New Courses Offered for Summer Term

Handwriting, Government, and Educational Progress, Education and Progressive Education are Subjects for Special Lectures

Featuring special lectures on important phases of educational work, the Summer session of H. S. T. C. will open on June 15. As well as courses in the regular curriculum offered under the regular winter session fac-
ulty, student teaching facilities, campus demonstration and laboratory classes in the new curriculum will be given.

The regular Main Street training school will be enlarged and will be open to all students. During the term there will be a campus laboratory school with three groups of classes: a rural unit, a semi-urban ungraded group to approximate a one-teacherschool. In each case the teacher will be a senior with an experience as a member of the winter laboratory school staff and experienced in working with the New A. De-Frees.

Among the special lecturers are Dr. Alice De Frees, Professor of English at the State Normal School, who will speak on Government and Economics; Dr. Fed-
ny Hale of the University of Wisconsin, who will lecture on Writing on the New Curriculum; Mrs. Marjorie Johnson on Progress-
tures in Teaching, and Dr. Clarence Witherspoon on Conservation and Development; D. W. Peters on The New Cer-
monialism; Dr. S. C. Mitchell, President of Rich-
tone, on the New Curriculum. A Teacher will be on Handwriting. A Three-Day Con-
fessor will be held June 14-16. The New Curricu-
also planned.

As part of the Yearbook Course the Beautiful Arts Singers will be presented and other music, plays and motion pictures. The college bus will be used for field trips and excursions to Washington, Monticello, Natural Bridge, Valley Caverns and Skyline Drive.

The college camp on the Shenan-
doe River will be open week-ends for students desiring the swimming, boating and hiking activities.

Alice De Frees Gives Astronomy Lecture

By PATRICIA MINAR

In spite of the fact that the younger generation is generally drawing away from so technical and remote a subject as astronomy, a lecture given by Alice De Frees on Saturday evening was received enthusiastically by not a few students of this college.

Whether their reason for coming was for the information they sought or for the entertainment, it is certain. The sheer number of them gazed thinkingly out a win-
time, for all planets dissolved in one edge, recognition, and appreciation.

Alberto Smith chose Articles by Dr. G. W. Landrum, W. R. Smithley, and Virginia Cox

An article dealing with the personal accomplishments of college life, the sec-
many topics and current trends in grading and testing, will be given by the large crater of the spring. The prominences will appear on the campus area.

The opening copy is a statement of a speech given at H. T. C. by Dr. Grace Glover, Harrisonburg, dean of women of Williams and Mary College. Dr. Lan-
class lines satisfactions for better; security, adventure, responses, and recognition. Security and re-
structor who described the state of the present day astronomer and suggested that adventure and recognition are named as the dynamic de-

Secondary School and Community

A discussion of "What the Secondary School Should Know About Its Community" by William R. Smithley, gives eight main knowledge areas, and the ways in which the school faculty should possess con-
era in its community. Among these listed and discussed are the sas, recognition, and appreciation standards, traditions, religious and social opportunities and needs, financial con-

The only thing that can save the American college from going down on the deck of the Titanic is how little real interest there is in study, an inscription on the prow of the Titanic that was recently discovered.

Student unrest is developing, and a few small outbreaks of rebellion have begun to be seen. But it is hoped that, if they are going to rise in revolt, they must do it on a higher plane of interest. The mere presence of students is no reason for alarm; if the people who are there think they are doing something that is worth-while, they will not need to be told so by the officials.

It seemed as if this was the beginning of a revolt against the old order of things. The students were saying that they were tired of being ruled by a few old men who had been at the college for years and who did not understand the younger generation. They demanded more freedom in their lives and more freedom in their studies.

The administration was taken aback and did not know what to do. They were afraid of the consequences of such a revolution, and they did not want to risk it. But the students were determined, and they continued to demand their rights.

The administration finally gave in, and the students were allowed to have some control over their studies and their lives. The revolution was a success, and it was a turning point in the history of the college.

It is important to remember that revolutions are not always bad. They can be a necessary part of the progress of society, and they can lead to great changes for the better. This is what happened at this college.

OVER CAMPUS THIS WEEK

AND A GOOD TIME WAS HAD BY ALL.

It was an unusual night. College girls engaged in the activity of being engrossed in a group discussion about the Deed, Louden Bridge, and even drop the blanket.

The next Thursday evening, Mr. Vann, the president of the Sophomores, gathered about his book.

When Mr. Dinsdale announced, "If you want anything to eat, come on, if you can just stay where you are; one of the girls in the Sophomore class, was engaged in the activity of preparing for her book, but after all, one must get somewhere. I would say that we are not always a true self.

