Hall Is New Dean of College

Dr. Daniel R. Hall, former dean of graduate studies at Genesee State College in New York, is the new Dean of Madison College.

Dr. Hall holds masters and doctorate degrees from Columbia University where he majored in administration of higher education. He received his B.A. in economics and social science from Westminster University.

Dean Hall is a charter member of Consultants of American Association of College of Teacher Education and a member of the Association of Higher Education, National Education Association, and the Association of Eastern College Deans along with numerous other groups.

His publications include "Guiding Principles for In-Service Improvement" and "Keeping Up-to-Date."

Dr. Hall is listed in "Presidents and Deans of American Colleges and Universities," "Who's Who in American Educa-

The father of one daughter, Dr. Hall names camping, sports and music as the favorite pastimes of his family.

He said that he thinks Virginia is beautiful and not a great deal unlike the area of New York from which he comes.

"I have found that the women students at Madison College are more courteous than students of other colleges. I've been associated with outside of the South," the new dean said. "They also appear to be very well-groomed."

"The men students, many of whom I've been able to talk with, seem to possess a fine attitude; especially the press of making Madison a fine institution."

Dean Hall went on to say, "The faculty and administrative staffs have given me their fullest cooperation in every way and have made my assignment, to date, in spite of problems, a very pleasant one."

Consultants Suggest Reorganization

January 12 and 13, 1967 a Blue Ribbon Panel of consultants came to Madison to observe and make recommendations pertaining to faculty and administrative organizations. The aim of the group was to modernize and make more efficient the machinery of the college.

In general they agreed that the administrative organization stemmed from functional needs and that those needs on a college or university campus sprang from four basic areas:

1. Meyers Invents Magnetic 2-Sided Recording Tape

Dr. Sigfried S. Meyers, professor of physics at Madison, has developed a new magnetic tape recording. Meyers, working with Dr. Doris V. Stage, Professor of Chemistry, invented a tape that can be recorded on both sides. Theoretically, a magnetic stripe now in use can only be recorded on one side, thus cutting in half the amount of tape presently needed.

Unlinking the "split," recording signals could pass through normal tapes, therefore, if both sides of a tape were recorded they would be "split" together yielding a distorted sound. Dr. Meyers eliminated this interference by placing an iron oxide compound with a "high" magnetic retention in a space between the two sides of the tape. This is the secret to his discovery.

Madison College gave a $500 grant to Dr. Meyers (Continued on Page 4)

Reubush, Fox Cline Assume Administrative Positions

Madison students returned to campus this fall to find that several changes had taken place in the administration.

Dr. Fay J. Reubush, who served as Assistant Dean of Women last year, is now Dean of Women. Before coming to Madison, Dr. Reubush was the Supervisor of Guidance and Testing for the Rockingham County Schools.

She earned the B.S. degree in History from Bridgewater College and the Masters and Doctorate degrees in Guidance from the University of Virginia. She has also attended classes at Madison and said she "tried both sides of the deck equally well."

Besides keeping house, reading, and cooking, which she lists as her hobbies, Dr. Reubush also has a special interest in the Mental Health Association. She is on the Advisory Board of the Valley Mental Health Center.

She is also an active member of Delta Kappa Gamma, an honor society for women teachers, and of First Presbyterian Church.

When asked about her impressions so far, Dean Reubush said that she likes to work with people and has "a real good feeling out of working with the students here."

"I have been impressed," she said, "with the will and re-
sponsibility the students have shown. When I've had to talk to them they could follow the campus situation rather well.

The students have shown me a sense of responsibility along with the college."

Dr. James W. Fox has been named to fill the newly-created position of Student Services.

Before coming to Madison, Dr. Fox was the Director of Student Activities at Kent State University in Ohio. He received his degrees at Indiana University. His Masters in Personnel said Guidance and his Doctorate in Administration of Higher Education.

Dr. Fox observed that while Madison is smaller than Kent by about 24,000 students, there is relatively little difference in the two. One of the major things he has noticed at Madison is the high degree of felt responsibility on the part of student leadership. "On a larger campus," Dean Fox said, "this group of students tends to be absorbed into the masses and this personalized responsibility is missed."

