band plays real rock

By MICHAEL SHUTTY
The Michael Guthrie Band made no pretenses as to what they were going to deliver. "We're in this in case—very effective. We're not at all into rock and roll. There's good rock and roll on Saturday night.

With that blunt introduction, the lead guitarist struck a sustained chord casting the Center Attic into the rocklessness of the middle 60s.

The rock scenario was complete to the finest detail—one guitar, dressed in a bizzling stack of tweed Marshalls, a drummer garbed in a British flag, and a long-haired bassist plucking a vintage '62 Fender Precision. The music was powerful, loud, and distorted—sparked with occasional escapes of feedback and ear-splitting shrieks. There was no compromise, only straight rock in all its purity.

This FRESHNESS emerged throughout every rocker from bashing power chords, a la Townsend, in such Who classics as "Mooning the Townshend," to a forceful rendition of "The Beatles" signature theme, based on the Tech fight song, was one of the first selections, "I Can See For Miles," a Smither's Friday night Center Attic performance. It was worth the effort.

On the other hand, two James Madison University students who opened for Smither deserve the utmost praise for an outstanding, but unfortunately short performance.

Ron Gentry and Eric Veterick played for only half an hour and managed to squeeze in only five original Gentry tunes.

These five, however, were poetic and combustible, and combined with lyrics and upbeat in their melodic structure.

GENTRY displayed the wailing emotion of his vocals during the very first number, "Down on the Corner," and continued to get across to the audience that each song was in a private world.

One selection in particular, "Mooning the Sun," was an awkward passage of typical excursion to Reddish Knob, and anyone who has visited the Knob could identify with Gentry's lyrics:

"When the cans are empty and the roaches are done
We pull down our bluejeans and moose the sun.

Gutherford's acoustic guitar was complemented by Veterick's fine electric guitar work. An odd combination, but in this case, very effective.

During "Then to Cambridge You Must Go," Gentry opened with a sustained chord that gave the Center Attic into the rocklessness of the middle 60s. The song had a blues feel to it, with horns that sounded alternately like those from the Pink Panther films and those from every spy thriller ever produced.

The JMU band closed its set with Chick Corea's "Spain," which, like the rest of the set, well received by the crowd. The JMU Jazz Ensemble's set lasted 45 minutes.

The VPI band was plagued by the same problems with the music, but the JMU band labored. Their signature theme, based on the Tech fight song, was followed by such numbers as "Sister Sadie" and "Let's Eat Cactus."

Essentially, the performances of the two bands were identical, save for the repertoire. Both bands displayed technical proficiency but little in the way of inspiration. That, coupled with a lack of professionalism, made the show something of a frustrating experience.

'Bridge Expressions'

"Bridge Expressions," a one-man art show featuring the work of Betty Holden, is currently showing in Artworks Gallery.

Artworks is located in Zirkle House. The show runs until Nov. 30.

Holden, who made some of the exhibits especially for the show, said some of her paintings were done so recently they were still wet when they were made.

Most of the paintings in the show are part of Holden's senior honors project dealing with motion, color, and depth in paintings. Holden used bright colors and diagonal brush strokes to give the paintings a feeling of motion.

Holden's SAID she has been experimenting with the paintings for her project and they have gotten progressively bigger and more abstract. She has plans to make a 6 x 8 foot painting as part of her project soon.

This is Holden's third show this semester. She had work in the watercolor and paperworks show, and in the Kappa Pi, honorary art society show where she was president of Kappa Pi. This is her first one-man show.
Local turkeys dread the day that made them famous

By THERESA BEALE

Cattle farmer Mike Arbogast had "hardly even seen a turkey" when he decided to begin raising the birds 25 years ago.

Now he can't get away from them.

Some 50,000 turkeys occupy Arbogast's farms in Lacey Springs every day of the year, and although Arbogast still has 400 head of cattle, turkeys have become his mainstay.

Gobblers mean big profits for many farmers like Arbogast in the Harrisonburg-Rockingham County area, known as the "Turkey Capital of the World." Seventy percent of Virginia's turkeys are raised here.

LOCAL FOLKLORE

Local tradition lauds the turkey, saying "Turkeys have a social order. The strong ones will weed out the weak ones and peck each other." But even if the birds are hardy, raising them in environmentally-controlled houses is easier than chasing them around in rainstorms, Arbogast said. Twelve years ago Arbogast built his first turkey house, and he now places most of his gobblers there.

Everything is automatic in the houses where several thousand turkeys share the same quarters. Feedings and water are systematically supplied. But Arbogast has to check on his poultry two or three times a day because birds outdoors. The gobblers because they tend to gobble.

Even the way most turkeys are raised now—in environmentally-controlled houses rather than outdoors—can be attributed to the late Charles Wampler, a farmer in Dayton.

In the 1920s, Wampler experimented with hatching turkeys by incubator and raising them in artificially-controlled environments. His experiments were so successful that he resigned his job as county agent and started a feed company. County farmers had contracts with Wampler in which he would hatch the turkeys in incubators and the farmers would raise them to maturity.

Wampler is now regarded as "the Father of the Modern Turkey Industry."

