THE BREEZE

THE BUILDING OF LEARNING INCREASES

As times have changed, standards, customs, and morals have likewise changed. Let us consider the most primitive annals of groups recognizing certain untouchables. The Roman Horatius Cocles was a standing figure by more strength of body and by more endurance of abuse. The features of the non-white race became a visible personal appearance, his wealth, and his intelligence. At the present time, outstanding individuals are mocked because of the latter. 'Tis not his physical yell. When our opponents fail to score don't applaud. Don't hiss them. Communities and states and nations alike. Man has been given a highly personal appearance, his wealth, and his intelligence. At the present time, the proceeds of which are going to make the swimming pool possible.

The Bells

The faculty and students at Farmville seemed to enjoy having their guests. Social features were sandwiched between meetings and refreshments. Miss Mary Cox, Farmville's deacon of women, entertained the visiting deans of women at a luncheon on the college campus. At the same time, Miss J. R. M. Jarman, president of Farmville, entertained the presidents. Matter of fact, the visit was for the handling of English differences in standards of teaching and of the curricula of the elementary schools were discussed.

TWO STATESMENTS ARE NOTED

In an education class the other day two noteworthy statements were made. One was in the effect that "the profession is too limited and the business profession is more limited." Such being the case, education has failed in its purpose that of drawing men together that they may live in the whole human race will rise to. Professionalism, industrialism and the divided their interests become. After trying to be like the rest of the crowd for a while some energetic youngster decides to do things his way. The next most serious detail of the college is that here are about forty-two in the college who seem inclined, to be followers of the physical examiners. He is the one who has bad teeth, eyes, noses or even to twist sideward. Spinal defects and foot trouble keep from college most of these have been ironed out and the health standards.

OPEN FORUM

Dear Editor,

Wish I could say that we not have a tea room on the campus. It is very convenient and enjoyable. More people are using it. There are many girls who would like to serve in the tea room. But as we are not given the chance. It seems that the students who are members of the Home Economics are allowed to serve in the tea room. There are many girls who would like to have this service to the college. There- nes to make it possible for girls, other than the Home Economics department, to volunteer their ser- vices. Sincerely, A Willing Helper.

"WHEN I WAS ONE AND TWENTY."

When I was one-and-twenty I heard a wise man say. "The youth's full of speech and pleasure."

But not your heart away; Give peace, my boy; But keep your fancy free."

No use to talk to me when I was one-and-twenty I heard him say again, "That boy of yours was never given in vain." And sold for endless out. I am and I am two-and-twenty. Oh, the girls, alas! A storm of course. Oh, I thought the blindman was the inside of a chicken."

TWO PHYSICAL DEFECTS ARE PRESENTLY HERE

"Can you a cant, a humped old camel, and have you a hump in your back?"

"Is she a deep sleep, turtle, when the jumping is just right?"

"She is not healthy or not healthy. What is physically wrong with the student?"

Franklin, in the infancy it has been found that spinal defects and foot trouble keeps from being physically perfect. Nearly half of all the freshmen are found to have these defects. This, of course, is taken from statistics of the physical examiners. With the one hundred and thirty-five spines in which they were inclined, to be followers of the physical examiners. He is the one who has bad teeth, eyes, noses or even to twist sideward. Spinal defects and foot trouble keep from college most of these have been ironed out and the health standards.

BRIDGE PARTY GIVEN RUTH FITCHETT

Among the social events taking place last week, was a pretty bridge party given by Ruth Fitchett's birthday. The party was given as a surprise to Ruth for her eighteenth birthday. The party was highly attended. The prize for high score going to Bessie Hill, who was also given Ruth. During the course of the evening interesting reflections were served the guests.

Matter of fact, the visit was for the handling of English differences in standards of teaching and of the curricula of the elementary schools were discussed.

"When I was one-and-twenty I heard a wise man say. It is a sight."

The two nickles, ten dimes, four quarters, or a green back, if you have not your knot."

In the jam—

No use to talk to me when I was one-and-twenty I heard him say again, "That boy of yours was never given in vain." And sold for endless out. I am and I am two-and-twenty. Oh, the girls, alas! A storm of course. Oh, I thought the blindman was the inside of a chicken."

In that pansy by the wall,        """"

HIDEOUS GENERATION IS FORSEEN

The next generation has been pic-
tured as "hate-filled, chinch-them-
shoulder, and спид-дап-дап" by Joseph Billings. Di-
rector of National Physical Education Service of New York City.

The above opinions were given as the result of a careful re-
search by the teachers of the future will have brains, though not the moral fiber.

The concerns were forwarded by Dr. Effinger, of the New Jer-
sy State College, and Dr. W. D. Day, of the University of Vermont.

Temperament, that thing which we
are taught to call character, will now
be turned aside.

Morale, that thing which we
are taught to call character, will now
be turned aside.

The Brownie, that newspaper pub-
lished by the American Association of Teachers of Children in its
barrenness, is warred against. But it
would seem to be more intelligent.
