Dr. Theodore Jack, President of Randolph-Macon Woman's College, delivered the address of installation of Student Government Officers at the Convocation exercises on Monday.

Eminent Educator Leads Landmarks and Ranks in Advancement of Student Government

"Student government is the finest type of laboratory for the investigation, education, and development of the principles of democracy," declared Dr. Theodore, R. Jack, president of Randolph-Macon Woman's College, at the convocation exercises on Monday.

"Democracy is the most impressive single ideal that America has contributed to civilization," Dr. Jack continued. "Through student government, pupils learn the principles and responsibilities of democracy in a little democracy of their own.

"The college courses emphasizes more than the formal curriculum. Student government is a significant and essential part of it. Through participation in the organization, students learn the lessons of responsible citizenship. They learn to select leaders, to place, and to evaluate.

"You've often commented on the high type of student government at Madison College, adding, "The organizing principle of democracy is for the active participation of all the people concerned in selecting representatives, making the organizations and laying down fundamental principles. The success of student government rests with the students themselves."