Although most area farmers have followed Wampler's discoveries by contracting their turkeys with local food companies and raising them indoors, Mike Arbogast has combined traditional turkey farming with modern innovations.

TRADITION CONTINUES

He raises one-quarter of his turkeys "on the range," or out in the open field as did his ancestors in the business. But most of Arbogast's turkeys are foreigner, that is, they are raised in from Canada when they are only one day old. When the birds reach Arbogast's farms about 10 miles north of Harrisonburg, they are nurtured with plenty of warmth, feed and water for eight weeks. Then they are placed either in or another house or out on the range.

Arbogast has tried both methods of turkey farming. When he began raising turkeys in 1955, he had 2,000 birds outdoors. The gobblers were easy targets for predators, disease and storm. A couple thousand turkeys died when Arbogast tried raising them with hogs, which turned out to be natural disease carriers. Some 8,000 birds died during a storm a few years ago.

"But they made it through that 10-inch snowstorm we had this year. How they survived I'll never know, but only a few died," he said. "A turkey, when he's born, is the weakest thing alive, but when he's big, he's tough."

But even if the birds are hardy, raising them in environmentally-controlled houses is easier than chasing them around in rainstorms, Arbogast said. Twelve years ago Arbogast built his first turkey house, and he now places most of his gobblers there.

Everything is automatic in the houses where several thousand turkeys share the same quarters. Feedings and water are systematically supplied. But Arbogast has to check on his poultry two or three times a day because otherwise they won't bother eating.

TO THE MARKET...

Daring disease and social disorders, Arbogast keeps most of his turkeys 11 weeks and his hens 17 weeks. Some breeder hens are kept for two to five years and their eggs are taken to a local hatchery to be hatched.

But all other turkeys hit the market at an early age. The market for turkeys fluctuates each year, but this year seems to be a good one, Arbogast said.

"It used to cost me 20 cents a pound to produce a turkey; now it costs 35 cents. We're breaking even," he said. Arbogast's Toms bring 46 cents a pound, while hens bring 30 cents.

Last Thursday, 10,000 to 12,000 turkeys left Arbogast's farm for their inevitable fate. Some younger Toms are now maturing in one of the farm's huge houses. And next month another group will be shipped in from Canada. But they're all headed for same destination—someone's dining room table.

The turkey may be tough but even he can't win all the time.

SILLY BIRDS

"When they're young, you have to put a pen around the stove to get them around the heat and you have to be there. But when they're older, you can dump them in the oven and they'll eat," he said with a laugh.

Even when the turkeys mature, they panic easily. Outdoors, the birds get frightened during storms or when a plane flies over. They panic and puke. The same thing can happen in a house.

"The other day, about 200 poked up in a house when the machine was spreading litter," Arbogast said. "You get in there and throw away whatever you can. But they're still still alive. And when you hit the bottom, they start acting under there.

"Arbogast has to clear out the 25 to 30 turkeys that die each day without incident or from disease. He also has to keep an eye on the gobblers because they tend to peck each other.

"Turkeys have a social order. The strong ones will weed out the weak ones and peck each other."

Arbogast keeps the "pecked" turkeys together because they won't bother eating.

MOST TURKEY FARMING has moved indoors during the past 10 years, but Mike Arbogast, left, of Lacey Springs, still raises 25 percent of his birds "on the range." The remainder of his flock, however, mature in the artificial environment of turkey houses.

"Revolution." The Michael Guthrie Band clearly showed that such timely pieces can be more than just resurrected from the dusty archives of the British rock invasion—infact, this surging trio injected new life into the very rock which pioneered all that followed in its wake.

Thursday night's crowd reacted to this rock arena with gut-level excitement. By the end of the third exhaustive set, they were standing on their feet chanting for more. Michael Guthrie remarked to them, "Students have turned into 'mad men'!

"We don't have no trouble playing in the Wa vein," bassist Mike McNally explained. "We are it."

Having formed in Germany in late '64, the band's present musical impetus becomes clear. "In those early years, we were just fooling around trying to figure out what was going on with the instrument. We didn't know, hardly anyone else did either," McNally added.

The Guthrie musicians were in their early teens at the time. "The guitar was just coming of age then," he reflected. "It was a good time to start."

IN DESCRIBING a time when Page and Beck were still in the shadows, Michael Guthrie described the musical experiments, as emphasizing "originality and energy. This was the order of the day," he continued. "It was very hopped-up, it was the rise of the youth culture as we know it today.

"In the music of '69-70, bands were recording songs they were really into, that crowds would go wild over—it wasn't something that was precalculated." In describing contemporary rock music Guthrie explained, "current bands—bassists are just playing notes, you know your management is able to put out two million dollars in promo and then it is a hit. It doesn't matter if it's just a record of them playing a guitar upside down—"it really doesn't matter."

"For Michael Guthrie it does matter."

The band members have promoted this spirit throughout their career—having been raised in the genesis of rock, they intend to preserve it. "I look to the past for my inspiration," McNally said.

The group has released an LP and plans to record another next year between many road trips. The name of the game is "fun," and for Michael Guthrie Band, this means rock.

