HPD to acquire drones
New technology to offer life-saving capabilities

By CHRISS KENT
The Breeze

After five months of negotiations, the Harrisonburg Police Department decided to experiment with a new technology: the unmanned aerial vehicle, or drone. The drones will be donated to HPD, provided they receive approval from Mayor Chris Jones, Vice Mayor Rick Robert and council members Jane Poucher, Jim Shaver and Toby Ford to use the technology.

The proposal, presented by Captain Tori Hooven of HPD, identified the lethal-saving capabilities that the drones could offer and highlighted the capability of the vehicle to reach an area faster than any other. In an emergency situation, it can reach a place within minutes of activation. A pilot of the vehicle and a captain of the department will be required to fly the drone.

Hooven gave an example of how the drone could be used: “If there is a vehicle that is fleeing the police, they can have it in the sky within minutes of it being activated and track its location and if necessary get it to the ground and remove it from the roadway.”

The proposal was presented to the Harrisonburg Police Foundation, a nonprofit organization that funds HPD programs and new equipment. The HPD hopes to have the drones within two to three months. On Aug. 5, the Harrisonburg City Council made a special allocation of $2,000 for the purchase of two drones. During this meeting, HPD received approval from the Aircraft Owners and Pilots Association to fly a drone without a pilot license.

The Harrisonburg Police Department’s new drone regulations are part of the Virginia General Assembly’s 2013 anti-drone bill that widened police’s use of drones but only within life-saving circumstances and training activities. Under the 2013 act, law enforcement activity was put on hold for two years. The Virginia General Assembly has passed its own laws that are very specific on the policy about where we are allowed to fly a drone and what we can do with it.

There is a lot of stuff in the media about drones, and HPD is trying to be proactive as opposed to reactive. We can remove an officer from a dangerous zone. There is a lot of stuff in the media about drones, and HPD is trying to be proactive as opposed to reactive. We can remove an officer from a dangerous zone. HPD recently had to ground its drones due to technical issues, but they were able to use them.

Under the 2013 act, law enforcement activity was put on hold for two years. The Virginia General Assembly has passed its own laws that are very specific on the policy about where we are allowed to fly a drone and what we can do with it.

“HPD has been trying to get drones for a good four to five years, but it was the wrong time,” Hooven said. “Now is the right time to fly it because of the opportunity to receive it as a donation and we’re thankful for that.”

Mayor Chris Jones said that he supported the decision to purchase the drones. HPD hopes to have the drones operational within another two to three months. HPD is also looking to hire a pilot for the drone program.

The Virginian-Pilot has been tasked with creating a moratorium on police drone activity. A 2013 bill put a two-year moratorium on law enforcement’s drone use. This bill put a moratorium on law enforcement’s drone use.

The Doomsday Doctor of the Virginia General Assembly’s 2013 anti-drone bill that widened police’s use of drones was the wrong time to use them. HPD is trying to be proactive as opposed to reactive. We can remove an officer from a dangerous zone.

Turkey worries over mass migration

The Seattle Times

Professional services firm Ernst & Young estimates that almost 7 million people have crossed into Europe in 2015 alone.

technology and health care services. Companies like Siemens, Airbus and Rolls-Royce, which are already major players in other sectors, are expanding their presence in this new frontier.

Istanbul’s mayor, Kadir Topbas, recently announced that the city will build a new airport to help facilitate this influx of people. The airport is expected to cost approximately $15 billion and will be completed in 2018.

More than 1 million people are now living in Istanbul, and the city’s population is expected to reach 12 million by 2025.

The Israeli government has warned that the influx of refugees could have serious implications for regional stability.

Locals have expressed concern about the potential for crime and治安 issues as the population grows.

In response, the government has implemented a number of measures to ensure public safety, including increased police patrols and heightened security measures.

Despite these challenges, tourism remains a key driver of the economy.

The Ministry of Tourism and Sports estimates that tourism generated $18.3 billion in revenue in 2014, accounting for 11% of the country’s GDP.

