tron reactions,” “teacher training institutions.” One would expect these expressions to be hyphenated, like compounds, but they rarely are. The “teacher training institution” deserves especial attention, for its designation is characteristic. One never hears of “lawyer” or “doctor” training institutions. In this connection may be mentioned also the annoying tendency of educators to use “vision” as a verb. Witness: “To make up one’s mind concerning this great problem . . . . one must vision the teaching profession of this country as a whole,” or “One must also vision the 20,000,000 children of America.”

From time to time a term which has belonged to the jargon becomes passé. The term “vitalize” that flourished a few years ago is now seldom heard. So also, “trends in education,” “inductive method,” “formal steps.” “Service” has become so Babbitized that it is disappearing from the educational lingo, though teachers still receive “calls to service.” It is to the credit of the profession that the realtor’s use of “sell,” as in “sell your school to the community,” “sell your personality to the school board,” is now meeting with disfavor. The best element in the profession resents borrowing expressions that belong to the stock of those who barter. This resentment is well expressed by the following gem from the pen of an eminent professor of philosophy:

Thirty per cent of the elementary school children in Indiana are taught in one-room schools. Last year 352 one-room schools were abandoned, but there are still 3,029 in the state. Only one county, Marion, has entirely discontinued one-room schools, but three other counties have only one one-room school each.
