Uber, the mobile ride-on-demand app, has arrived in Harrisonburg.

The app features a call-booking service called “UberX,” which allows users to request a ride on an as-available basis.

Users can book a trip through the app and choose an appropriate car type based on their comfort needs.

By VICTORIA HOLLAND / contributing writer

Uber riders can select from a variety of car types, including

- “UberX” for mid-range to hybrid cars
- “UberX Select” for newer, more luxurious cars
- “UberLUX” for luxury vehicles

The app also allows users to rate their experience with drivers, which helps improve the quality of service.

“With Uber, you get what you need and it’s a really good experience,” said a rider who recently used the service.

The app has been well-received by both riders and drivers, with many praising the convenience and reliability it offers.

Funding faculty innovation

Madison Trust backs staff ideas

By EVAN MULLALISH / The Breeze

Recently, JMU offered renewed success with its faculty crowd grant projects, a program involving several interested faculty members submitting proposals for personal projects that both JMU and the project itself could become known as "engaged university."

The program proved to be wildly popular among faculty, eventually having its operating budget doubled and being renewed for another semester.

Now, a new project is underway, and it operates similarly as a grant program. In collaboration with the Green Android Center on East Campus, the Madison Trust is evaluating the use of interested student ideas to help fund personal projects.

The program is labeled "Shark Tank," an award-winning ABC reality series in which entrepreneurial pitch business proposals to a team of venture capitalists interested in funding new ideas — the investors being the show’s titular “sharks.”

The Madison Trust follows the same format, with only JMU faculty members and alumni serving the roles of entrepreneur and investor, respectively.

“Madison Trust was run in a similar way to subsidize faculty and student creativity and innovation in areas that were not already the focus of operating budgets," said Brian Shull, Harrisonburg’s economic development director. "Activities that match."

Solar system to be modeled across campus

By CHRIS HOGAN

JMU aims to construct a scale model of the solar system stretching across campus. JMU’s Institute for Innovation in Health and Human Services also hopes to receive funding for one of his collaborative projects: a thermo-power wave battery, purportedly a more efficient method of energy storage.

Costel Constantin, an assistant professor in the Department of Interdisciplinary Liberal Studies, shortly after becoming director of the Department of Interdisciplinary Liberal Studies, shortly after becoming director of Health and Human Services, has been inspired to create the project by a team of professors led by a local skilled designer.

"An MIT professor came up with a novel idea for a film used in the 1930s. When combined with the correct insulating material, this battery allows for a high electrochemical power density, or high negative chaos on one terminal and negative chaos on the other," Constantin said. "What happened in the battery was that the positive and negative charge, and when you close the circuit, the electrons want to combine with the positive charge to form a positive chaos."

Constantin went on to describe how the battery would likely use a certain level of optimism about its outcome. "As every teacher knows, you plant seeds and you often don’t see the immediate impact of them," Moore said. "So, I’m hoping that, over time, people will think more about it and … I’m hoping that our students and faculty will be interested in it and help it continue to grow."

"It’s a very exciting time for us at JMU," Constantin said. "We’re excited to continue to support the thousands of people who visit JMU and our planetarium every year to get a very real sense of the size scale of our own solar system and to learn more about the successes and failures of our current solar system."
Physician assistant discusses life as a new professor at JMU

Before becoming an associate professor in the Department of Health Sciences at JMU, Ashley K. Blaney, a graduate of the College of William and Mary with a Bachelor of Science in Neurology, moved to Harrisonburg in 2001 to be by her brother, who was attending JMU. She felt in love with the area and after receiving her Master of Medical Science from Wake Forest University and earning her Master of Medical Science from Wake Forest University, she joined the Department of Health Sciences at JMU. According to Blaney, “Teaching at JMU was the obvious choice for me. I love the Shenandoah Region of the Virginia Academy of Physician Assistants, an organization that helps to strengthen and promote the PA profession in the area. As a result, I am involved in the New Faculty Academy at JMU which provides support and mentoring to new faculty members.”

What’s your background? I’m super organized, and OCD, so I would say that my biggest pet peeve would be messiness. My boss at the Health Center used to manage my desk when I had a day off, just because he knew it would drive me crazy. Because I have a 16-month-old at home, I have had to relax a little bit on that.

What are your hobbies? I love sports and my family. I play volleyball and softball in my community. I actually met my husband, John, playing softball about five years ago. We have been married for two and a half years, and we adopted a sweet dog, Nova. We live our life with them there together.

UBER Safe rides fee included

Research shows the percentage of participants is decreasing due to the high cost of the ride. Providing a minimum amount of rides can make a significant difference in the number of rides.

One of the main arguments is that the cost of the ride should be increased, but for some participants, it is already too high. In order to address this issue, researchers propose providing a minimum fee for rides.

“Safe rides fee included” says Blaney. “In order to address the high cost of the ride, providing a minimum fee for rides is necessary. This will help to ensure that riders are able to afford the ride and make it more accessible.”

According to Blaney, “Providing a minimum fee for rides is essential for the success of the ride. This will help to ensure that riders are able to afford the ride and make it more accessible. It will also help to reduce the number of riders who are unable to afford the ride.”