According to the World Travel and Tourism Council, tourism is expected to contribute 12% of the country’s GDP by 2025.

As a result, the government has been actively promoting Istanbul as a tourist destination, investing in new infrastructure and marketing the city’s attractions.

The government has also implemented a number of initiatives to support the local economy, including a program to encourage entrepreneurship and the development of new industries.

Despite these efforts, Istanbul still faces significant challenges.

The city is experiencing rapid urbanization, with an estimated 7 million people living in the metropolitan area.

The government has been working to address these issues, including the construction of new public housing and the expansion of public transportation.

However, many residents still face challenges, including overcrowding and lack of access to basic services.

Overall, Istanbul remains a dynamic and rapidly developing city, with significant potential for growth and development.

As the city continues to evolve, it will be important for both the government and the private sector to work together to ensure that the benefits of this growth are shared equitably.

Istanbul is a city that is constantly changing, and it will be exciting to see how it continues to develop in the years to come.
Discusses the origins, successes and future of the New Networked Campus Anti-Rape Movement.

In August, Cat’s Cradle surprised the Harrisonburg community by announcing that it might have to close permanently if it didn’t meet its summertime fundraising goal. Without the help of many private donors, the organization could cost up to $400,000 per year to stay running.

As a nonprofit, all of the funds come strictly from private donors, and none of the current donors actually reside in Harrisonburg.

"What we do is only possible through the support of others," Heldman said. "We reach out to our friends and family, and that's how the work gets done.

"It really helps endemic when we have allies, and support can come in many different forms from the community, from breweries or 3 or 4 municipal theater communities to being a part of the local community.," Heldman said.

Cat’s Cradle, which began in 1998 as a foster network, is now a nonprofit-certified cat rescue and adoption center whose mission is to rescue and maintain a safe and compassionate community for cats. The organization has grown substantially over the years with about 200 volunteers, families and friends.

Despite the growth, the organization still has even bigger plans for the future as long as getting the donations needed.

"I look to data, which shows that one in five and one in six are going on; if we mean something to the community, then support can come in many different forms from the community, from breweries or 3 or 4 municipal theater communities to being a part of the local community.," Heldman said.

"We are going to be under a different set of rules than high-school or college enforcement is going to be under a different set of rules than high-school or college.

"Law enforcement is going to be under a different set of rules than high-school enforcement is going to be under a different set of rules than high-school," Kolvoord said. "There are no set rules that we are to follow any drone misuse that could occur. He added that he believes that building a good reputation with the community begins with them trusting the police.

Caroline Heldman: The New Networked Campus Anti-Rape Movement Monday, Sept. 14, 7 P.M. Festival Ballroom

Caroline Heldman, an associate professor of politics at Occidental College addresses the origins, successes and future of the New Networked Anti-Rape Movement, which includes political movements against sexual assault by survivors and sponsors alike.

The organization seeks the triumphant lectures that will breathe Carolina Heldman.

"Ultimately, CARE exists to empower and support survivors by ensuring that there's always someone there to walk them through the ups and downs and support them in any path they choose to take." Garcia said.

The JMU Cycling club sees these rental programs as a way of possibly growing its club in the future.

"As far as our cycling club goes, I cannot see us turning a profit, but it is a great way to get more people around campus to see what it's like on a bike," Chris Bell, a junior mechanical engineering major and president of the JMU Cycling club, said. "We've had a few inquiries, which is great, but we're not making money out of it."

Bike rentals are often considered a fun and healthy way to get around campus and enjoy nature. The JMU Cycling club has been riding around the campus for years and has been a popular attraction for students and visitors alike. With the addition of rental programs, the club hopes to continue to grow and attract more riders to the community.

