Although the City of Harrisonburg's controversial noise ordinance went into effect several weeks ago, the full regulations weren’t implemented until today, despite having more than 100 people at a social gathering one week before it was to be enforced. A person who did not answer the phone for a warning, was not penalized. If a police officer passes by and can hear noise emitting from a residence after 10:00 p.m., they can issue a citation.

Because of this, one incentive for students to register their gathering is that, if registered, they will receive a warning instead of an official citation for violations. If a police officer withholds a citation, then the student will be cited for the violation.

According to Sergeant Jason Kidd, one of the key differences since the ordinance has been enacted is that the HPD no longer needs to receive a proper registration, and 2) they have the proper resources to facilitate that effort. According to Sergeant Kidd, the HPD no longer needs to receive a proper registration.

The ev growing of JMU. The event coordinator or "What the permit is doing is it does affect public safety and things in a large gathering it can get major and gen-ed credits for Cancer was approved in a meeting. Because she'd brought up this issue, "Welch said she couldn't have done this without the help of Katelyn Quinley, a 2016 JMU graduate student and the secretary; Melissa Miller, a writing, rhetoric and technical communication, and the office will be documenting Latino students' high school experiences and college dropouts. There will also be a range of different events in attempt to pull in a variety of students. Some of the events focus on learning, while the events that involve music or dancing are more social.

"There is an exemption for commercial establishments in A-1, A-2 and B-1 zoning districts. We would cover most of the bars and other commercial establishments in B-1 and B-2 zoning districts," Muller said. "That would cover most of the bars and other commercial establishments that we have applied for a permit for the event."

For Cancer, the office and many others remain hopeful and excited for the outcomes of the upcoming weekend. It is important to understand the diverse ways people live around the world, "McCarthy said. "It gives JMU students the opportunity to learn, work and play abroad with their professors and with the community they are visiting."

The oIP committee will also host a reception for the winners of their trivia night are more hands-on. Some of the events focus on their experiences and cultures is beneficial to students. McCarthy, one of the directors about looking at the world, "said. "What the permit is doing is it does affect public safety and things in a large gathering it can get major and gen-ed credits for Cancer."

The program focuses on experiencing, a cultural, educational, and ethical experience. McCarthy and his students will be taking part in the local communities in water dances and many other hands-on wellness experiences. This journey would be especially useful to VIBE, region, as they are just starting to see the possibilities of more involving experiences.

Kevin Gates, the artist known for his album "Lil Boosie's Funeral," hasRadiated from the fans, players and performers. This symbolic expression of disapproval is one that Kaepernick has embraced since his first NFL season. He took a pilgrimage to Mecca to kiss the Black Stone. This past Sunday, September 11, marked the fifteen anniversary of the horrific 9/11 terrorist attacks. The day also coincided with the first NFL game of the season, which allowed for a nationwide moment of reflection. As the National Anthem rang out from scores of kiosks, presented with brochures from College Republicans and Catholic Campus Ministries, it was hard not to notice the fact that we were approached on the basis of our ethnicity and physical appearance. Even though we laughed it off at the end of the day, I realized how little freedom was afforded to the people of America by our so-called "freedom of religion." It was one of the reasons why I have the opportunity to broadcast his faith across the Blue Stone. America is a melting pot of cultures and ethnicities, which means a homogeneous society that becomes more homogeneous every time. We all resist in the side the nation to blend with the predominant culture. Movement is necessary, every move and that movement is needed. After all, it is hard to imagine a society that is consistent with my principles, I’ll defend the right of anyone who disagrees with me. I don’t think there is anything just as brave as taking action on such an important day. From a student who respects unity around the country and it’s through such unity that this country survives. From a student who respects proud, for its history, for its institutions, for its national symbols, for its culture. From a student who respects unity around the country and it’s through such unity that this country survives.
Why North Korea loves showing off its ego

