The Shenandoah National Park, Development of, and its resources is the subject of the paper by Mark Muterspaugh. In his paper he describes how the facilities of the plants and lines have grown. Diesel power was abandoned in 1962 and Cooperative now buys most of its power from the Virginia Electric and Power Company at the present time. Reporters then found out that 97 percent of the people of Rockingham County have electricity and 99 percent have it available.

Page Callis has written an evaluation of the fishing industry in Madison County. As Miss Callis points out, there is a need for greater diversification of the fishing industry in order to keep fishermen over the lean seasons in a worthwhile job.

Dear Sir,

The desire of the underclassmen to be allowed members of the Senior Class is commendable indeed. By small acts of courtesy and deference we pay tribute to those who have gone before us—our parents, our leaders, the older members of our families, friends, and older students and colleagues. We learn to accept these courtesies, too, as personal tributes, but as recognition of the obligation which one generation be to the next. College is a community where all members should request or expect the faculty to follow the Seniors in leaving as a memorial to their recognition of the true meaning of the practices which they recommend. The deference accorded the Seniors is in their greater maturity, wisdom, and leadership—products of their four years of college study. In an institution of learning, whatever its purpose, the senior member is the leader but the symbol of the purpose for which the institution stands. The Senior Class should set an example of its own vocation, precedent of its own practice. This piece is called to its own great purpose of learning.

This protest is written because my respect for the Madison Student body is very great, but I believe that when the students are lacking respect for their faculty, they dishonor themselves and their college.

Sincerely yours,

Caroline Sinclar
Professor of Practical Education
Health Department

Dear Sir,

Two of the recent editorials in THE BREEZE have interested me, and I wish to call the attention of the student body to them. School affairs had a point but I wonder if some of the girls who come to Madison have not had the opportunity of going to consciences. If they have, why are they going to learn during the present senior year, which the Seniors asked the members of the faculty to wait until the class left the high schools in order that they have no further decisions to make. We expect the Seniors to set an example for the rest of the students to follow. They should have the highest standards and set a high example for the students. After all, we are only a few persons trying to un- derstand the Seniors who have not yet obtained their degree. The deference accorded the class is in many ways pleasurable to the students, and if Ann realized that some of the students are lacking in respect to their faculty, they dishonor themselves and their college.

The students are lacking in respect to their faculty, they dishonor themselves and their college.

Sincerely yours,

Lucy Cole
