DEBATABILITY

There are, indeed, a comparatively small number of girls on the campus who are interested in debating, but those who are, are sincere and have shown that they mean business. The debating societies make writing a part of their work. Why should not, therefore, more emphasis be placed on written material, making written material more prominent here, and giving to the literary societies a more varied program, a fuller representation of the written word. Some people are so pessimistic that they look for splinters in club sand-wiches. The room seemed so untidy and I couldn't seem to concentrate, though I was full before. I never saw a day so long, nor one so short. And then I went to meet the bus—and the room seemed so untidy and I couldn't seem to concentrate, though I was full before. My skirt did not hang even, my hair was untidy and untidiness of its own. The clock. When the bell rings, the story will pick up where it left off. And then I went to meet the bus—and the room seemed so untidy and I couldn't seem to concentrate, though I was full before. And the next time I shall lag away when my room-mate goes away. Is it possible for the new one to do what I did? I don't know. I can't, of course, be sure, for that is what a writer experiences when he is alone. But if a writer experiences what I did, it is not too late to become interested in debating. Courage is necessary just as much as ability. Some of the writers who have become interested in debating are: Isabel Lanford, Vivian McDonald, Elizabeth Grubb and Marjorie Ober. It is not too late to become interested in debating; it is not too late to become interested in writing, and to try to find the place in her memory book from the bottom to the top. It is not too late to become interested in debate; it is not too late to become interested in the written word. Is not courage as necessary in debate as in writing? Courage stays with one in private life and in public. Did you ever think of what it means to you when you are alone? It takes courage to be fair, sometimes, when one knows a sacrifice he has made will never be recognized. It takes courage to answer to the question, "For what purpose am I here, and am I fulfilling that purpose?" Some may consider an act of interest to end one's life, but when one considers suicide it is proof that he is no longer has the courage to face the problems that life offers. Courage is weakness recognized as such, but "To think, then, is to be true." LEND A HAND, LITERATES

The literary societies on the campus have long striven to make the study of literature a part of the curriculum of the most worthy organization, the freshman. The freshmen are most interested in literature, and are most interested in literary societies. Our literary societies are made up entirely of freshmen, and are mostly interested in literary societies.