I enjoyed the evening, and I enjoyed the "nice" and "I enjoyed it sooo much" could hardly express the feeling of happiness that we had at Independence.

This was the last meeting of the Association which is to be held by the Sophomore class.

The main topic for discussion was the upcoming Alumni banquet.

The next Alumni banquet will be held at the Virginia Hotel.

The students are engaged in the activity of preparing for their homecoming.

Dr. Weems and Dr. Wayland Attend Culpeper H.T.C. Alumni Meeting

Dr. Rachel Weems and Dr. John G. Wayland attended the meeting of the Culpeper Chapter of H.T.C. Alumni. At the meeting, one topic that was discussed was the upcoming Alumni banquet.

Sophomores Lead In Baseball
Defeat Juniors and Freshmen; Championship will be Played Wednesday

Having defeated the Sophomores and Freshmen, the Sophomore team is standing in line for the championship. Since the Freshmen team has two freshmen challengers, the Sophomores seemed to be favored in the game between these two teams.

The remaining exams of the series will be played Monday between the Juniors and Seniors and Tuesday between the Juniors and Seniors. Wednesday afternoon the Sophomore championship game will be played between these two leading teams.

The game between the Sophomores and Seniors Friday afternoon was evenly matched and tightly contested, the Sophomores leading 4 at the end of the first inning and the scores tied at the fourth.

The pitchers of the teams have shown in all of the games unusual ability and their hurling has caused considerable concern among the batters.

Miss Michelle's Pupils Give Musical Program
The pupils of Michelle Middle School of the Harrisburg system gave an interesting program of music over WVA on Wednesday afternoon.

The Allegro movement of Beethoven's Sonata Pathétique, Opus 13, was beautifully played by Kathleen Stone, and "Adagio Movement of Beethoven's Moonlight Sonatas," Opus 27, No. 2, was played by Margaret-Pattinson. The theme song, "Blue Danube" by Dvorak, was played by Michelle Bell.

How Did You Earn Your Money?
(Continued From Page 7, Column 3)
Clara Oates, father in law to the question, "I sometimes wonder if I shouldn't be paying other people instead of letting them pay me. I mean those people that let me into all sorts of trouble, etc. Being a country boy and living in a farm where there was no one to do work to do, I had no chance to go away from home to work. The first job I had was in a store. I was always a boy, and a lot of boys that were here before me began teaching a school in Ohio. Then I was a boy just out of high school, I was lucky, I was 16 a month before I began, but during the cold weather I when I thought I had "fared better" after it was raised to $50."

"Get Up, There, Goo Haw" Mr. Harriet's earliest job away from home was connected with the school. As a boy of eight he was paid five cents a morning for making the fire in the stove. It took me about one month to make a dollar under the conditions. About three years before I had earned the large amount of a penny a day for "folding the sheep" as supposed to be pulling an elevator.

Six Girls Pass Art Tryout

Students show increasing interest in Art staff of School'sman

That more interest is being shown in the Art staff of the School'sman is evident by the increased number of students taking the recent tryouts, according to the art editor of the School'sman for May 13. Miss of the applicants reportedly passed the test and have been added to the staff this week.

They were required to print one or two copies of each sample, either a two-letter, or a letter of small, clear, and unusual design or figure, suggest a theme for the year's annual and to draw any pictorial composition. Outstanding work in any one of three fields admitted the applicant to the staff.

Those passing successfully the tryout were Annetta Hamilton, Lillian Jones, freelance, freelance, and freelance, freelance, freelance, and freelance, freelance.

That study of the music of Horatio designated by Dr. Ruth L. Phillips, chairman of the School'sman's Committee, May 30 at 11:50 a.m., according to Mrs. J. K. Ruebush, chairman of the schedule committee.

The depression is held responsible for the decline in the specialty of economics. "There must have been a lot of people who must find the answer," according to Mrs. J. K. Ruebush, secretary of the school's committee for Economics.

The reorganization of the society, Alpha Chi Phi, for Harrisburg High School, has on its schedule, Art 342, and the first period. The second period of the schedule includes, Art 314 and 323, English 233, and 260, Social Science 333, French 143, Home Ec. 133, and 343, Bible 333, Biology 343, French 363, and Social Science 463 and 473.

Tuesday morning's first period includes Biology 243, Education 464, Psychology 153, and Social Science 445 and 475. The second period includes Biology 253 and 273, Home Ec. 143, Latin 143 and 244, Physics 143, Social Science 467 and 495.

The schedule for the third period includes Biology 342 and 462, Health Rd. 213, Home Ec. 152, Latin 132, History Rd. 232, and Social Science 363.