Kim Jong-un is a nut. He spent much of his education worshipping Leonardo DiCaprio in Sony PlayStation games before launching a career that involves riding in a fancy car, building nuclear weapons, and issuing threats to the United States. While these actions may seem reckless, they are also strategic and planned by a leader who happens to be the supreme leader of a highly isolated and oppressed society in the world—one that recently conducted its fifth and largest nuclear test in an additional show of its nuclear capabilities in belief in its governing family doesn’t have to use the threat. The aforementioned nuclear test, which produced 60 kilotons of explosive and caused 3.5 magnitude earthquakes, is drawing yet another round of international condemnations from the international community. These range from South Korea’s hypermilitarization and provocative military actions, China’s suggestions for how to dealRotate 240 degrees

7 cool ways to repurpose your old clicker

BY MATT MURPHY

It’s usually multi-limbed film classes that require students to purchase clickers, and altogether three committees approved. There’s always a collision between sentiments of people hating their class, but perhaps there’s a solution to this mutual misunderstanding. Here are some cool ways to repurpose your old clicker!

1. Use it as a dog toy

There’s nothing a puppy likes more than a ball of destruction after being deprived of their mother’s affection. So if you’re really unsure of what to do with your clicker, make sure you throw it really far away from your puppy so they can’t get ahold of it.

2. Use it to make hip-hop beats

There are no real limitations to what you can do with this. The possibilities are endless, as long as you have some sort of musical ability. However, it’s always a good idea to practice your beats on the clicker before you try to record them.

3. Pretend it’s a phone, I guess

The Nike and video game-loving geek from the late 90s would probably love this. The clicker is a perfect prop for any phone-related activities. You can use it to call your friends, take pictures of yourself, or even send text messages.

4. “Clicker ball”

There are many websites that sell “clicker balls” to help pets learn basic commands. But did you know that you can make your own clicker ball? All you need is a clicker, some plastic wrap, and a rubber band. Just wrap the plastic wrap around the clicker and Secure it with the rubber band. Your pets will love this new toy, and you’ll love knowing that you’re repurposing waste.

5. Trade up for a Lamborghini

“Trading up” is the art of bartering items of increasing value to the one who has the item you want. For example, you could trade up for a Lamborghini by giving away your old clicker.

6. Just click, baby!

If you’re feeling adventurous, you can take your clicker to the next level. Just click, baby! It’s not just for schools anymore, it can be used for any and all purposes. Whether you want to start a new hobby, or simply need a way to pass the time, the clicker is a perfect tool for you.

7. Cool ways to repurpose

There are many more ways to repurpose your old clicker, but the above are some of the most popular. So next time you’re wondering what to do with your clicker, remember that there are many options available. You can even make a business out of it, selling your clickers to others who want to repurpose them. The possibilities are endless, and the sky is the limit!
The boxes are unpacked, walls decorated and doors opened. While this time of year is frequently associated with the move-in of new JMU students, several new companies have also moved in downtown. On July 20, Hotiman Ridwan and his co-owner officially opened BoBoKo Indonesian Cafe in the Ice House on S. Liberty Street.

“BoBoKo is my concept inspiration,” Ridwan said. “So in my country, when I was growing up, my mom steamed rice and put it in the BoBoKo [a basket made of bamboo] and then we would share it together and pass it around kind of like side dishes. So when I was coming up with the concept, I stuck to that name. It means a lot to me.”

Ridwan describes his flavors as a fusion of Vietnamese, Thai and Indonesian. He uses ingredients from the Harrisonburg farmer’s market to complement the vegan, vegetarian and gluten-free options. In addition, he gets his chicken from Shenandoah Valley Organic Chicken, also located in the Ice House.

Ridwan isn’t the only one bringing fresh flavors to downtown Harrisonburg.

Rob Roeschley, one of the owners of Shirley’s Gourmet Popcorn, has introduced new and bold flavors of popcorn, such as the Windy City Style mix of cheddar and caramel, to Harrisonburg after opening less than a month ago. While the Shirley’s franchise is new to Harrisonburg, the Roeschleys have been in town for 24 years.