"I think the opportunity to rent a bike is something that is really unique to JMU," Bell said. "It is a great way to get more people involved and make cycling a more popular activity on campus."
Just JMU Things

Meatless Mondays should include chicken, too

Thousands of chickens are sent to slaughterhouses every week for their meat and eggs. Chickens, however, suffer and die at every stage of their lives, from birth to death. An estimated 5 billion chickens, 14 million turkeys, and 1 million ducks will be slaughtered in the United States on Thanksgiving alone.

Chickens are a major source of food, but they are also a major source of suffering. They are taken from factory farms to slaughterhouses at a young age and kept in overcrowded, unsanitary conditions. They are force-fed and have their legs cut off to prevent them from flying away. They are also subjected to electric shock and other forms of abuse. Chickens are often killed by being thrown into the air and hitting the ground, or by having their necks wrung off. These practices are incredibly cruel and inhumane.

In addition to the suffering of individual chickens, the meat industry has a significant impact on the environment. The production of chicken meat requires a large amount of water, antibiotics, and other chemicals. It also contributes to climate change and other environmental issues.

Chickens are often kept in overcrowded, unsanitary conditions.

Therefore, it is crucial that we take action to address the suffering of chickens and the environmental impact of the meat industry. Meatless Mondays, an initiative to reduce meat consumption, is a great opportunity to start making changes.

Meatless Mondays are a great opportunity to reduce meat consumption and address the suffering of chickens.

By taking part in Meatless Mondays, we can not only reduce our own meat consumption, but also encourage others to do the same. This can help to reduce the suffering of chickens and the negative impact of the meat industry on the environment.

In conclusion, Meatless Mondays should include chicken, too. We must take action to address the suffering of chickens and the environmental impact of the meat industry. Meatless Mondays are a great opportunity to start making changes.

Diplomacy instead of destruction

Iran nuclear deal will help relations with the Middle East

Keivan Hulligan, the war room

Iran nuclear deal will help relations with the Middle East

Last week, Senate Republicans blocked Democrats from considering the Iran nuclear deal. This is the latest attempt by the Republican Party to sabotage diplomacy instead of relying on intelligence, which is the traditional policy of the United States and its allies. The Republicans' attempts to sabotage diplomacy are a symptom of their inability to accept the fact that diplomacy is a tool that can be used to achieve our goals.

The deal is a great deal for Iran, the United States, and the rest of the world. It will bring the Iran nuclear program into compliance and provide a significant reduction in the number of potential weapons in the world. The deal is also a significant step toward reducing tension in the Middle East and improving relations between the United States and Iran.

Rising to the challenge

Volunteers for RISE Love Packs Ministry stuff backpacks with food for local children in need

By EMMA KORYNTA

The JMU students ready themselves to the school. The line forms usually slowly at the idea of keeping busy, but this time, none of the kids can contain their excited whispers.

The backpacks are here.

On Friday, JMU’s RISE Love Packs Ministry delivered backpacks filled with 47 donations to students who otherwise may not have a source of food during the weekend. Many of the students who have been chosen to receive backpacks are grade-for-grade students or are first-generation students of the university. Students are paid $10 each to fill their backpacks with food.

Emma Kosivtza, second-year psychology major and RISE Love Packs Ministry’s outreach coordinator, said the backpacks were delivered to the university’s 15 residence halls.

“Every week beginning this year we’ve gone to 15 residence halls,” Kosivtza said. “All of them have been done, and then moved the program to northern Virginia this year, and we’ve expanded.”

The backpacks are a gift to students who are chosen to receive them.

“The [students] get so excited and they smile and they know exactly what you’re there to do,” Kosivtza said. “The children get so excited and they smile and they ask ‘where is your next stop?’”

The volunteers, who are usually students, from community service hours. The ministry has an available outside of what many call the “JMU bubble.”

For the volunteers, it isn’t just about community service hours. The ministry has an emotional impact on them too.

“[Programs] really have a big impact on my heart,” Kosivtza said. “I feel satisfied about helping children. I think it’s opened a lot of people’s eyes to how they can serve others. I think it’s opened a lot of people’s eyes to how they can serve others.”

