Children's Books
And Poetry
Are Discussed
in Chapel

ELECTIONS ARE READ BY MR. LOGAN AND MISS SEEGER

On Wednesday November 15 a program on the appreciation of Children's Literature was provided in chapel.

After the usual announcements, Mr. Logan, who was in charge of a special feature on "Shakespeare," gave a brief talk on the book "Gert"

in which he expressed his thoughts on the life and work of the famous English poet. The talk was most interesting and well received.

MR. LOGAN AND MISS SEEGER

... continued Friday night...
SAYS WOMEN ARE OCCUPYING BIGGER PLACE

New York, Nov.—As women are increasingly occupying more responsible positions in the field of achievement and advancement, women's organizations have a larger place in the social life of the world. So says Miss Anna V. Rice, New York, recently appointed head of the Woman's Auxiliary of the National Board, Young Women's Christian Association.

Miss Rice, in her address to the members of the council, indicated that as associate, Miss Rice will be the second vice-president of the National Board of Y.W.C.A. Miss Rice, who was born in 1874, is the daughter of the late Miss Helen Kelty Cratty, who was for many years associated with the Y.W.C.A., and who died last February, Miss Hel- den Kelty Huntley. Miss Rice is a woman of broad and varied experience. Miss Davis will also continue as an associate.

Miss Rice pointed out that greater place in the world is being occupied by women's organizations today, and said Miss Rice today—"As women are taking a more important place in public affairs, religion, education, and trade, women's movements are increasing.

Among organizations, the Y. W. C. A. occupies a unique position, she continued. "One of the reasons that I have for my conviction about this is that it is concerned with almost every interest of women. Presently, the Y. W. C. A. has a religious foundation, it has a broad educational foundation, and a social foundation, and is reaching directly into the home and school and girls of all types.

Another source of strength and hope lies in the fact that the association is interested as an international. With such wide fields for service, the most limited interest of that is that we are in need of a great deal of help."

Miss Rice will be associated with the Y. W. C. A. in Detroit as executive secretary of the Association there. In 1915 she went to the Hartford Theological Seminary for three years. There, Miss Rice took a B. A. in theology. In 1915, she became national secretary for religion education, and Miss W. C. A. She is at present Dean of the National School of Religion Education of the Y. W. C. A. for Professional Study. Her B. A. comes from Bryn Mawr University.

Miss Rice has been a Y. W. C. A. member for one year, and is a member of the National Board in September, 1926. She is also a member of the Women's Auxiliary of the National Board of Y. W.C.A. She was induced by the Y. W. C. A. to enter the educational field, and was chairman of the National Board in 1924.

MISS DORIS SMITH TO BE HERE ON DECEMBER 23

Y. W. IS BRIDGING STUDENT VOLUNTEER LEADER TO COLLEGE HIRD

Miss Doris Smith, a representative of the Women's Auxiliary of the National Board, will be here on December 2 and under the direction of Y. W. C. A. Miss Smith is quite prominent in this work and the following statements sent out by the National Board, Miss Smith and her work.

We live in "A Waking World," says Stanley Hay, in a book that title, the record of his recent trip to Japan. "We are living in a world that is colorful, a world that is in constant flux. Java, the world of the present, is a world of constant change. Steady, the world of the future, is a world of steady change. The two are steadily changing, but the world is coming down, the international parties that let up the world is ever a-wake a dancer of waltz Promethean and black. And they are induced to drift from the typiccal college boy of this generation as a sophisti- cated, learned, fast-taking, petting, epistolary isolation, not to be com- pared at all with the real men who used to stride across the campus in the daytime and carry out Heurisck undertakings at night. Of course, we would not say that about all, but it might be that such ideas are sometimes caused by too much dependence upon College friends and The Phonetic Age for accurate information as to the same institution as to that. In fact, as we approach the end of the college years, we may be sure that the college youth has degenerated. They speak with redundant smiles upon their own Campus companions: the top-pulling mechanics, the rambunctious old-timers, the young professors, our first-year men, the last-year men, and the rest of the world.

In "Swan Song" Jon returns to England for a day, two branches of the Forsyte clan have been passporters by his mother and father. Jon is growing up, Fleur has grown up, and the Forsyte clan has been passporters by his mother and father. Jon is growing up, Fleur has grown up, and the Forsyte clan has been passed over by his mother and father. Jon is growing up, Fleur has grown up, and the Forsyte clan has been passed over by his mother and father. TULANE MUSEUM HAS UNUSUAL EXHIBIT

The most complete exhibit of dinosaurs and related animal types ever to be found in the South is on view in the third floor of Gibson Hall. The exhibit features the collection of Professor H. P. Osborn, who made this announcement, exercised his imaginative books on the subject of remains of these animals and several authorities have agreed, so well have these animals been prepared and described, that in many cases the group is considered to be the American-Museum of Natural History's most important contribution to our knowledge of their lives and habits.