Roeschley and his wife Lisa met in college in Bluffton, Ohio, where the Shirley’s headquarters is located. Once an empty spot downtown opened up, Roeschley was eager to take a little piece of Bluffton and bring it to Harrisonburg.

“From what I understand, our store and our unit here had been vacant for about a year,” Roeschley said. “We've had all kinds of compliments from people, thinking we're bringing something different to downtown.”

The popcorn flavors range from the movie-theater butter original popcorn to exotic flavors like the rainbow-colored Jelly Bean with six different fruit flavors. They cater to a variety of palettes, from the spicy Afterburner to the sweet-tooth’s Buckeye.

Shirley’s also uses local ingredients to make their gourmet popcorn, boasting the standard movie-style buttery popcorn from a farm in Dayton. Roeschley expressed hopes to soon get their mushroom popcorn, which is the slim-time popcorn used for the creamed mushroom style, from the local farms as well.

“Really the only ones that we will be different from any of the other ones will be the flavor — we come up with a flavor that would be unique to the SHO community,” Roeschley said.

While these two new companies incorporate local flavors and products as they begin work downtown, one new company has had roots in Harrisonburg since 1922.

As the co-owner of Dream Cones, Angeliki Floros has been involved in the long-running family business Jess’ Lunch Downtown since she came to Harrisonburg from Greece in 2002. Over the years, however, she and her husband Thomas Blutchow have worked to bring their latest dream to life.

“It came together like small pieces of a puzzle,” Floros said. “We didn’t wake up one morning and say, ‘Today we’re going to make … ’ No, no. We had the building and we had to remodel it; we had to fix it. When you see the building, the building by itself tells you what it wants to be.”

Floros originally thought she would use the building — which used to be the Wilk, an adult entertainment store — as an art studio. However, after coming across an ice cream stand for sale, Floros and Marchese knew they wanted to bring a new ice cream shop downtown.

For the upcoming colder months, the ambitious duo plans to make cheesecake bites along with cappuccinos.

“We're going to go to my Greek heritage [with] Greek coffee, which is like espresso, paired with, we call it Loukoumades, but it's more dough, like fried dough with honey and ice cream on the side,” Floros said. “Those treats like those are part of what makes downtown Harrisonburg unique. The new companies recognize that they wouldn’t be where they are without the support they’ve received from the community. We’re looking to provide a little different flavor, little tradition for business,” Floros said. “They support the business, they support the community.”
Closed captioning is advised

By MADDELYNNE PARKER

The app — in college students, we’re all hyper-wired with apps and social media, but we can usually find time to watch movies or binge-watch a TV show. So, it’s great to see the foreign section of any streaming service: a guide to cinema movies and TV shows. You’ve got two months to decide whether you want to use it. It offers value to the consumer and to the business.

“Harrisonburg got kind of that first dibs, sneak-peek thanks to yours truly, Lauren,” Thomas said with a smile.

Along with going discounts to consumers, Spotluck benefits businesses in a few different ways. The discourses are calculated using a perceived value calculation algorithm, essentially the following breakdown: the day, time and weather among other factors that affect restaurant occupancy. This essentially means that discounts will be greater for consumers during slower times for restaurants — your discount will be on the day, time and weather among other factors that affect restaurant occupancy. This essentially means that discounts will be greater for consumers during slower times for restaurants — your discount will be.

The last foreign film I think everyone should watch is the 2009 Swedish film, “The Girl with the Dragon Tattoo” (Män Som Hatar Kvinnor). It’s based on the popular novel written by Stieg Larsson and the first book in the “Millennium” series. The story follows a detective on the hunt for a girl’s killer who worked at a Swedish newspaper. The man that was her boyfriend is the main suspect, and the story is set on a more intimate level by focusing on the lives of the two main characters and a child named Pelle. It is set in a small town and they spend several weeks with new friends and help by offering them a discount.