Jessica Balak, third-year JMU student and RISE Love Packs Ministry’s outreach coordinator, said the backpacks are delivered to the university’s 15 residence halls.

“This year, it’s very easy to forget about education,” Kosivtza said.

As first-year students often don’t have a way to get around the community or campus, they can forget about what’s available outside of what many call the “JMU bubble.”

“I think it’s opened up a lot of people’s eyes to how they can serve others,” Kosivtza said. “I think it’s opened a lot of people’s eyes to how they can serve others.”

The actual packing of bags can seem frantic, with volunteers rushing to get the job done.

**GROBAN | President Alger ‘loves’ the pop singer, reached out to van der Vat-Chromy after hearing news**

"I hope that we get a really realistic picture of what it’s like to make this kind of music, and to see what it’s like behind the scenes and all the hard work that these people who have made it put into it every day." 

Megan Rainey

graduate assistant and member of the Madison Singers

From page 7

"It’s quite a deal, we’ve had five or six others on a group this semester and now we’re singing with Josh Groban," said Megan Rainey. "It’s man, but that’s life for me in professional music!"

Despite the time commitment, the singer sees it as a chance to do something special.

"We’ve been independently preparing it, which is a big part of the Madison Singers’ legacy (many of us are solo singers as well)," Megan Rainey, a graduate assistant for the music program and member of the Madison singers, said. "This is a great opportunity for the professional world that none of us will be going into."

Rainey is also interested in seeing how professionals like Groban make it work.

"I hope that we get a really realistic picture of what it’s like to make this kind of music."

The opportunity to develop the music program and perform together with the Madison Singers at two concerts on the East Coast this week.

"It’s been to Josh Groban shows before. He’s been on television for 15 years now, it’s just surreal," Rainey said. "I’m just excited for the atmosphere of the shows as well. Professional connections aside, the singers are excited about the prospect of meeting other up-and-coming artists as well as professionals like Groban make it work.

"The feeling of being onstage in front of 3,000 people is not something you really get to see, but just knowing it is my favorite part."

"Not just [what they would be] thanking for, but what would really enjoy using," Balac said.

"We’re hoping to send some surveys out to the community out there to see what exactly he puts into it."

As RISE’s Love Packs Ministry looks to the future and all the hard work that these people who have made it put into it every day, "I hope we take this opportunity to grow as a community and within the clear and to potentially make some professional connections," went on."We’re trying to perform with such a high-culminating feel like in front of such an international audience with a few musicians who have been published everywhere like Josh Groban,"

"It’s opened my eyes to the greater filmmaking area I think coming in a first year, it’s very easy to forget about that.

"In your first year when you don’t have a lot of experience to ground the community in, you’re excited to do a lot of stuff that’s happening all the time. It’s what’s available outside of what I call "THE BLOOD!"

"It’s opened my eyes to a lot of people’s story. what can the students of the school do."

"He called me. It was a moment, " van der Vat-Chromy said. "He’s been to Josh Groban shows before. He’s really excited and wants to go, but has some professional duties that day of course."

Even beyond Algier’s excitement with the performance, van der Vat-Chromy sees this as an enormous opportunity to develop the music program and perform together with the Madison Singers at two concerts on the East Coast this week. Beyond that, the Madison Singers may one day see an opportunity to perform with the star of "The Voice" and "American Idol.""We’re stumbling into our own voice," van der Vat-Chromy said.

"He’s been to Josh Groban shows before. He’s really excited and wants to go, but has some professional duties that day of course."

While the actual packing of bags can be a way to get around the community out there, "It’s not something you really get to see, but just knowing it is my favorite part." If something else, this redundant play is quick."

"We’re hoping to send some surveys out to the community out there to see what exactly he puts into it."

