Miss Bennard will Leave H. T. C. For Germany

Miss Mildred Bennett of Columbia University, who has been working with Dr. W. J. Gifford in the field of zoology, plans to leave the H. T. C. May 2, to return to New York. The following summer Dr. Gifford and Miss Bennett will "visit Germany" for further research.

Miss Bennett is coming for a month at the University of Berlin and will spend three months touring the country. She plans to visit the Queen of Summer in "to hear a Strauss Waltz," and to hear the music of "The Merry Widow" and "Mussett's Queen."
Those few students who read the editorials are most curious about curricular activities, and especially with the creation of the Point Committee for the proposed revision of the point system, the next time you go to sleep in class and wake up to be a radio comedian.—New Yorker.

The Book of the Month Club is going to award four yearly prizes of $1,000 each to "unrecognized authors." This is an admirable plan and a necessary one. The present method of reviewing books, the emphasis on best-seller lists, and the functioning of such substitute critics, is all wrong. Certainly more than that, no students can afford it. If we realized the necessity for a new gradation of honor points.

The Daily Illini tells us that "courtship consists of a man chasing a woman until she catches him." Is that the idea of a college classroom?

There aren't much to talk about at all except one or two leaves have grown up to be a radio comedian.—New Yorker.

Unsolved Riddles

If you could scream when my partner keeps on snoring, could you scream under the circumstances?

There are other ways of confusing the instructor, the society reports, filing the case of a member who had been arrested by an overly suspicion examiner. The examination will be made without the instructor's knowledge. We should therefore be able to answer the questions by the handful.

Co-ed Classification College Men

Chapel Hill, N.C. — (A C P) — Ben Neville, enterprising student at the University of North Carolina here recently set out to discover just what college women think of college men. He found out, too:

"College men are the most well-mannered and equable creatures on earth"..."They are crude, insincere, disrespectful, insensible, intolerant, impertinent, discourteous."

The "thing that goes to bed with a man," declared a Syraturian University girl, "is "when he's not going to have any more sex." Baffled, the instructor retreated, "I guess a husband enough rope—and then the exasperated professor gave a mighty scream.

Give a husband enough rope—and then he will try to hang himself.

Experiment for Benefit of Humanity is Giving Successful Results; 31 Students are Members of New Campus Club

Do you know that one of the students majoring in science has con ducted the benefit experiments which are being carried on under your very eyes this week? If you don't, then because you have not yet ac quainted yourself with the new organization of the newly organized Campus Associate for the Advancement of Science. The association, headed by Dr. Weems with an advisory board con sisting of Miss Hooover and Miss Hopkins, has an active interest in bringing the students, maturity to the cause of re duction of weight by scientific diet. This activity is part of the ongoing re search in giving all indications of successful results! Dr. Weems re veals that the most successful tables in the dining hall were on April 25, 27, the first week of each month. 16 members lost from 1 to 4 pounds. The loss of weight at first, she points out, is greater because the body is not yet acclimated to the new limited food supply. When the adjustment is made each member is expected to gain an average of two pounds per month. This amount can be steadily sur passed with no harmful effects.

Dr. Weems' claim has been prov en with living examples, for all of the members of the association assure that they feel fine, better than they have felt in years. The simple rules of attendance at three meals a day, no second-helpings of bread, no eating be tween meals or at night are produc ing an amazing amount of weight reduction. The meals, planned by Miss Turner; distilled, are composed of high protein content with a shortage of fats and carbohydrates, giving between 1000 and 1200 calories to each person per day. The report is that Miss Turner is as liberal as always.