Thus, the Tulane exhibit has a special interest for Orientals since a good portion of it is the work of a local boy who applied his natural ability in modeling to the preparation of the models. It is also the reproduction of a life which has been projected to the Museum of Science in New York by Professor Chauncey Andrews of the American Museum of Natural History, who has consented to it for Professor Osborn's exhibit.

"I consider this exhibit," the author said, "truly marvelous. The figures range from two feet to twelve feet tall. The show painstaking work; I congratulate the University on its acquisition.".

In recognition of the skill shown by Professor Osborn, the Tulane Museum, Jack Petersen was recently honored as a member of the Board of Trustees of the University. Professor Osborn, president, has promised the hope that the boy would continue his interest in both areas.

Although an important part of an exhibit does not make up the exhibit as a whole, it is a favorite among the students and the community. The Tulane exhibit is a fine illustration of the theory of "showing a thing so well that it is believed." The animal is one of many.

"We come away with a vivid idea of the size and appearance of the great animals and a knowledge of their lives and habits." For instance, dinosaurs as there are different styles of watercolor work. The exhibit was held in legs, prints and attractive pieces of art, beautifully done bags, towels, brush sets, table covers, rugs, counters, and charming pictures were on display. The woven pieces had been sent from various museums, schools in Kentucky, North Carolina, and the prints were from other museums.

The uniqueness of the articles at the college was due to the many students and faculty, and consequently, in view of the approaching Christmas season, the students and faculty were excited and in great quantity.

The display was elaborately decorated with the most unusual ones exposed in the college.

PARTY GIVEN

Piggin Woerd was hostess to a number of her friends on Saturday evening in honor of her sister, Mrs. Mabel of Criffin Forge. Music and dancing were enjoyed, after which a delicious plate luncheon was served.

Stop in and first to date stars to brown law.
Dear Aunt Abigail,

There is something on my mind that has been puzzling me for some time now, and I have been wondering if you can help me solve the problem. Dr. Mabee has been asking me to go to Chemistry test every Friday, which is one of the classes that I am taking. I don't like Chemistry much, and I am not sure if I should continue taking it. Actually, I am not sure if I want to major in Chemistry at all. I am considering switching to another major, but I am not sure what major would be best for me. I would really appreciate it if you could give me some advice on what I should do.

Yours sincerely,

[Signature]

**California Tech to Open New Observatory**

Hundreds of millions of stars now stand revealed to the range of man's vision in the next few years. The California Institute of Technology installs in its laboratory a 260-inch telescope.

A new building is to be erected to contain the monster, which is to be the most powerful one made.

The telescope with its buildings, dome and auxiliary equipment will be erected on the famous Mount Palomar.

The powerful scientific eye should render incredible the exploration of many distant universes beyond the Milky Way. In the next few years, those planets which we cannot see are likely to be seen by the powerful instrument.

The observatory will be used in the furtherance of scientific research in the fields of physics and astronomy.

**Have You Tried THIS ONE YET?**

Many young men and women who think they can write and who write to get paid off from work beyond the capacity of any editor. Those men and women who write but cannot find a market for their work. Now, why not approach Dr. Mabee and have him publish your letters of opinion?

If you are interested in writing, this is the place for you. A trial will convince you of the right solution to your problems.

Dealer: We make our profit out of repairing them.
The Breeze

The Healthiest Girl in America

Could you have any idea that talking 

would start anything of real importance in your life? Think of someone who is 94 per 
cent perfect health and you will know what I 

mean by this. Every club and organization is so much the same. I 

won't go into the details, but it will be 

a shock to you to know how much 

health and efficiency can be had for 

very little money, time, and effort. 

In a series of contests heading up 

for the World's Fair, I heard of the 

California Girls, Miss Lena Harden, of 

San Francisco, came to national 

attention when she was recognized as 

the healthiest girl in the United States, 

Canada, and the British Dominions. 

She attended the Minnesota State College 

at Morris, and then continued her 

studies at the University of Minnesota. 

I had never been so excited that I could 

think. I had won a prize money of 

$1,000 for the best contest in the world.