In addition, providing a minimum fee for rides will help to ensure that riders are able to make a profit. This will help to reduce the number of rides that are unable to make a profit, which will help to reduce the number of riders who are unable to afford the ride.

According to Blaney, “Providing a minimum fee for rides is essential for the success of the ride. This will help to ensure that riders are able to afford the ride and make it more accessible. It will also help to reduce the number of riders who are unable to afford the ride.”

In addition, providing a minimum fee for rides will help to ensure that riders are able to make a profit. This will help to reduce the number of rides that are unable to make a profit, which will help to reduce the number of riders who are unable to afford the ride.

The TV show "That ’70s Show" is a nostalgic look back at the 1970s, celebrating the music, fashion and culture of that era. The show revolves around the lives of the quintessential 1970s suburban family, the Plimpsons. The family consists of- 

**The Characters:**
- **Michael (Mike) Class:** The brains of the bunch, Mike is known for his intelligence and his love for learning. He is often seen studying or playing a game of Dungeons & Dragons.
- **Jack (Jack) Class:** Jack is the rebel of the family, always looking for ways to push the boundaries and break the rules. He is often seen with friends like Fez and Kelso.
- **Kelso (Kelso) Class:** Kelso is the one who is always looking for a new adventure, whether it’s skateboarding or exploring the city. He is often seen with his friends like Donna and Jackie.
- **Donna (Donna) Class:** Donna is the heart of the family, always looking out for her friends and loved ones. She is often seen as a social lubricant, helping to break down stereotypes and bring people together.
- **Jackie (Jackie) Class:** Jackie is the youngest of the family, always looking for ways to have fun and enjoy life. She is often seen as the source of light in the family, always bringing a smile to their faces.

**The Plot:**
The show follows the lives of the Plimpsons as they navigate their way through the 1970s. The family faces various challenges, from dealing with their own personal issues to facing societal norms and expectations. The show is filled with humor, love, and heart, making it a timeless classic that continues to resonate with viewers today.

**The Themes:**
- **Rebellion:** The show portrays the rebellion of the 1970s, with characters pushing against the status quo and defying expectations.
- **Exploration:** The show celebrates the exploration of the 1970s, with characters seeking new experiences and new adventures.
- **Friendship:** The show highlights the importance of friendship and community, showing how a group of friends can support and uplift each other through the ups and downs of life.

**The Impact:**
"That ’70s Show" has had a significant impact on popular culture, inspiring generations of fans to explore and appreciate the 1970s. The show has also become a source of nostalgia for many, providing a glimpse into a time that has long passed but continues to live on in our memories.

**Conclusion:**
In conclusion, "That ’70s Show" is a timeless classic that continues to resonate with viewers today. The show celebrates the rebellion and exploration of the 1970s, highlighting the importance of friendship and community. It is a show that has stood the test of time, and one that continues to inspire and entertain fans around the world.

One love, one beat

Local DJ Ronnie “iRon Lion” Brandon performs his first Xtreme reggae night at Dave’s Taverna Express last Wednesday, Oct. 28. Although only two people attended, Brandon hopes to grow his audience.

His stage name came from the popular Jamaican language, Patois. Brandon said, “It’s everybody’s culture.” Brandon even said, “it’s just music, music is truth.”

“We have been together for four years and have been married since March. He went to high school right here in Harrisonburg and started performing in town. However, like many performers, he started out small. Brandon brought and performed two songs from his tape, one in which he seemed to be struggling. He then brought up a song from Bob Marley, Steel Pulse and Toots and the Maytals. It was a great performance. Brandon said, “My favorite part of performing is pleasing people and seeing people have a good time. I just want it to be giving.”

“I’m a musician and DJ named Ronnie Brandon, will host and occasionally bring in live bands. His mixes will feature Bob Marley, Steel Pulse, SOJA and Toots and the Maytals. His stage name came from the popular Jamaican language, Patois. Brandon said, “It’s everybody’s culture.” Brandon even said, “it’s just music, music is truth.”

“As a result, he decided to donate a portion of the proceeds to their cookie cravings. “It’ll be up to the members of the community to decide where to go to satisfy their cookie cravings. “It’s inevitable to have competition to some degree, and we’re certainly in a good position to handle the situation,” Davidson said. “The terms and timing didn’t align, and there’s nothing I love more than the working on the creative canvas that is Campus Cookies. ”

“While it’s a major support system, we were flattered by their buyout offer — they saw something very special, ” Brandon said. “We’re flattered by their buyout offer — they saw something very special.”

“Since we reopened, this will be our third reggae night,” Jeff Funk, the front-house manager of Dave’s Taverna Express, said. Brandon’s hope is to cater specifically to the JMU community. “This is all about JMU,” Brandon said. “That’s why my stage name is what I used to people to see.”

Contacts: D.J. Iton Lion, Brandon said, “I would be open to it.”

Their goal is to make Dave’s Taverna Express a music venue for music lovers.