E. Kent. wins JMU Tournament

Colonels drop JMU in final game, 55-48

By DENNIS SMITH

Eastern Kentucky University women's basketball team took the lead five minutes into the second half of the James Madison University Tip Off Tournament final and never trailed again Saturday night to beat the Duchesses, 55-48.

The Duchesses rallied to beat West Virginia, 69-61, and the Colonels beat North Carolina, 62-59, in the opening round of the tournament. The Tar Heels dominated the Mountaineers, 96-56, in the consolation game for third place.

EKU's Sandy Grieb was named the tournament's most valuable player. She joined teammate Sandra Mokes on the all-tournament team, while JMU's Kathy Railey and Anne Sonoga also placed on the team. North Carolina's Berni McClure completed the team.

Rita Taylor hit a jumper with 15:02 remaining in the game to give the Colonels their first lead of the game, 27-25. A minute later, Sonoga tied the score at 27-27.

After three more ties, EKU's Loretta Coughlin hit a jumper to put the Colonels in front for good, 37-35 with 5:36 left. Sue Carroll hit a jumper and Taylor struck again to expand the margin to six points.

Railey and Sonoga named to all-tournament team

THE DUCHESSES CHALLENGED the Colonels two minutes later by cutting the lead to two points with a basket and two free throws from Karen Turner and a jumper by Railey. But, EKU fought back and reeled off three consecutive baskets to open an eight-point margin.

JMU never seriously threatened again. EKU took a slight advantage in the first half, holding leads of six to two points from the outset. Only twice did the Colonels take the lead, both times by two points. The Duchesses led at halftime 21-17.

The Duchesses outshot the Colonels from the floor 31 to 25.9 percent in the first half. But, Eastern Kentucky had no trouble gaining the lead behind a blazing offense that hit 51.4 percent on 19 of 37 shots during the second half.

Grieb was the top score for the Colonels with 14 points on seven of 14 shots from the floor. Mokes and Carroll added eight each for EKU.

Sonoga topped the Duchesses's scorers with 20 points on nine of 15 from the floor and two for two from the charity stripe. Railey also hit for 11. But only two other players scored for JMU.

JMU'S ANNE SONOGA goes for a steal against West Virginia's Cindy Winegar in the Duchesses's opening-round JMU Tip-Off Tournament win over E. Kent., wins JMU Tournament

By DAVID PARKER

"Navy dominated the game. They took more shots and they outplayed us. We had our opportunities but we didn't score. We didn't play our best," said Midfielder Jeff Hill.

Midfielder Jeff Hill spoke quietly after his team's loss, which saw the Navy Academic in which Navy won 1-4, at Navy. His teammates could only agree.

Navy's Dwight Diorio rebounded a shot that caromed off the Dukes' goalie Jim Edwards, and fired the game only goal into an open net from five yards out, with 10:12 left.

The win put Navy at 10-2-4 in ECAC soccer playoff survival, that's all it is." He added, "We'd have to play our best." Captain Mark Bost commented Captain Mark Bost, "We'd have to play our very best to be with these teams. We just can't compete with the scholarship teams." Senior Midfielder Eric Johnson agreed with his teammates. "Navy played better as a team. They won every 50-50 ball. They played with more intensity and really wanted to win."

"It's just survival, that's all it is."

The Duchesses outshot the Colonels from the floor 31 to 25.9 percent in the first half. But, Eastern Kentucky had no trouble gaining the lead behind a blazing offense that hit 51.4 percent on 19 of 37 shots during the second half.

The game was close for the first 15 minutes before West Virginia took a seven-point halftime lead. The Mountaineers continued dominating play in the second half and the Duchesses never seriously threatened again.

The Colonels lost to a better team. EKU's Sandy Grieb was named the tournament's most valuable player. She joined teammate Sandra Mokes on the all-tournament team, while JMU's Kathy Railey and Anne Sonoga also placed on the team. North Carolina's Berni McClure completed the team.

Rita Taylor hit a jumper with 15:02 remaining in the game to give the Colonels their first lead of the game, 27-25. A minute later, Sonoga tied the score at 27-27.

Sonoga topped the Duchesses's scorers with 20 points on nine of 15 from the floor and two for two from the charity stripe. Railey also hit for 11. But only two other players scored for JMU.

THE DUCHESSES rallied from a 10-point deficit in second-half Friday night to defeat West Virginia, 69-61, in the opening round.

JMU trailed, 43-53, with 14:04 left but outscored the Mountaineers, 18-2, in the final seven minutes to take a 51-45 lead. Cathy Railey's 10 points during sparked the comeback.

West Virginia got no closer than eight points the rest of the way. Railey finished with 27 points on 12 of 16 shooting from the floor and three of four from the free throw line. She also had eight rebounds.

Sonoga added 16 points and Kathy Hannahan had 12 for JMU. Hannahan led the Duchesses in rebounding with 10 and in assists with seven.

The game was close for the first 15 minutes before West Virginia took a seven-point halftime lead. The Mountaineers continued dominating play in the second half and the Duchesses never seriously threatened again.

Cathy Parsons scored 15 points for West Virginia, who plays North Carolina in the tournament's consolation game at 7:30.

Cindy Winegar and Jann Drummonds each had 12 points and Reta Bosh collected 10 rebounds for the Mountaineers.