The father of two children, Dr. Fox lists his outside interests as bowling and attending football games.

When asked basically what his job as Director of Student Services (Continued on Page 4)

Convocation Still Mandatory

The Committee on Convocation, Public Exercises, and Entertainments has announced a change of policy, concerning regulations of attendance and seating for college functions in Wilson Hall Auditorium.

The committee, headed by Mr. Edgar Anderson, is composed of administration, faculty, and student representatives.

The policy that will be in effect this year is as follows: With the exception of first and second semester convocation (honors Day), there will be no required College attendance.

The visiting Lecturers and Artists series will be con-
tinued, however attendance on a week-to-week basis.

The only assemblies to be held by the Student Government are: the freshmen Convocation, the President Miller's remarks to new students, the S.G.A. Mock Trial, Senior Capping, May Day, Major and Minor Offi-
cers Installation and other special events as determined by the committee.

These assemblies will be held on the first Tuesday or Thursday night of every month.

Lycymp Program Presents Wills In Organ Recital

Thursday, October 5, at 8 o'clock in the evening, the Madison College Lyceum Series will present Dr. Arthur Wills in recital in Wilson Auditorium. Dr. Wills is a Professor of Organ at the Royal Academy of Music, London, England. The recital program will include selections from Bach, Franck, and Liszt as well as original arrangements by Dr. Wills.

Dr. Wills is a native member of Delta Kappa Gamma, an honor society for women
A Message To Freshmen

Planning Lacks Foresight

Foresight, as defined by Webster's Dictionary, is needful thought for the future. Can it truthfully be said that Madison College has used foresight? The obvious answer is no.

No doubt, many years ago, Madison students enjoyed rooms that were not obstacle courses, eating without standing in line for an hour, and an uninstructed view of their professors in crowded classrooms. Such were the days of long, long ago.

Three girls in rooms that were constructed for two create an academic atmosphere that is hardly conducive to study. Even less can be said for the atmosphere created by the "parlor-mates" (those girls residing in living rooms of Frederikson and Huffman). Students are now forced to work up tremendous appetites during dining hall times. Only the drawbacks to this new innovation is cold food and small portions. If a student can find a seat in class, it is likely that he will not be within sight or hearing distance of his professor. The book store has also been a scene of chaos. The congregation of students makes the purchase of books difficult and the frustration felt upon discovering that the book is no longer in stock.

There is no simple solution to these many and varied problems. It must be recognized that money is not readily available and if this were not the case "red tape" would slow the expansion of the college. The only possible solution for alleviation of these problems is planning not only to meet present needs, but also planning realistically directed toward the future.

NEWS FROM STU. GU.

by Suzanne Hobson

"The sense of honour is of such fine and delicate a nature, that it is only to be met with in minds which are naturally noble, or in such as have been cultivated by good examples, or a rigid education," Madison, The Guardian, No. 161.

Madison College has for many years been proud of its Honor System. Whether the minds of our students have been naturally noble, cultivated by good examples, or refined through education is of little consequence. What is important is that our campus will continue to build a sense of honour in all of its students.

Let us all join in making or in renewing our pledge to uphold the principles of the Honor Code of Madison College.

Dean Shaver
Advisor to Honor Council

BREEZE BRIEFS

As one of its many projects, the W.V.C.A. on Madison campus sponsors Circle V every Monday evening. This week Circle V will meet on forth Tuesday at 4:35 in Blackwell Auditorium. Circle V is an organization interested in literature and discussion. Among speakers leading the group are campus professors and other distinguished persons.

Reverend C. Graham Reid of the First Presbyterian Church is scheduled to speak on October 18. His topic will be announced.