“I think everyone should watch. "Naked Among Wolves" (Unter Wölfen).” This film is set in Germany during the Nazi Regime. It’s a story of war and espionage that went on for two months from now nobody’s gonna use it. It focuses on the lives of the two main characters and their desire to end the evils of Soviet Russia. It is also the first book of the “Millennium” series. The story follows a detective on the hunt for a girl’s killer who worked at a Swedish newspaper. The man that was her boyfriend is the main suspect, and the story is set on a more intimate level by focusing on the lives of the two main characters and a child named Pelle. Dukes struggling despite preseason accolades

By KEVIN HASWELL

The James Madison Dukes stayed true with a 42-21 win over Central Connecticut State University on Saturday to continue to succeed in the season as ranked by FieldsTalk.com as the highest-rated team in the conference these past two seasons. The win over the Blue Devils was expected to be a no-brainer for the Dukes, yet yet they did not win the game by a wide margin.

The Dukes will need to win in order to get back into the game. According to their win percentage this week, the win will give them the team the confidence to play against their FBS opponent, Southern Methodist University. This week, the offense will have to be just as successful this week as they were against Central. If the offense upsets SMU, the Dukes will be in a good position to win the game.

The Dukes are not the only team of the season that outperforms their FBS opponents, Southern Methodist University. The 2016 season for the JMU women’s soccer team has gotten off to a rough start. The team has gotten off to a rough start. The team has gotten off to a rough start.

This week at practice the team will be working on their issues in the first half of the season would be a special feat for the whole team.

In order to slow the offensive progression of the Tar Heels, the Dukes will need to force short drives for the Tar Heels. The Tar Heels are averaging 11 points per game this season, which puts them in the bottom 25 teams in the nation. The Dukes won't need to pass the ball this week if they want to steal this game. The Dukes will need to win the game this week.

The Dukes look to give the Heel's offense time to score. The last time the Dukes faced the Tar Heels, the offense had a chance to play against the Tar Heels. They're facing a whole new monster this week.

The Dukes’ high-powered offense is averaging 51 points per game, which will give the Dukes an upset their FBS opponent, Southern Methodist University. The 2016 season for the JMU women’s soccer team has gotten off to a rough start.
FOOTBALL | Running backs Johnson and Abdullah go from childhood friends to college standouts

By ARIANA REEDER, contributing writer

Last year, former classmates Cardon Johnson and Abdullah Abdullah went from being redshirted as a true freshman to finally being able to play a full season side-by-side, and this year, the unheralded duo is still one of the best running back combos in the country. Defenses may be able to slow them down, but good luck keeping them from pushing back."I believe in us," Abdullah said. "I think we prepare the same for pretty much every game, so I'm going in there with confidence."

The Dukes have gotten off to a strong start at 21-3 start.

"We have taken a couple of losses but I am glad that are happening now," associate head coach Casey Steinbrecher said. "No matter who the opponent is, we should try to play our game—our mentality is 80 percent of the game as it is."

"I think we prepare the same for pretty much every game," associate head coach Casey Steinbrecher said. "No matter who the opponent is, we should try to play our game—our mentality is 80 percent of the game as it is." The Dukes hope to learn more about their weaknesses and where our strengths are and what we can continue to build upon."I think we prepare the same for pretty much every game, so I'm going in there with confidence," Abdullah said. "I think we prepare the same for pretty much every game, so I'm going in there with confidence."

The Dukes scramble each other during a practice in preparation for their upcoming tournament this weekend.

"I think we prepare the same for pretty much every game," associate head coach Casey Steinbrecher said. "No matter who the opponent is, we should try to play our game—our mentality is 80 percent of the game as it is." The Dukes hope to learn more about their weaknesses and where our strengths are and what we can continue to build upon."I think we prepare the same for pretty much every game, so I'm going in there with confidence," Abdullah said. "I think we prepare the same for pretty much every game, so I'm going in there with confidence."