JMU never seriously threatened again. EKU took a slight advantage in the first half, holding leads of six to two points from the outset. Only twice did the Colonels take the lead, both times by two points. The Duchesses led at halftime 21-17.

The Duchesses outshot the Colonels from the floor 31 to 25.9 percent in the first half. But, Eastern Kentucky had no trouble gaining the lead behind a blazing offense that hit 51.4 percent on 19 of 37 shots during the second half.

Grieb was the top score for the Colonels with 14 points on seven of 14 shots from the floor. Mokes and Carroll added eight each for EKU.

Sonoga topped the Duchesses's scorers with 20 points on nine of 15 from the floor and two for two from the charity stripe. Railey also hit for 11. But only two other players scored for JMU.

THE DUCHESSES rallied from a 10-point deficit in second-half Friday night to defeat West Virginia, 69-61, in the opening round.

JMU trailed, 43-53, with 14:04 left but outscored the Mountaineers, 18-2, in the final seven minutes to take a 51-45 lead. Cathy Railey's 10 points during sparked the comeback.

West Virginia got no closer than eight points the rest of the way. Railey finished with 27 points on 12 of 16 shooting from the floor and three of four from the free throw line. She also had eight rebounds.

Sonoga added 16 points and Kathy Hannahan had 12 for JMU. Hannahan led the Duchesses in rebounding with 10 and in assists with seven.

The game was close for the first 15 minutes before West Virginia took a seven-point halftime lead. The Mountaineers continued dominating play in the second half and the Duchesses never seriously threatened again.

Cathy Parsons scored 15 points for West Virginia, who plays North Carolina in the tournament's consolation game at 7:30.

Cindy Winegar and Jann Drummonds each had 12 points and Reta Bosh collected 10 rebounds for the Mountaineers.
JMU hosts successful takedown tournament

By RICH AMACHER

Godwin Hall became the site of a four-ring wrestling tournament on Nov. 9.

Eleven teams participated in the Second Annual James Madison Wrestling Takedown Tournament, including Americans, George Washington, Richmond, Virginia, Virginia Military and James Madison University.

Scoring in a takedown tournament is different from regular wrestling. There is no pinning, and team scoring is not kept. Points are awarded when a wrestler throws an opponent out of bounds or wins by fall. The primary function of a tournament like this is to provide experience and work on fundamentals.

Over 225 matches took place and things got hot at times, but JMU wrestling coach Dick Besnier said all 11 teams invited back next year.

JMU entered 17 wrestlers with most of them freshmen, and Besnier thought that they all wrestled well.

"I was pleased with everyone, especially the freshmen," Besnier said. "I think they gained a lot of good experience. I've been in this business a long time and one thing you can't teach is experience.

Tony Gillespie lost to Towson State's Slaughter, 4-3. Slaughter scored two second-period takedowns to knock out Gillespie for first-place honors.

"I thought everyone did a lot well," Besnier said. "Boyer and Bass turned in outstanding jobs. They've been working really hard and putting in the effort, and it has paid off."

JMU has its biggest squad ever this year consisting of 42 members. This large number gives them greater versatility and depth.

While mainly freshmen participated in the takedown tournament, Besnier added, "Bob Harpold took a mixed squad of freshmen-seniors to Millersville, Pa., for the Millersville State Invitational.

WHILE THE MILLERSVILLE tournament gave the Dukes some experience it could prove costly as there were a number of injuries sustained during the tournament.

Junior co-captain Scott Uegeard was one of the few bright spots for the Dukes. Uegeard placed second in the 118-pound class, but did not wrestle in the final match because of injury.

Ten Noerz the sophomore co-captain advanced to the semifinals in the 177-pound competition, but he would be at the state championships.

Three freshmen got in some experience. Vic Bowman gained a fourth-place medal in the 132-pound division. Randy Denbeigh won three matches and lost a pair in the 167-pound division. Danny Corbin gained a first-place medal in the 167-pound class.

"I was pleased with everyone, especially the freshmen," Besnier said. "I think they gained a lot of good experience. I've been in this business a long time and one thing you can't teach is experience."

Men's swimming team

Dukes split matches

By DAVID TEEL

Two members of the James Madison University men's swimming team established school records Saturday, in the Dukes' trouncing of North Carolina-Greensboro.

The Dukes split matches and lost a pair in 150-pound team competition and Danny Corbin wrestling at 177-pound split four decisions.

Millersville State won the tournament, with Rutgers finishing second and William & Mary placing third. JMU finished sixth, three points shy of a fifth place.

Coach Besnier thinks this years team is the best yet at JMU. He has set a few goals he would like to achieve this year.

"I'd like to finish third in the state just like we did last year," Besnier said. "I would also like to have someone qualify for the NCAA national tournament."

The Dukes next match is Dec. 1, when they participate in the William & Mary Invitational.
JMU finishes fourth at Regional Tournament

William & Mary wins field hockey Tourney

By CATHY HANKS

A disappointed Duchesses's field hockey team placed fourth in the Division I Tournament this weekend at Williamsburg.

A Virginia squad won the Association of Intercollegiate Athletics for Women's field hockey, but neither William & Mary nor the first-seeded JMU team were in attendance. The defending champion Virginia, a one point leader in the quarterfinals, made the seedings even more confusing.