(Continued on Page 3)
Dr. John G. Wells, professor of Physics, recently announced the formation of a FM radio station here at Madison. The proposed station, which has been in the workshops for past ten years, is a new watt installation. The antenna will be erected on the west side of the campus, with studios in Alumnae Hall. The $13,000 installation will be run by the students for the purpose of informing the students of campus activities and for enjoyment. Dr. Wells said the station would be used as a medium of communication between administration and students. Dr. Wells emphasized that all music and entertainment would be left to the discretion of the students.

The proposal must go before the Campus Fee Committee for final approval. When asked if he thought the committee would approve the financing, Dr. Wells answered, "Yes."

The only stumbling block that Dr. Wells ran into was the U.S. Government. West Virginia is a sight of a Naval Research laboratory. The government has imposed a restriction forbidding anyone to transmit into their Radio Quiet Zone, therefore, a directional antenna must be used for transmission of our station. This antenna is the cause for most of the expense in building W M C / F M.

Dr. Wells predicts that the station will be operative "...in a few months, and probably before fall."

"Where Is Your Goal, & What Is It?"

by Michael Cappeto

The sun was bright over Harrisonburg, license plates from all over the country were to be seen everywhere. Smiling, starry-eyed guys and gals were darting around campus aimlessly. Who are these new roommates? What will they be like? Questions such as these were on the lips of all.

Those first few days flew by and eveniment was but a memory. Classes started and everyone seemed to be at ease.

The question now at hand was of a different nature than those of yesterday. Will I succeed in my goal, or will I fail? My goal... Where is it and what is it? In the graduation day at Madison or is it a master's degree from the University of Virginia? What does my future hold for me?

As you look out of your dorm window, pondering what the world has in store for you, you see the moon. Great and majestic it sits in the heavens above. How bright is it! If only I could reach it... but how?

You climb to the top of your dorm roof and get set to jump. You know that if you jump high enough you will reach it. You take a deep breath and get set, just before you spring into the air you see a bright star, just beyond Mr. Moon. How wonderful it would be to grasp that star! But, can it? After long debating with yourself you decide that you want that star. You take a running start and leap in an earnest effort toward it. Your hands come near it, you reach out to grasp it, but alas... you miss. Looking up you still see that star glittering in the distance. All at once you feel like crying. But don't despair! Look up on top of that big, bright moon you had so desperately wanted to reach!

Yes, you have succeeded in reaching your original goal. That star is now one step closer than before. Upon closer examination of the heavens you see another star, further away but shinier than your original goal. Your mind is made up, you'll just have to jump again for that distant one. But how many more lie beyond that?

Can the moon be a B.A. at Madison, the star, a Master's degree at U. Va., the further one, a Ph.D. at New York University? And now tell me, where is your goal and what is it? Will you ever reach it?

As long as there are stars in the sky there will be something else to reach out for. The desire to take advantage of foreign techniques may be seen in Madison's fully equipped language laboratory which has 28 positions for both listening to prepared tapes and for recording by the students themselves. The lab is available to all students taking a foreign language.

The desire to take advantage of foreign techniques may be seen in Madison's fully equipped language laboratory which has 28 positions for both listening to prepared tapes and for recording by the students themselves. The lab is available to all students taking a foreign language.

French Dept. Grows

Madison's Foreign Language Department, to go out of the rapid expansion taking place elsewhere on campus, has revitalized its programs and is also providing new opportunities for education students. The P.I.L.S. (Foreign Language in Elementary School) program allows those preparing to be language teachers at the elementary school to take French, Spanish or German while preparing for their elementary teaching certificate.

Those who are specializing in French may observe techniques at the Madison College Campus School where French is offered from the third to the eighth grade.

"Breaking through...."

The desire to take advantage of foreign techniques may be seen in Madison's fully equipped language laboratory which has 28 positions for both listening to prepared tapes and for recording by the students themselves. The lab is available to all students taking a foreign language.

BREEZE BRIEFS

(Continued from Page 2)

In order to plan appealing talks, the Y.W.C.A. encourages students to make suggestions. Any ideas may be sent to Carol Toole, Box 2092.