As RISE’s Love Packs Ministry looks to the future and all the hard work that these people who have made it put into it every day, "I hope we take this opportunity to grow as a community and within the clear and to potentially make some professional connections," went on."We’re trying to perform with such a high-culminating feel like in front of such an international audience with a few musicians who have been published everywhere like Josh Groban,"

"It’s opened my eyes to the greater filmmaking area I think coming in a first year, it’s very easy to forget about that.

"In your first year when you don’t have a lot of experience to ground the community in, you’re excited to do a lot of stuff that’s happening all the time. It’s what’s available outside of what I call "THE BLOOD!"

"It’s opened my eyes to a lot of people’s story. what can the students of the school do."

"He called me. It was a moment, " van der Vat-Chromy said. "He’s been to Josh Groban shows before. He’s really excited and wants to go, but has some professional duties that day of course."

Even beyond Algier’s excitement with the performance, van der Vat-Chromy sees this as an enormous opportunity to develop the music program and perform together with the Madison Singers at two concerts on the East Coast this week. Beyond that, the Madison Singers may one day see an opportunity to perform with the star of "The Voice" and "American Idol.""

"It’s a moment of us I’m sure."

JMU field hockey hosted Virginia Commonwealth University on Sunday and came away victorious for the fourth game in a row with a 7-2 win.

JMU comes into this week with a 7-1 overall record and as the second seed in the conference. JMU defeated VCU last season 6-0, and they are looking to maintain that success this season. They are also off to a good start in the conference this season.

VCU comes into the game with a 2-5 overall record and a 0-2 record in conference play. They are coming off a loss against Towson University last week.

The Dukes scored five goals in the first half and two goals in the second half. The game was never in doubt for the Dukes.

The Dukes will play their next game on Tuesday, September 17th against George Washington University at 7 p.m.

La Salle ends JMU’s streak

Women’s soccer team is determined to catch up after Sunday’s 2-1 loss

By BENNETT CONLIN

The Breeze

Despite a loss Sunday, JMU’s women’s soccer team is determined to catch up against La Salle University Sunday. La Salle University scored two goals in the second half to hand the Dukes their first loss of the season 2-1 and their first game since 2012.

The women’s soccer team is coming off a win against VCU last weekend, but they were not able to maintain their momentum against La Salle University.

“It was a tough one to swallow,” JMU Head Coach Christy Morgan said. “They’ll be fine, they’re strong, they’re not going to let this get to them.”

JMU went into halftime leading 2-0 thanks to two goals from freshman midfielder Melanie Kusakavitch. Along with working at finishing games, the Dukes will need more from senior forward Ashley Herndon in the 21st minute.

The Dukes controlled the entire first half and gave up none to the Rams, but VCU was doing a good job of playing defense, "Morgan said. "I think we should’ve won that game.”

Overall, the team needs to get better every day. "We have a pretty young team overall and everyday we’re growing,” Morgan said. “This is a great opportunity for us to work through a couple things, and I think we did that. Every opportunity we step out on, we have to grow from it. We have to.”

The common theme for the first half was all of the fruitless chances to score and Morgan took note.

“We had plenty of time to snap it in the first half and we just got frustrated,” Morgan said. “That’s on us, the biggest disappointment.”

In the second half, JMU kept sending players forward and gave up none to the Rams, but VCU was doing a good job of playing defense, "Morgan said. “They’ll be fine, they’re not going to let this get to them.”

Along with working at finishing games, the Dukes will need more from senior forward Ashley Herndon in the 21st minute.

“Some times things just don’t want to come together,” Wilken said. “We were punished, but we almost wanted it too much.”

We have to respond well to the adversity of losing and someone else is going to have to step up and take on that responsibility,” Morgan said. “We’re the only players on the team with double-digit point totals. We have to get back our confidence.”

Three other Dukes lag behind with four goals each, but also with their ability, or lack thereof, to bounce back from their errors.

“This was a really close game. I’m very disappointed, we were a step up and take on that responsibility,” Morgan said. “We’re the only players on the team with double-digit point totals. We have to get back our confidence.”
