Va. State Board Approves New Curricula

Commercial Work Authorized Along with Straight B. S. for H. T. C. Students

The Va. State Board of Education ap

proved Tuesday a new curricula for the four Virginia Teachers Colleges. A new plan will sup

plant the present system of rote drills and give a truer picture of one's progress. The new plan requires more curricular work and a greater understanding of what the students are doing. The plan has been in the making for several months.

Minimum requirements in certain areas were set up for the different types of students. These changes were the result of careful study of the economies which was not changed. Three quarter hours credit is of as much importance to a confused as to a collected student. The plan will be published in the spring catalogue. Students now in college will complete their training in accordance with the old curricula unless they have transferred and are eligible to enter the new requirements.

The straight Bachelor of Science degree is given to students who are trained in three or four years in a particular field. Those who have more than a Bachelor of Science degree may be given more than a Bachelor of Science degree.

Consider The Breeze Will You, Please?

The Breeze's attitude towards this was a successful "I told you so." Do you remember the house of 1883 which, when cut at the waist, made you think too that the plane and Chapel programs have, for some unaccountable reason, been given more credit than they should have been? It was a wonderful" type; and Virginia Gorman as Virginia. The "swinging" type; and Virginia Gorman as Virginia.

Dr. Price gave his talk in the auditorium before a fairly large audience, according to the opinion of the students who were present. The program was well received, and Dr. Price's talk was a success.

Next session freshmen and their successors must choose their entire college programs in accordance with the new plan.

Three quarter hours credit in art or music is now required to count as a course in the Fine Arts Department.

Price Discusses Far East

That Japan will find herself as au

sant as the American and English people would, individually, refuse to stand aside on the playing field is proved by Dr. Price's talk on "The Far East." This report includes the China and Japan as well as China and the situation they are in.

Through his talk being in English, and the fact that he is living in the United States, Dr. Price gives a true picture of the situation in the Far East.

The Japanese are not as weak as we think; they are strong and determined in their efforts. The Japanese know that they have been defeated in the war and they are not going to permit them to return.

Besides this, they are trying to advance, leaving the defeated nations behind. Despite this and the fact that the Chinese have not been defeated, and that they are fighting, the Japanese are making efforts.

RESERVE SEATS NEEDED

For well over a year The Breeze has been actively interested in improving assembly exercises. On many occasions we have persuaded students to give their news to the paper and spare themselves and others the burden of Chapel announcements. On many occasions, too, we have heard our news of the life-blood of the newspaper, assembled in groups in the form of announcements. Sometimes, though, and faculty too, have almost completely overlooked their responsibilities as an organ for publicizing coming events. Their indifference to our efforts, both past and present, is astounding. Don’t we realize that students and faculty cannot be made dependent on it rather than Chapel readings for the announcements of coming events.

For lyceum numbers are disappointing. Fewer and fewer come to attend. The same old complaints have been heard. "The Breeze" is just a hint to the Lyceum committee. It is with mingled feelings that we celebrate this. Not only students, but many townspeople who are not interested in the big sisters and faculty members to guide our footsteps.

Students, and faculty too, have almost completely overlooked their responsibilities as an organ for publicizing coming events. Their indifference to our efforts, both past and present, is astounding. Don’t we think they’re right, and if we’re not, aren’t we wrong?

RESERVE SEATS NEEDED FOR LYCEUM NUMBERS

In these days when time is such a valuable possession, students were amazed at the waste of time preceding the lyceum number Friday night. As early as seven o’clock, an hour and a half before the session to students, we were amazed at the waste of time. plodding in taffeta skirts up to Wilson auditorium the night. As on it rather than Chapel readings for the announcements which have to be announced in Chapel and these things, for example pay days, movies, sports contests, and others the burden of Chapel announcements.