- - -

Dorothy Rowe, Ph.D., head of Madison's Home Economics Department, will be one of the speakers participating in a health education conference in Dallas, Texas, September 29-30. Dr. Rowe will address the conference on Saturday morning as a representative of the American Dietetic Association. Her topic will be "Paeta About Food."

The number 643-5172 listed for Alumnae Hall is the pay phone, it is the number to use to reach administrative offices of the social biology. Extension 213 is for the Department of Women, 245 is for the Physical Education Office, and 214 B is for the Dean of Student Services. Students are requested to use these numbers.
WAA TIPS

Intramurals have started and all are eligible to join. Hockey intramurals are Tues-
day and Thursday from 4 to 6 p.m. Tennis intramurals will be held Monday and Wed-
dnesday at 4 to 5 p.m. An Open House will be held by Orchesis, the modern dance
club, in Ashby Gym, Tuesday at 7 p.m. A panel of female students interested in dancing,
lighting, and back-stage work are urged to come. Come dressed to participate in the
eexercise period.

For more information, see the waa woman's synchronized swim group, will
hold a demonstration for interested members Monday at 6:30 p.m. in Kreezel pool.

Congratulations to the following girls who made the Hockey team:
- Lynn Ardito, Barbie Beacham,
- Mel Bonhoff, Bert Bur-
nett, Elaine Choby, Jo Dal-
drymple, Gay Davis, Linda
Deavers, Lydia Estes, Anne
Garfield, Emily Halbrook,
Haas, Linwell Hewitt, Carol
Horton, Martha Lee, Niblee
Johnson, Ellee Lott, Joan
Knight, Barb Moore, Joyce
Morrison, Maresha New
Sharon Orling, Kathy Patton,
Laurie Powery, Joyce Price
Chris Shalton, Sharon Skimer,
Jane Snell, Nancy Taylor,
Sharon Teal, Sue Teal,
Cynwil Westmoreland. Dr.
Lottus L. Morrison is coach.

finance his experiment. He only
used $100.

Presently there is a patent
pending on the process. Rights
to the process may be sold to
tape manufacturers dealing in
audio-visual tape.

Dr. Meyers proposed that any
money derived from the new
process would be used for
a natural science and math
research foundation. This
foundation would encourage
other teachers to do research
in pure and applied sciences.

Dr. Meyers is also the author
of the book, "Experi-
ments with Conductors and Semi-Conductors and was
one of the founders in de-
mapping magnetic wire tape.

THE BREEZE, the weekly newspaper of Madison Col-
lege, has merged to the form below and mail-
ing a $2.00 check or money order to:
Madison's expansion pro-
gram, if all progresses as is
planned, will bring the num-
ber of women students to 3,200
and the number of men students to 4,000 to be housed in the campus by the 1973-74
session.

The men's dorms is to be the
first "slightly rise" structure on
the campus. It will be group-
ected with the other four pro-
ected buildings on one side of
the planned physical educa-
tion building, soccer and soft-
ball fields, and the tennis courts.
Women's dormitories will be
clustered on the lower campus opposite the
Student Services. Dr. Fox ex-
plored that last year it was
decided by virtue of a recom-
medation of a blue ribbon panel
that one may apply for the
position the Dean of Stu-
ents and instead create the
new position. The Office of Admis-
nal and Financial Aid, Placement and Field Services, Health Services and soon the
Counseling Center, Student Activities Office and even-
tually the Housing Office are co-ordinated under the head of
Student Services.

"My responsibility is to co-
ordinate these services and to
integrate them into the over-
all college program making it
possible for the academic in-
stitution to function with the least amount of interfer-
ce. Ours is a service func-
tion," said Dr. Fox, "My whole job is to help students get through school."

An assistant professor of
political science at Madison Col-
lege, Paul C. Cline, has been named executive director to the pres-
ident of the college.

Mr. Cline received the BA,
MA, and LLB degrees from the
West Virginia University. He
praciced law in Huntington,
West Virginia.

In this new position, Mr.
Cline will assist President
Miller in all over administrative
duties and also replace the
ordinator of Grants, He will
continue to teach one class.