Ironically neither nationally ranked Virginia, North Carolina, nor William & Mary (13th) made the seedings at all. Virginia (14th) placed third, North Carolina led at the four in the Region II field hockey team placed third.

Defending champion Virginia made the seedings  due  to ranked Virginia (14th) or Carolina placed third. Ironically neither nationally ranked Virginia, North Carolina, nor William & Mary (13th) made the seedings at all. Virginia (14th) placed third, North Carolina led at the four in the Region II field hockey team placed third.

'Once again the two teams went into double overtime and strokes...this time Virginia came out on top.'

A Virginia squad won the conference playoff advancing to the NCAA nationals.

'Nancy Koury fights for ball in Duchesses's loss to Virginia.'

Virginia and North Carolina leads at the half. A Virginia squad won the conference playoff advancing to the NCAA nationals.

Club sports

Racquetball organizing at JMU

By DAVID PARKER

"I can take a good athlete and make him or her into a good racquetball player." With this theory in mind, Dr. David Hott, a Management and Marketing teacher at JMU, intends to make racquetball here as an NCAA recognized sport.

Hott brings some very impressive credentials to the JMU racquetball program. He started the racquetball club program at the University of Arkansas as well as coaching the women's national class B champion. As a player, he competed in the Memphis area which is one of the nation's hotspots for racquetball.

The club program, now in its first year on a trial basis, has been recognized as such, but must first be established for over a year before the club can receive any financial assistance from the school. The club is open to anybody interested in playing, including faculty, graduate and undergraduate students. At this time approximately thirty people have signed up.

To gain a competing position on the club, against other school clubs, that is, one merely challenges a player above him on the interclub ladder. The top six men and women compete, with six singles matches and three doubles matches being played. The number one player at this time is Bud Gray, a teaching pro at the Shenandoah Valley Racquet Club.

Gray is expected to go to the nationals, and possibly take home the B division championship. "The primary goal," said Hott, "is to generate good racquetball play. I want to make racquetball more popular than it is at this time."

"Once educated about the game, a good athlete will improve in a very short time," commented Hott on the simplicity of training an athlete. "Once a player learns what to do, that is to hit it two inches off the ground instead of two feet, he can be a good player. A good athlete has the ability, he just has to be educated, and that what I am here for."

The main problem for the club at this time is finding court space. For practice, the team must sign up and wait in the line like anybody else. With recognition from the school, Hott is hoping that this problem will be alleviated.

The club also practices at the Shenandoah Valley Racquet Club at 7:00 in the morning. The team plays doubles and takes racquetball, but no one practice session is mandatory.

"A good attitude is needed; for this is a team," pointed out Coach Hott. "The ones who are serious about the sport and show a working attitude are the ones who will play."

A highlight of the coming season should be a tournament sponsored by the Penn company. They have offered to put up balls and prizes. A five dollar entry fee guarantees each player two matches, new balls for each match, officials and a six month membership in the American Racquetball Association.

All in all, the racquetball club led by Coach Hott seems to be off to a fantastic start. With court time and financial assistance, the only problems to overcome, it shouldn't be long before racquetball become a recognized varsity sport.
What Do You Want From College?

Adventure? Add It To Your Schedule.

Try rappelling... descending a precipice by a rope and the seat of your pants. The fastest way down. Except for free fall.

Rappelling is one part of a challenging academic and extracurricular program offered by Army ROTC.

Army ROTC teaches professionally oriented students to lead people and to direct equipment to achieve specific objectives as an Active or Reserve Officer. If you're looking for the challenge of leadership, in college and afterwards, look into Army ROTC.

☆ Tension
(Continued from Page 1)

Lee Whitmore, also a member of Kappa Sigma, described the rally as an opportunity to express feelings, conceding that the crisis has "brought America together."

"I agree with Nixon," Whitmore said, "I do not like living in a slumbering giant."

The sentiments expressed Wednesday night are prominent across campus as students hold "down with Khomeini parties" and anxiously await the outcome of the Iranian crisis.

The concern was displayed through banners on dorms and chalked slogans on sidewalks. Last week the concern could even be felt in Gibbons Dining Hall. The steamed eggs were decorated with anti-Iranian phrases. Apparently, people are just as upset with actions by the U.S. government as they are with the Iranians.

One egg read, "Keep the Shah! Deport Carter!"

18.
Deportation unconstitutional

Their counterparts in Iran are holding 62 Americans hostage for a man dying of cancer to stand trial and face certain execution. Here, they demonstrate in support of their brothers back home, making sure the world knows of your technology but not your culture. We hate the U.S. government because of its efforts to control events in the rest of the world. It is easy to despise every one of the 50,000 Iranian students now in the U.S. They are violating our hospitality and are no longer welcome guests. They support the barbarous actions and ideology of the student terrorists and the fanatical Ayatollah Khomeini. Why don't we just deport them all: America, love it or leave it. Why not? Precisely because this is the United States and not Iran.

