Professor of Architectural Design

Reader: Sneha Patel, M.Arch. Princeton University  
B.Arch. Cornell University Instructor of Architectural
Design, Industrial Design and Foundations Art

Reader: Ronn Daniel, Ph.D. studies, University of
Chicago  
M.Arch., University of Illinois at Chicago
B.S.E. (Civil Engineering), Duke University Professor
of Architectural and Industrial Design

PUBLIC PRESENTATION

This work is accepted for presentation, in part or in full, at JMU Studio Center on April 28th, 2017.
The human population has practiced natural, herbal forms of medicine since the beginning of recorded healthcare. Only in the past 150 years have our ideas of healthcare evolved to what we know today, a reactive and immediate response to disease and illness. Using the science of phytotherapy and the processes of herbalism, this network of spaces work together to offer a traditional form of healing in a modernized setting. Prototyped in the city of Philadelphia, The FARMacy works alongside existing buildings to treat patients through an alternative yet instinctive form of medicine.