As soon as the audience was seated, and the DJ introduced翻开首张专辑以来，已经给人们带来了无数的欢乐和享受。他的音乐充满了热情和活力，总能让人忘记所有烦恼，沉浸在音乐的海洋中。

As a result, he decided to donate a portion of the proceeds from his purchase to our local charity. Brandon’s hope is to make Dave’s Taverna Express a music venue for music lovers.

In honor of the grand opening of Insomnia Cookies in Harrisonburg later this month, the bakery will be offering free cookies to all of the customers who present the “free cookie coupon” at the store which is located on University Boulevard. Brandon brought and performed two songs from his tape, one in which he seemed to be struggling. He then brought up a song from Bob Marley, Steel Pulse and Toots and the Maytals. It was a great performance. Brandon said, “My favorite part of performing is pleasing people and seeing people have a good time. I just want it to be giving.”

“We were flattered by their buyout offer — they saw something very special,” Brandon said. “Now that I say it, seems like a lot of the working on the creative canvas that is Campus Cookies. ”

The cookies average at about $1.45, while deluxe, or bigger cookies, cost $2.95. According to Altamura, the most popular Insomnia Cookie flavors include: Chocolate Chunk, a cookie filled with chunks of rich chocolate inside a chocolate cookie, and the Oatmeal Chocolate Chip, a classic cookie packed with chocolate pieces, marshmallows and chocolate chunks baked into a chocolate cookie. The cookies are sold at stores in D.C., Maryland and even North Carolina. His wife has always been a major support system.

The Dukes (7-3, 3-2 Colonial Athletic Associa- tion) enter postseason play as one of five conference teams with winning records. The CAA’s top five include Richmond (7-4), Old Dominion (6-5), James Madison and Delaware (5-6). The Dukes are currently in third place in the conference, its chances at competing for a conference championship are slimming. However, through nine games, the Dukes have sported one of the most prolific offenses in the entire Football Championship Subdivision (FCS). The offense ranks 25th in total yards, 24th in total offense and 17th in points. Richmond and Delaware rank 3rd and 18th in scoring offense respectively.

While the loss of starting redshirt senior quarterback Vad Lee toward the end of the Oct. 24 matchup against Richmond was a major blow, the Dukes have been able to maintain a level offensive performance. The offense has scored 14 touchdowns in its last three games, highlighted by their 34-0 victory over the Fordham Rams in Week 5. But the team has had little trouble getting into the end zone, ranking 22nd in touches on the year while forcing 10 turnovers, including eight interception. Redshirt sophomore Broadway Andrew Ankrah leads the way for the Dukes in tackles with 94, followed by fellow linebacker and team captain Andrew Lister’s 86. Cornerback Taylor Reynolds has three interceptions, followed by his 41.5 sack units on the road against Old Dominion.

But the team has had little trouble getting into the end zone, ranking 22nd in touches on the year while forcing 10 turnovers, including eight interception. Redshirt sophomore Broadway Andrew Ankrah leads the way for the Dukes in tackles with 94, followed by fellow linebacker and team captain Andrew Lister’s 86. Cornerback Taylor Reynolds has three interceptions, followed by his 41.5 sack units on the road against Old Dominion.

The offensive line has been no small contribu- tion to the Dukes’ success, holding down the fort in front of Vad Lee for the last nine games. The front five average 41.3 yards per game rushing and have given up just 14 yards per carry, ranking first in the nation in run defense.

The defense has been the bright spot for the Dukes this season. JMU ranks near the bottom of the conference in scoring (15.3) and total defense (384.5), but the Dukes still have room to work with. While the loss of starting redshirt senior cornerback Kevin Tutt has been huge for the Dukes, other players have stepped up to fill his shoes.

Last season, the Dukes swept all opposing teams in the Colonial Athletic Association Pod meet, moving to a perfect 5-0 record in the conference.

Assessing the Dukes

A bye week evaluation of where JMU football stands
The punishment is fair

By BLAKE GIUSTI

Ohio State University quarterback J.T. Barrett was suspended for a similar run-in with law in 2012 for a similar run-in with law that Meyer is consistent, as he revoked his scholarship for a guy who has never had to serve a suspension since entering college will mean something. When you take away his apologies to his teammates. A one-game suspension will have a similar effect on Barrett’s life. Too harsh of a punishment could’ve done just that. It would’ve been an easy call to make as a head coach.

Revoking his scholarship proves the revoking of J.T. Barrett’s scholarship includes a one-game suspension and Athletic Director Gene Smith have already suspended him for one game after being cited for operating a motor vehicle while impaired. Head coach Urban Meyer and Ohio State may officially naming him the starter isn’t about how poor Meyer is at handing out suspensions, but the time to learn from them. It would’ve been a shame for this to have a decisive effect on Barrett’s life. Too harsh of a punishment could’ve done just that.

By DANIEL WARE

Once over the weekend, Ohio State University starting quarterback J.T. Barrett was suspended for one game after being cited for operating a motor vehicle while impaired, which is the same thing as drinking and driving, a DUI. Barrett is also just 20 years old, so some would think the punishment would be even more severe. On Monday, reports originally surfaced that Barrett had tested positive for alcohol, but that is not the case. The Ohio State University starting quarterback J.T. Barrett was suspended for one game after being cited for operating a motor vehicle while impaired.