President Carter's recent order to deport all Iranians who have violated their student visas not only makes the students scapegoats for enhancing presidential image, but it is also unconstitutional. This may be an unpopular position, but so was opposition to McCarthyism and the denunciation of the Japanese concentration camps in California during World War II. And these situations are analogous: at the time they were popularly supported by short-sighted emotional appeal, however now they are black marks on the American conscience.

The order, which has no peacetime precedent in U.S. history, is a dangerous first step to destruction of basic constitutional ideals. It clearly violates equal protection of the laws and harnessed a specific ethnic group. No other foreign student visas are being checked, even though it is estimated that 45 percent of all foreign students from every country are technically "illegal aliens." Even worse, some of the first students being questioned were asked, whether they supported the U.S. government or had ever participated in anti-American demonstrations." Echoes of McCarthyism and a violation of primary constitutional rights.

One can only tire what the Iranians are saying when they demonstrate, but this is a fundamental freedom... which the U.S. prides itself on the right of minorities to hold and express their own beliefs, whether the majority likes it or not. This same principle protects the Neo-Nazis, communist guerillas, and Klu Klux Klan. It has also established religious freedom and fostered civil rights.

The right is so fundamental that it can never be ignored for expediency. Carter's order does this, and the State Department proved it by saying the deportation was "in response to the international crisis created by the unlawful detainment of American citizens in the American Embassy in Tehran." In other words, Iran must be punished, and if a few rights are trampled along the way, who cares; you have to get tough with these crises.

Okay. The U.S. should get tough, but not crazy. Using the Iranian students as scapegoats for punishing Iran so that Jimmy Carter can look like a strong leader is crazy. It doesn't help the situation. It's sinking to the level of subverting long valued laws and rights for selfish situational gains.

If we drop our fundamental principles of freedom of speech and thought and protection of minorities so quickly at the first sign of trouble, then they can't be very basic nor very important rights.

We should handle the situation with the pride and integrity of true Americans.

As Rudyard Kipling would say: "If you can keep your head while those about you are losing theirs, then you are a man, my son."

Final exams

More time to study or extend exam period to seven days

By KEVIN MILLER

I beg to differ, but final exams are less than three weeks away. As people pack up their bags and head home for Thanksgiving they are grateful for the much needed break. But deep in the back of their minds is the fear of coming back. The last two weeks of a semester and the imminent final exams are always the toughest weeks in anyone's schedule. Forgotten tests and catch-up assignments are given by some instructors during the last two weeks. Often, they find that they have just one week left to research and compose that term paper that they have just one week left to research and compose that term paper they assigned at the beginning of the semester. In any case, the last two weeks are not relaxed ones for most students.

Consequently, by the end of scheduled classes, most students are mentally drained and certainly unprepared for the week of final exams that is just two days away. It's futile to spend the weekend before finals pulling all-nighters and cramming for comprehensive exams because there isn't enough time to prepare for them. Instead, the finals schedule should be altered to provide either more than just two days for final exam preparation, or extend the period.

Finals week is a challenge to almost anyone merely because of its nature. Four to six tests in a given week is dreary for anyone. Compound that with the fact that these finals are often comprehensive—thus harder—and finals week becomes even more difficult. Because these tests usually account for a large percentage of a person's final grade, the pressure is magnified making the week physically and mentally exhausting.

It is not uncommon to have two, or even three exams in one day. Studying equally for these becomes practically impossible. Often, a person is not prepared for the second or third last and consequently doesn't perform well. For those of us who have lived through finals, the expressions "burnt out" adequately describes the feeling one has walking into the last of their finals. At that point, it's too easy to just say to hell with it and not give that last final much thought.

At this point, it's so easy to just say to hell with it and not give that last final much thought.

This situation can be eased by simply altering the final exam schedule. There are two solutions that could be easily instituted at James Madison University. Either more time should be allowed between the end of classes and the beginning of exams so students can make more adequately prepare, or the exam period should be spread out so a person's chances of having multiple exams in one day are minimized.

Extending the pre-exam study period from two or three days will enable a student to have twice as much time to prepare. At JMU, the Saturday before exams is "reading day." How kind. Most students seem to take for granted the last of their finals. At that point, it's so easy to just say "to hell with it" and not give that last final much thought.

The right is so fundamental that it can never be ignored for expediency. Carter's order does this, and the State Department proved it by saying the deportation was "in response to the international crisis created by the unlawful detainment of American citizens in the American Embassy in Tehran." In other words, Iran must be punished, and if a few rights are trampled along the way, who cares; you have to get tough with these crises.

Okay. The U.S. should get tough, but not crazy. Using the Iranian students as scapegoats for punishing Iran so that Jimmy Carter can look like a strong leader is crazy. It doesn't help the situation. It's sinking to the level of subverting long valued laws and rights for selfish situational gains.

If we drop our fundamental principles of freedom of speech and thought and protection of minorities so quickly at the first sign of trouble, then they can't be very basic nor very important rights.

We should handle the situation with the pride and integrity of true Americans.

As Rudyard Kipling would say: "If you can keep your head while those about you are losing theirs, then you are a man, my son."

