AMATC: Sustainable Solutions for Humanitarian Mine Action, Reed-Matthee [from page 11]

1. The deminer's name has been changed to protect his identity.
2. Bozena 4 demining machine is a wheeled/tracked mechanical mine-clearance machine remotely controlled by transmitter designed for disposal of anti-personnel mines (both the pressure and tripwire fused) and anti-tank mines. For more information, visit <http://bit.ly/ibELLM>. Accessed 20 December 2010.

Capacity Building in Western Sahara, Caswell [from page 13]

1. The Berm (also known as the Moroccan Wall and the Wall of Shame) is a 3-kilometer high man-made defensive structure which completely divides Western Sahara between the Moroccan-controlled and Frente POLISARIO-controlled territories. Initially built to prevent Frente POLISARIO from seeking Western Sahara's independence, it has since forced many of the native Saharawi population into Algerian refugee camps.
2. Since the completion of the survey report in December 2008, more dangerous areas have been identified. The updated numbers are: 245 Dangerous Areas (206 cluster strikes, 38 minefields and one ammunition dump).
3. Level 3 EOD qualification is for a deminer with specific explosive ordnance disposal training in the clearance by unexploded-ordnance detonation, such as rocket and tank-gun ammunition, and artillery ammunition up to 240 mm; this includes High Explosive Anti-tank charges. Under the supervision and direction of a qualified supervisor, a Level 3 EOD deminer should be qualified to render safe UXO for removal from the demining worksite, and to undertake its final destruction. As stated in IMAS 09.30: *Explosive ordnance disposal*, First Edition, UNMAS (1 October 2001). <http://tinyurl.com/2apsqf3>. Accessed 18 November 2010.
4. Level 2 EOD qualification enables a deminer to undertake the destruction *in situ* of single small UXO such as submunitions, grenades and mortar ammunition up to 84 mm; this includes High Explosive Anti Tank charges. These categories of munitions normally represent the majority of UXO found in and around mined areas. As stated in IMAS 09.30: *Explosive ordnance disposal*, First Edition, UNMAS (1 October 2001). <http://tinyurl.com/2apsqf3>. Accessed 18 November 2010.

Building Knowledge and Partnerships in ERW Action, Shepp [from page 18]

1. The 2009 ERWTC included participants from Afghanistan, Azerbaijan, Cambodia, Chile, Ecuador, Guinea-Bissau, Iraq, Jordan, Lao PDR, Lebanon, Libya, Mauritania, Mozambique, Peru, the Palestinian Authority, Sudan, Tajikistan, Vietnam, Yemen and Zambia.
2. The 2010 ERWTC included participants from 20 countries and one multinational institution: Afghanistan, Angola, Bosnia and Herzegovina, Cambodia, Chad, Colombia, Ethiopia, Iraq, Jordan, Lao PDR, Montenegro, Nepal, Somalia, Sri Lanka, Sudan, Thailand, Uganda, Vietnam, Yemen and Zimbabwe, as well as the Organization of American States. (The participant from the OAS works in both Ecuador and Peru.)

Lessons Learned: Sri Lankan Mine-action Staff Visit Cambodia and Lao PDR, Kasack [from page 25]

1. Other measures include: training workshops for MRE NGOs, army, police, landmine safety briefings with security staff and Technical Working Groups at a national level that include all relevant stakeholders.
2. Only Lao PDR is party to the Cluster Munitions Convention as of October 2010; Cambodia and Sri Lanka are not signatories. Note that Sri Lanka states it has never used or possessed cluster munitions.
3. *Convention on Cluster Munitions*. Ratifications and Signatures. <http://bit.ly/cwIV0v>. Accessed 18 January 2011.
4. Cambodia visit participants: six government and three UNICEF officials, including: Director, Sri Lanka's National Mine Action Centre/ Ministry of Nation Building, MRE Representative-Ministry of Education, Provincial Department Director and MRE Representative Eastern Province, Zonal Director Education Kilinochchi, Northern Province, Assistant Director General National Institute of Education; Project Officer NIE; UNICEF Child Protection Program Officer Mine Action (Colombo); UNICEF consultant to Ministry of Education/National Institute of Education; UNICEF Child Protection Specialist-Mine Action.
5. Laos visit participants: one army official, three MRE-implementing NGOs, four UNICEF officials: SLA Commanding Officer Field Engineers; MRE-NGOs Community Trust Fund, EHED-Caritas, Sarvodaya; three UNICEF Child Protection Program Assistants and MRE/VA specialists; UNICEF Child Protection Specialist-Mine Action.

- The Nairobi Summit on a Mine-Free World is the name given to the First Review Conference of the *Convention on the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-personnel Mines and on Their Destruction*. The Nairobi Summit on a Mine-Free World was more than just another review of an international legal instrument. While the States Parties reviewed progress made to date, they equally identified remaining challenges, which led to the adoption of a powerful action plan to overcome these challenges. Moreover, the States Parties called for participation at the highest possible level in the Nairobi Summit's high-level session, which took place 2–3 December 2004. For more information: <http://tiny.cc/a3yrr>. Accessed 4 February 2011.
- Canadian delegate Earl Turcotte formerly served as director of the Mine Action and Small Arms Team in the International Security Branch of Foreign Affairs Canada. He also served as senior development adviser to the United Nations Development Programme Mine Action Team based in New York. From 1982 to 2004, he was with the Canadian International Development Agency in various capacities. Austrian delegate Markus Reiterer acted as Co-Chair of the Standing Committee on Victim Assistance of the Mine Ban Treaty, as victim-assistance coordinator under CCW Protocol V and played a leading role in the CCM negotiations.