‘At the University of Virginia, exams begin on Saturday and run through the following Saturday, without any on Sunday’
When the opponents of the Equal Rights Amendment were just personal opinions, then this letter would be unnecessary. However, that is not the case. The Republican viewpoints contained many false conceptions and stereotypes. There are no racial or cultural differences—they will apply to all citizens, regardless of sex. No man or woman would be placed in situations unsuitable to their physical capabilities. No man or woman would pull themselves up by their bootstraps. The ERA would not mean to separate men and women. Men and women would be treated equally under the law. If it did, the Supreme Court would actively and consistently prohibit sexual discrimination. Presently, many states do not and have stated they will not do so without the ERA.

The ERA will not magically transform our population into asexual beings. It is almost humorously ridiculous to think that sexual differences will be ignored. Immediately, all the differences—sex, race, national differences—they will apply to all citizens, regardless of sex. Any sex system can be unfair to the other. The ERA is a moral issue for all citizens, not just sex or race. It is not an issue for men or women, but for all citizens, regardless of sex.

We live in a country where people can worship God as they choose, if they want to, and have the opportunity to take an active role in their government in the form of voting. We still live in a land of opportunity. It may not be the same kind of luxury some people desire, but, nevertheless, it is an opportunity. Many times people become so caught up in life's web, they lose sight of what really matters. The Thanksgiving feast of the Indians and Pilgrims was a simple celebration, giving thanks for simple blessings. Maybe America's struggle to become great has caused her to lose sight of simplicity.

Ten years ago, the Bracco regime began. Within a year, oil imports were cut off temporarily and the United States found itself in a fuel crunch not experienced since the middle of the decade. Now the U.S. has the trillions that she does not want to oil at the price of world indignity. The United States has become a free nation, survived a civil war, two world wars and celebrated 200 years of prosperity and progress. On the very brink of another decade, many Thanksgivings later, the future of our country looks bleak. We are trapped by soaring inflation rates, dwindling energy sources, and a fragmented political system. Many people have lost faith in their country and in themselves. Suicide is on the rise, especially among college students. The pioneer spirit of the Pilgrims and the Indians that prevailed on that first Thanksgiving has become the materialistic quest of the 20th century.

The American family, the backbone of our country's pioneering days, stands on the verge of extinction. This is an inevitable process because mothers have to work in order to make ends meet. In other cases, it is a process of choice, indicative of the changing role of women in society.

Indians and Pilgrims came together in peace. Today nations rant and rave with cries of war, the threat of nuclear destruction always lurking in the shadows.

As this Thanksgiving approaches, what does America have to be thankful for and what do her people have to celebrate?

There are things to be thankful for, Americans live in the richest and most productive country in the world, a country where personal freedom is still basically protected. Over 200 countries in the world are on the verge of extinction. The United States is a country of six million square miles and millions of citizens. In the past, the United States has been the world's banker, the financial center of the world, a country where personal freedom is still basically protected.

We live in a country where people can worship God as they choose, if they want to, and have the opportunity to take an active role in their government in the form of voting. We still live in a land of opportunity. It may not be the same kind of luxury some people desire, but, nevertheless, it is an opportunity. In the new world, a country where personal freedom is still basically protected. If it did, the Supreme Court would actively and consistently prohibit sexual discrimination.

Presently, many states do not and have stated they will not do so without the ERA. The ERA will not magically transform our population into asexual beings. It is almost humorously ridiculous to think that sexual differences will be ignored. Immediately, all the differences—sex, race, national differences—they will apply to all citizens, regardless of sex. Any sex system can be unfair to the other. The ERA is a moral issue for all citizens, not just sex or race. It is not an issue for men or women, but for all citizens, regardless of sex.

We live in a country where people can worship God as they choose, if they want to, and have the opportunity to take an active role in their government in the form of voting. We still live in a land of opportunity. It may not be the same kind of luxury some people desire, but, nevertheless, it is an opportunity. Many times people become so caught up in life's web, they lose sight of what really matters. The Thanksgiving feast of the Indians and Pilgrims was a simple celebration, giving thanks for simple blessings. Maybe America's struggle to become great has caused her to lose sight of simplicity.
Iran threatens to try hostages for espionage

By VANCE RICHARDSON

After reviewing the privileges of the blacks and women among the 60 to 62 Americans being held hostage in the U.S. Embassy in Tehran, Iran's spiritual leader, Ayatollah Khomeini, met with American newsmen Sunday for the first time since the embassy takeover Nov. 4.

**News analysis**

In separate interviews with the three major American television networks, Khomeini said the remainder of the American hostages may be tried for espionage. The ayatollah refused to rule out the death penalty for those convicted of spying. NBC News reported.

Militants occupying the U.S. Embassy said they were following Khomeini's order to investigate the embassy's alleged espionage activities and release those blacks and women who weren't involved. (CBS News reported early Monday the militants released 13 American hostages and placed them on a flight to an unspecified European destination.)

United Airlines said it had returned to Iran the shah of Iran, who has been undergoing cancer therapy in a New York hospital since Oct. 22, is returned to Iran, the militants said they would try the remaining hostages for spying in the course of their diplomatic duties in Iran.

**This diplomat in my country are supposed to do diplomatic work, not perform espionage tasks**

ABC's Peter Jennings through an interpreter. "If they participate in espionage, they are not diplomats," he added.

"This is President Carter does not respect international law, these spies cannot be returned," Khomeini said. The only condition is to return the shah, we have reduced our demands. If the shah is returned, the ayatollah said the hostages would be released as a 'kind gesture on our part.'

Militant leaders holding the U.S. Embassy have warned that it would be worse than the original offense of allowing the shah into the United States if he is permitted to go to some other country. However, State Department spokesman Hodding Carter said the U.S. government will not extradite the shah to Iran, and he is free to go wherever he chooses once his treatment for cancer ends.

Both Mexico and Egypt have said the shah is welcome. ABC News reported Sunday that the former Iranian monarch is expected to go to Egypt the first or second week in December, but Mexican newspapers said Sunday that the shah is due in Mexico City sometime next week.

**The Carter administration has insisted it will not pressure the shah to leave the country, but expects that he will soon do so on his own.**

"The United States of America will not yield to international terrorism or blackmail," President Carter said last week. "The Iranian government and its leaders are fully responsible for the safety and well being of our representatives in Iran, in Tehran, and they will be held accountable for that responsibility." Carter said that Americans are angry, but the situation in Iran calls for patience, measured, deliberate action. Actions taken so far by Carter include a cutoff of fuel for Iran's air force, a freeze on most of the Iranians' gold funds in banks, a self-imposed embargo on oil imports from Iran and a suspension of deportation proceedings against Iranian students in this country illegally.

Russell Long, chairman of the House Foreign Affairs committee, wants Carter to cut off all food sales and other trade with Iran except for food sales to the militants. The United Nations is said to be pushed for a trade embargo against Iran, but so far, no decision has been reached.

THE AMERICAN Farm Bureau, the nation's largest farm group, said it would support an embargo on U.S. food exports to Iran. U.S. farm products now make up more than one-quarter of Iran's agricultural imports last year. More than $450 million a year in sales of wheat, rice and other agricultural products feed Iran's 35 million citizens.

Iran's foreign minister warned the Carter administration that any embargo would far outweigh Iran's if the Carter administration steps up the economic war to free the hostages. "There can be no war aimed at destroying Iran and damaging," Abdollahian Bani Sadr said. "Iran's suffering is caused by the U.S. and many times more than the hostages could cause.

However, a new Library of Congress study concludes that Iran must increase, not cut back on oil production in order to maintain economic stability and popular support. The study concludes that even a belt-tightening Iranian budget would require oil exports of 4.1 million to 4.9 million barrels a day. (Iranian leaders have vowed to hold all exports—once as high as 5 million barrels per day—to between 2.5 million and 3.5 million barrels a day.)

WENT GERMANY has publicly pledged not to buy any excess Iranian oil freed by the American boycott, and France and Japan have reportedly made the same pledge. Together with the United States, the three countries account for almost three-quarters of the non-Communist world's total demand for imported oil. Western nations aren't the only countries pressuring the plight of the American diplomatic representatives being held hostage in diplomatic protest of international law. The Washington Post reported in its Nov. 17 edition that there is unanimous disapproval in the United Nations concerning the Iranian takeover of the U.S. Embassy in Tehran.

"We have only one thing in our hands—the law," said an African ambassador.

"We have only one interest. We have no protection. Iran should see its own interest in preserving this principle. So we hope that eventually this international pressure will be so strong because this

By VANCE RICHARDSON

As the occupation of the United States Embassy by Iranian students in Tehran entered its second week in December, International law still stands and across the nation continued to mount.

A protest rally was staged on James Madison University's campus. A Greek Row Wednesday by Kappa Sigma Fraternity and a petition is being circulated by the American Jewish Congress, said the National Anthem. The demonstration was organized by Students Against Ayatollah Khomeini's Iran (SAAKI). The group held its first meeting Tuesday and received final official recognition from the university Thursday afternoon, three hours after its demonstration.

James Todd, president for SAAKI, said his group has gathered more than 500 signatures on petitions supporting any and all efforts by the U.S. government to secure the release of American citizens with the exception of submission to custodian demands.

He said the petitions will be sent to 2nd District Rep. G. William Whitehurst and possibly to President Carter and the Iranian Embassy in Washington.

THE OHU RALLY was one of several across Virginia campuses. There were protest rallies at Virginia Tech and the University of Richmond in addition to the impromptu protest held here.

The Associated Press reported Sunday numerous nationwide reactions to the situation in Iran:

- FBI agents and Tennessee officials searched Nashville last week for a man who told a Nashville television station his organization might kidnap and possibly execute Iranians unless the siege of the U.S. embassy in Tehran ends.

- In Chicago, a man telephoned newspapers and television stations to claim an Iranian student group was responsible for a bomb that exploded aboard an American Airlines flight from Chicago. No one was injured in the explosion Thursday and the plane landed safely in Washington, D.C.

- An Iranian student in Denver was charged with first degree murder for attempted murder and several assault charges in the shooting last Sunday that left one high school boy dead and two injured. Police said the youths were harassing Afshin Shariati, a student for the Iranian embassy in Denver.

- Several growing number of Iranian students, concerned for their safety and a possible shortage of funds, are calling us and saying they would like to go back to Iran," Housen Aya said the embassy had sent a cable to Tehran seeking instructions.
